

Contents

Part I Introduction

1 Overview	3
1.1 Background	3
1.2 History of Facial Beauty Research	5
1.2.1 Early Exploration of Facial Beauty	6
1.2.2 Facial Beauty Study in Psychology	6
1.2.3 Facial Beauty Study in Aesthetic Surgery	8
1.2.4 Facial Beauty Study in Computer Science	9
1.3 Key Problems and Difficulties	10
1.3.1 Key Problems	10
1.3.2 Difficulties	11
1.4 Databases	12
1.5 Arrangement of This Book	14
1.5.1 PART I	14
1.5.2 PART II	14
1.5.3 PART III	14
1.5.4 PART IV	15
1.5.5 PART V	15
References	16
2 Typical Facial Beauty Analysis	19
2.1 Introduction	19
2.2 Golden Ratio Rules	20
2.3 Vertical Thirds and Horizontal Fifths	21
2.4 Averageness Hypothesis	22
2.5 Facial Symmetry and Beauty Perception	24
2.6 Facial Beauty Analysis by Biometrics Technology	25
2.6.1 Databases Used in Existing Works	26
2.6.2 Facial Feature Extraction	26
2.6.3 Modeling Methods	28
2.6.4 Applications	28

2.7	Summary	29
	References	29

Part II Facial Images and Features

3	Facial Landmark Model Design	35
3.1	Introduction.	35
3.1.1	Landmark	35
3.1.2	Landmark Model	36
3.2	Key Point (KP) Definition.	39
3.3	Inserted Point (IP) Generation	41
3.3.1	A Quantitative Measure of the Precision of LMs	42
3.3.2	Iterative Search for Optimal Positions of IPs	43
3.4	The Optimized Landmark Model	44
3.4.1	Training Data Preparation	44
3.4.2	IP Generation and the Optimized LM	45
3.5	Comparison with Other Landmark Models	48
3.5.1	Comparison of Approximation Error.	48
3.5.2	Comparison of Landmark Detection Error	50
3.6	Summary	51
	References	51
4	Geometrics Facial Beauty Study	53
4.1	Introduction.	53
4.2	Preliminary Work	54
4.2.1	Data Collection	54
4.2.2	Feature Extraction	54
4.2.3	Geometric Feature Normalization	56
4.3	Landmark Model Evaluation Method	58
4.3.1	Basic Statistical Analysis	58
4.3.2	Principal Component Analysis (PCA).	59
4.3.3	Multivariate Gaussian Model	60
4.3.4	Model Evaluation.	61
4.4	Results and Discussions	62
4.4.1	Mean Shape	62
4.4.2	Main Modes of Variation	63
4.4.3	Information Gain	65
4.5	Summary	66
	References	67
5	Putative Ratio Rules for Facial Beauty Indexing	69
5.1	Introduction.	69
5.2	Data Preparation	71
5.2.1	Average Face Dataset	71
5.2.2	Landmark Extraction	71
5.2.3	Collection of Putative Ratio Rules	73

5.3	Multi-national Average Faces Clustering	75
5.3.1	Measurement of Shape Differences	75
5.3.2	k-Means Clustering	75
5.3.3	Centers of Clusters	76
5.4	Assessment and Correction of Putative Ratio Rules	77
5.4.1	Criteria of Ratio Rule Assessment	78
5.4.2	Experimental Results on the Whole Dataset and Individual Clusters	78
5.5	Testing of the Corrected Ratio Rules	81
5.5.1	Testing on Synthesized Faces	81
5.5.2	Testing on Real Faces	82
5.6	Summary	85
	Appendix 1	85
	Appendix 2	86
	References	87
6	Beauty Analysis Fusion Model of Texture and Geometric Features	89
6.1	Introduction.	89
6.2	Geometric and Texture Feature Extraction.	90
6.2.1	Geometric Feature Extraction.	90
6.2.2	Texture Feature Extraction	92
6.3	Fusion Model Design	95
6.4	Experiments and Analysis	96
6.4.1	Experiments Using Geometric Features	97
6.4.2	Experiments Using Texture Features	97
6.4.3	Experiments on Fusion of Geometric and Texture Features	98
6.5	Summary	99
	Appendix 1	100
	References	101
7	Optimal Feature Set for Facial Beauty Analysis	103
7.1	Introduction.	103
7.2	Feature Extraction	104
7.2.1	Ratio Features	105
7.2.2	Shape	105
7.2.3	Eigenface	105
7.2.4	AAM	106
7.2.5	Gabor	107
7.2.6	LBP	107
7.2.7	PCANet	107
7.3	Feature Selection	108
7.4	Score Level Fusion and Optimal Feature Set	109

7.5	Experiments Results	110
7.5.1	Data Set and Preprocessing	110
7.5.2	KNN Regression Results.	111
7.5.3	Comparison of Regression Methods	113
7.5.4	Feature Selection Results	113
7.5.5	Results of Score Level Fusion and Optimal Feature Set	114
7.5.6	Comparison with Other Works.	116
7.6	Summary	117
	References	118

Part III Hypotheses on Facial Beauty Perception

8	Examination of Averageness Hypothesis on Large Database	123
8.1	Introduction.	123
8.2	Face Shape Space Modeling	124
8.2.1	Perception Function of Facial Beauty	124
8.2.2	Geometric Feature Definition.	125
8.2.3	Human Face Shape Space S_{FS}	125
8.2.4	Distance Measurement in S_{FS}	126
8.2.5	Calculation of Average Face Shapes in S_{FS}	127
8.3	Methodology: Quantitative Analysis.	128
8.3.1	Automatic Geometric Feature Extraction	128
8.3.2	Automatic Face Deformation	128
8.3.3	Stimuli Generation	131
8.3.4	Perception Experiment Design	131
8.4	Results and Analysis	132
8.4.1	Distribution of Human Face Shapes in S_G	132
8.4.2	Effect of Database Sizes on Average Face Shapes	132
8.4.3	Female Versus Male Average Face Shapes	134
8.4.4	Role of Average Face Shapes in Human Facial Beauty	134
8.5	Summary	139
	Appendix I.	140
	Appendix II	141
	References	141
9	A New Hypothesis on Facial Beauty Perception.	143
9.1	Introduction.	143
9.2	The Weighted Averageness (WA) Hypothesis	146
9.3	Empirical Proof of the WA Hypothesis.	147
9.3.1	Face Image Dataset	147
9.3.2	Attractiveness Score Regression.	148
9.3.3	Test the Hypothesis	149

9.4	Corollary of the Hypothesis and Convex Hull Based Face Beautification	152
9.4.1	Corollary of the WA Hypothesis	152
9.4.2	Convex Hull-Based Face Beautification	152
9.4.3	Results	153
9.4.4	Comparison and Discussion.	155
9.5	Compatibility with Other Hypotheses	158
9.5.1	Compatibility with the Averageness Hypothesis	159
9.5.2	Compatibility with the Symmetry Hypothesis	160
9.5.3	Compatibility with the Golden Ratio Hypothesis	160
9.6	Summary	161
	References	162

Part IV Computational Models of Facial Beauty

10 Beauty Analysis by Learning Machine and Subspace

	Extension	167
10.1	Introduction.	168
10.1.1	SLFN and ELM.	168
10.1.2	Kernel ELM	170
10.1.3	Weighted ELM	170
10.2	Evolutionary Cost-Sensitive Extreme Learning Machine	171
10.2.1	Cost-Sensitive Extreme Learning Machine.	172
10.2.2	Evolutionary CSELM.	174
10.2.3	Optimization	175
10.2.4	Parameters Setting	177
10.3	Discriminative Subspace Extension: ECSLDA.	178
10.4	Multi-modality Human Beauty Data Analysis	179
10.4.1	M ² B Database	180
10.4.2	Attractiveness Assessment: Beauty Recognition	181
10.5	Performance Analysis.	188
10.5.1	Face Analysis	188
10.5.2	Parameter Sensitivity Analysis.	193
10.5.3	Computational Complexity Analysis.	194
10.6	Summary	195
	References	195

11 Combining a Causal Effect Criterion for Evaluation of Facial Beauty Models.

		199
11.1	Introduction.	199
11.2	Causal Effect Criterion	201
11.3	Facial Beauty Modeling	203
11.3.1	Feature Extraction	203
11.3.2	Manifold Learning and Attractiveness Regression.	205
11.3.3	Feature Normalization and Model Causality	207

11.4	Model Based Facial Beauty Manipulation	207
11.5	Experimental Results	208
11.5.1	Results of Attractiveness Manifold Learning	208
11.5.2	Facial Attractiveness Manipulation	210
11.5.3	Quantitative Comparison Under Prediction Performance and Causal Effect Criteria	213
11.6	Summary	214
	References	215
12	Data-Driven Facial Beauty Analysis: Prediction, Retrieval and Manipulation	217
12.1	Introduction.	217
12.2	Facial Image Preprocessing and Feature Extraction.	219
12.2.1	Face Detection and Landmark Extraction	220
12.2.2	Face Registration and Cropping	220
12.2.3	Low-Level Face Representations	221
12.2.4	Soft Biometric Traits	221
12.3	Facial Beauty Modeling	221
12.3.1	Problem Formulation	222
12.3.2	Regression Methods	222
12.4	Facial Beauty Prediction	222
12.5	Beauty-Oriented Face Retrieval	223
12.5.1	Retrieval for Face Recommendation	224
12.5.2	Retrieval for Face Beautification	224
12.6	Facial Beauty Manipulation.	224
12.6.1	Exemplar-Based Manipulation	225
12.6.2	Model-Based Manipulation	225
12.7	Experiments	226
12.7.1	Data Set	226
12.7.2	Evaluation of Features for Facial Beauty Prediction	226
12.7.3	Benefit of Soft Biometric Traits	227
12.7.4	Results of Feature Fusion and Selection	227
12.7.5	Results of Beauty-Oriented Face Retrieval.	229
12.7.6	Results of Facial Beauty Manipulation	230
12.8	Summary	232
	References	233
 Part V Application System		
13	A Facial Beauty Analysis Simulation System	237
13.1	Introduction.	237
13.2	Face Detection.	240
13.2.1	Face Landmark	240
13.2.2	Face Image Correction	241

13.3	Facial Beauty Analysis	243
13.3.1	Beauty Analysis by Geometry Features	243
13.3.2	Beauty Analysis by Texture Features	245
13.3.3	Beauty Analysis by Popular Feature Model	245
13.4	Facial Aesthetics Applications	247
13.4.1	Facial Beauty Prediction Model	247
13.4.2	Facial Beautification Model	248
13.5	System Design for Facial Beauty Simulation	250
13.5.1	System Interface	250
13.5.2	Data Collection and Database	252
13.5.3	Experimental Results	253
13.6	Summary	257
	References	257
14	Book Review and Future Work	259
14.1	Overview of the Book	259
14.2	Challenges and Future Work	260
	Index	265

Computer Models for Facial Beauty Analysis

Zhang, D.; Chen, F.; Xu, Y.

2016, XV, 268 p. 141 illus., Hardcover

ISBN: 978-3-319-32596-5
