

# Contents

<b>Asymmetric Allylic Substitutions Using Organometallic Reagents . . . . .</b>	<b>1</b>
Valentín Hornillos, Jean-Baptiste Gualtierotti, and Ben L. Feringa	
<b>Formation of Quaternary Stereocentres by Copper-Catalysed Enantioselective Conjugate Addition Reaction . . . . .</b>	<b>41</b>
Beatriz Maciá	
<b>1,2- Versus 1,4-Asymmetric Addition of Grignard Reagents to Carbonyl Compounds . . . . .</b>	<b>99</b>
Pablo Ortiz, Francesco Lanza, and Syuzanna R. Harutyunyan	
<b>Asymmetric Addition of Boron and Silicon Nucleophiles . . . . .</b>	<b>135</b>
Alexander Hensel and Martin Oestreich	
<b>Catalytic Asymmetric Addition Reactions of Cu(I)-Conjugated Soft Carbon Nucleophiles . . . . .</b>	<b>169</b>
Xiaofeng Wei, Yohei Shimizu, and Motomu Kanai	
<b>Asymmetric Cycloaddition and Cascade Addition–Cyclization Reactions . . . . .</b>	<b>183</b>
Xin Fang, Jia-Wei Zhang, and Chun-Jiang Wang	
<b>1,2- Versus 1,4-Asymmetric Reduction of Ketones . . . . .</b>	<b>207</b>
Andrei V. Malkov and Kurt Lawson	
<b>Index . . . . .</b>	<b>221</b>

Organometallic Flow Chemistry

Noël, T. (Ed.)

2016, VII, 267 p. 50 illus., 46 illus. in color., Hardcover

ISBN: 978-3-319-33241-3
