

# Contents

## Invited Paper

|   |   |
|---|---|
| Learning with Intelligent Teacher . . . . . | 3 |
| <i>Vladimir Vapnik and Rauf Izmailov</i>    |   |

## Theory of Conformal Prediction

|   |    |
|---|----|
| Criteria of Efficiency for Conformal Prediction . . . . .                               | 23 |
| <i>Vladimir Vovk, Valentina Fedorova, Ilia Nouretdinov,<br/>and Alexander Gammerman</i> |    |
| Universal Probability-Free Conformal Prediction . . . . .                               | 40 |
| <i>Vladimir Vovk and Dusko Pavlovic</i>   |    |

## Applications of Conformal Prediction

|   |     |
|---|-----|
| Conformal Predictors for Compound Activity Prediction . . . . .   | 51  |
| <i>Paolo Toccaceli, Ilia Nouretdinov, and Alexander Gammerman</i>   |     |
| Conformal Prediction of Disruptions from Scratch: Application to an ITER<br>Scenario. . . . .                                       | 67  |
| <i>Raúl Moreno, Jesús Vega, Sebastián Dormido, and JET Contributors</i>   |     |
| Evaluation of a Variance-Based Nonconformity Measure for Regression<br>Forests. . . . .   | 75  |
| <i>Henrik Boström, Henrik Linusson, Tuve Löfström, and Ulf Johansson</i>  |     |
| Binary Relevance Multi-label Conformal Predictor . . . . .  | 90  |
| <i>Antonis Lambrou and Harris Papadopoulos</i>  |     |
| A Metric to Improve the Robustness of Conformal Predictors in the<br>Presence of Error Bars. . . . .                                | 105 |
| <i>Andrea Murari, Saeed Talebzadeh, Jesús Vega, Emmanuele Peluso,<br/>Michela Gelfusa, Michele Lungaroni, and Pasqualino Gaudio</i> |     |
| Decision Trees for Instance Transfer . . . . .  | 116 |
| <i>Shuang Zhou, Evgueni Smirnov, Gijs Schoenmakers, and Ralf Peeters</i>  |     |
| Hidden Markov Models with Confidence . . . . .  | 128 |
| <i>Giovanni Cherubin and Ilia Nouretdinov</i>   |     |

**Machine Learning**

|   |     |
|---|-----|
| Variable Fidelity Regression Using Low Fidelity Function Blackbox<br>and Sparsification . . . . .                                 | 147 |
| <i>A. Zaytsev</i>   |     |
| Effective Design for Sobol Indices Estimation Based on Polynomial Chaos<br>Expansions . . . . .                                   | 165 |
| <i>Evgeny Burnaev, Ivan Panin, and Bruno Sudret</i>   |     |
| Joint Prediction of Chronic Conditions Onset: Comparing Multivariate<br>Probits with Multiclass Support Vector Machines . . . . . | 185 |
| <i>Shima Ghassem Pour and Federico Girosi</i>   |     |
| Method of Learning Malware Behavior Scripts by Sequential Pattern<br>Mining . . . . .   | 196 |
| <i>A.V. Moldavskaya, V.M. Ruvinskaya, and E.L. Berkovich</i>  |     |
| Extended Regression on Manifolds Estimation . . . . .   | 208 |
| <i>Alexander Kuleshov and Alexander Bernstein</i>   |     |
| <b>Author Index</b> . . . . .   | 229 |

Conformal and Probabilistic Prediction with Applications  
5th International Symposium, COPA 2016, Madrid,  
Spain, April 20-22, 2016, Proceedings  
Gammerman, A.; Luo, Z.; Vega, J.; Vovk, V. (Eds.)  
2016, XII, 229 p. 45 illus., Softcover  
ISBN: 978-3-319-33394-6
