

Contents

1	Dominance Solvable Games	1
	Introduction	1
	Exercise 1—From Extensive Form to Normal form Representation-I ^A	2
	Exercise 2—From Extensive Form to Normal Form Representation-II ^A	3
	Exercise 3—From Extensive Form to Normal Form Representation-III ^B	5
	Exercise 4—Representing Games in Its Extensive Form ^A	7
	Exercise 5—Prisoners' Dilemma Game ^A	8
	Exercise 6—Dominance Solvable Games ^A	9
	Exercise 7—Applying IDSDS (Iterated Deletion of Strictly Dominated Strategies) ^A	10
	Exercise 8—Applying IDSDS When Players Have Five Available Strategies ^A	12
	Exercise 9—Applying IDSDS in the Battle of the Sexes Game ^A	16
	Exercise 10—Applying IDSDS in Three-Player Games ^B	17
	Exercise 11—Finding Dominant Strategies in games with $I \geq 2$ players and with Continuous Strategy Spaces ^B	19
	Exercise 12—Equilibrium Predictions from IDSDS versus IDWDS ^B	21
2	Pure Strategy Nash Equilibrium and Simultaneous-Move Games with Complete Information	25
	Introduction	25
	Exercise 1—Prisoner's Dilemma ^A	26
	Exercise 2—Battle of the Sexes ^A	29
	Exercise 3—Pareto Coordination ^A	30
	Exercise 4—Cournot game of Quantity Competition ^A	31
	Exercise 5—Games with Positive Externalities ^B	34
	Exercise 6—Traveler's Dilemma ^B	37
	Exercise 7—Nash Equilibria with Three Players ^B	39
	Exercise 8—Simultaneous-Move Games with $n \geq 2$ Players ^B	43
	Exercise 9—Political Competition (Hoteling Model) ^B	46
	Exercise 10—Tournaments ^B	49

Exercise 11—Lobbying ^A	52
Exercise 12—Incentives and Punishment ^B	54
Exercise 13—Cournot mergers with Efficiency Gains ^B	56
3 Mixed Strategies, Strictly Competitive Games, and Correlated Equilibria	61
Introduction	61
Exercise 1—Game of Chicken ^A	62
Exercise 2—Lobbying Game ^A	67
Exercise 3—A Variation of the Lobbying Game ^B	71
Exercise 4—Mixed Strategy Equilibrium with $n > 2$ Players ^B	73
Exercise 5—Randomizing Over Three Available Actions ^B	75
Exercise 6—Pareto Coordination Game ^B	78
Exercise 7—Mixing Strategies in a Bargaining Game ^C	80
Exercise 8—Depicting the Convex Hull of Nash Equilibrium Payoffs ^C	83
Exercise 9—Correlated Equilibrium ^C	87
Exercise 10—Relationship Between Nash and Correlated Equilibrium Payoffs ^C	95
Exercise 11—Identifying Strictly Competitive Games ^A	97
Exercise 12—Maxmin Strategies ^C	101
4 Sequential-Move Games with Complete Information	107
Introduction	107
Exercise 1—Ultimatum Bargaining Game ^B	108
Exercise 2—Electoral competition ^A	111
Exercise 3—Electoral Competition with a Twist ^A	113
Exercise 4—Trust and Reciprocity (Gift-Exchange Game) ^B	115
Exercise 5—Stackelberg with Two Firms ^A	117
Exercise 6—First- and Second-Mover Advantage in Product Differentiation	122
Exercise 7—Stackelberg Game with Three Firms Acting Sequentially ^A	125
Exercise 8—Two-Period Bilateral Bargaining Game ^A	127
Exercise 9—Alternating Bargaining with a Twist ^B	129
Exercise 10—Backward Induction in Wage Negotiations ^A	130
Exercise 11—Backward Induction-I ^B	132
Exercise 12—Backward Induction-II ^B	134
Exercise 13—Moral Hazard in the Workplace ^B	137
5 Applications to Industrial Organization	145
Introduction	145
Exercise 1—Bertrand Model of Price Competition ^A	146
Exercise 2—Bertrand Competition with Asymmetric Costs ^B	151
Exercise 3—Duopoly Game with A Public Firm ^B	154
Exercise 4—Cournot Competition with Asymmetric Costs ^A	157

Exercise 5—Strategic Advertising and Product Differentiation ^C	160
Exercise 6—Cournot Oligopoly ^B	163
Exercise 7—Commitment in Prices or Quantities? ^B	164
Exercise 8—Fixed Investment as a Pre-Commitment Strategy ^B	167
Exercise 9—Entry Detering Investment ^B	170
Exercise 10—Direct Sales or Using A Retailer? ^C	174
Exercise 11—Profitable and Unprofitable Mergers ^A	179
6 Repeated Games and Correlated Equilibria	183
Introduction	183
Exercise 1—Infinitely Repeated Prisoner’s Dilemma Game ^A	184
Exercise 2—Collusion when firms compete in quantities ^A	188
Exercise 3—Collusion when N firms compete in quantities ^B	192
Exercise 4—Collusion when N firms compete in prices ^C	195
Exercise 5—Repeated games with three available strategies to each player in the stage game ^A	197
Exercise 6—Infinite-Horizon Bargaining Game Between Three Players ^C	202
Exercise 7—Representing Feasible, Individually Rational Payoffs ^C . . .	204
Exercise 8—Collusion and Imperfect Monitoring ^C	208
7 Simultaneous-Move Games with Incomplete Information	217
Introduction	217
Exercise 1—Simple Poker Game ^A	218
Exercise 2—Incomplete Information Game, Allowing for More General Parameters ^B	221
Exercise 3—More Information Might Hurt ^B	225
Exercise 4—Incomplete Information in Duopoly Markets ^A	230
Exercise 5—Starting a Fight Under Incomplete Information ^C	233
8 Auctions	237
Introduction	237
Exercise 1—First Price Auction with N Bidders ^B	238
Envelope Theorem Approach	239
Direct Approach	241
Exercise 2—Second Price Auction ^A	244
Exercise 3—All-Pay Auction ^B	246
Envelope Theorem Approach	247
Direct Approach	248
Exercise 4—All-Pay Auctions (Easier Version) ^A	251
Exercise 5—Third-Price Auction ^A	252
Exercise 6—FPA with Risk-Averse Bidders ^B	253
9 Perfect Bayesian Equilibrium and Signaling Games	257
Introduction	257
Exercise 1—Finding Separating and Pooling Equilibria ^A	258

Exercise 2—Job-Market Signaling Game ^B	267
Exercise 3—Cheap Talk Game ^C	276
Exercise 4—Firm Competition Under Cost Uncertainty ^C	284
Exercise 5—Signaling Game with Three Possible Types and Three Messages ^C	289
Exercise 6—Second-Degree Price Discrimination ^B	294
Exercise 7—Applying the Cho and Kreps' (1987) Intuitive Criterion in the Far West ^B	298
10 More Advanced Signaling Games	303
Introduction	303
Exercise 1—Poker Game with Two Uninformed Players ^B	304
Exercise 2—Incomplete Information and Certificates ^B	308
Exercise 3—Entry Game with Two Uninformed Firms ^B	317
Exercise 4—Labor Market Signaling Game and Equilibrium Refinements ^B	319
Exercise 5—Entry Deterrence Through Price Wars ^A	324
Exercise 6—Entry Deterrence with a Sequence of Potential Entrants ^C	329
Erratum to: Strategy and Game Theory	E1
Index	339
