## Part I Valuation Adjustments

|   |     |
|---|-----|
| <b>Nonlinearity Valuation Adjustment</b> . . . . .  | 3   |
| Damiano Brigo, Qing D. Liu, Andrea Pallavicini and David Sloth                                |     |
| <b>Analysis of Nonlinear Valuation Equations Under Credit and Funding Effects.</b> . . . .    | 37  |
| Damiano Brigo, Marco Francischello and Andrea Pallavicini                                     |     |
| <b>Nonlinear Monte Carlo Schemes for Counterparty Risk on Credit Derivatives.</b> . . . .     | 53  |
| Stéphane Crépey and Tuyet Mai Nguyen  |     |
| <b>Tight Semi-model-free Bounds on (Bilateral) CVA</b> . . . . .                              | 83  |
| Jördis Helmers, Jan-J. Rückmann and Ralf Werner   |     |
| <b>CVA with Wrong-Way Risk in the Presence of Early Exercise</b> . . . . .                    | 103 |
| Roberto Baviera, Gaetano La Bua and Paolo Pelliccioli   |     |
| <b>Simultaneous Hedging of Regulatory and Accounting CVA</b> . . . . .                        | 117 |
| Christoph Berns   |     |
| <b>Capital Optimization Through an Innovative CVA Hedge</b> . . . . .                         | 133 |
| Michael Hünseler and Dirk Schubert  |     |
| <b>FVA and Electricity Bill Valuation Adjustment—Much of a Difference?</b> . . . . .          | 147 |
| Damiano Brigo, Christian P. Fries, John Hull, Matthias Scherer, Daniel Sommer and Ralf Werner |     |

## Part II Fixed Income Modeling

|  |     |
|--|-----|
| <b>Multi-curve Modelling Using Trees</b> . . . . . | 171 |
| John Hull and Alan White                           |     |

|   |     |
|---|-----|
| <b>Derivative Pricing for a Multi-curve Extension of the Gaussian, Exponentially Quadratic Short Rate Model . . . . .</b> | 191 |
| Zorana Grbac, Laura Meneghello and Wolfgang J. Runggaldier  |     |
| <b>Multi-curve Construction . . . . .</b>   | 227 |
| Christian P. Fries  |     |
| <b>Impact of Multiple-Curve Dynamics in Credit Valuation Adjustments . . . . .</b>  | 251 |
| Giacomo Bormetti, Damiano Brigo, Marco Francischello and Andrea Pallavicini   |     |
| <b>A Generalized Intensity-Based Framework for Single-Name Credit Risk . . . . .</b>                                      | 267 |
| Frank Gehmlich and Thorsten Schmidt   |     |
| <b>Option Pricing and Sensitivity Analysis in the Lévy Forward Process Model . . . . .</b>                                | 285 |
| Ernst Eberlein, M'hamed Eddahbi and Sidi Mohamed Lalaoui Ben Cherif   |     |
| <b>Inside the EMs Risky Spreads and CDS-Sovereign Bonds Basis . . . . .</b>   | 315 |
| Vilimir Yordanov  |     |
| <br><b>Part III Financial Engineering</b>   |     |
| <b>Basket Option Pricing and Implied Correlation in a One-Factor Lévy Model . . . . .</b>                                 | 335 |
| Daniël Linders and Wim Schoutens  |     |
| <b>Pricing Shared-Loss Hedge Fund Fee Structures . . . . .</b>  | 369 |
| Ben Djerroud, David Saunders, Luis Seco and Mohammad Shakourifar  |     |
| <b>Negative Basis Measurement: Finding the Holy Scale . . . . .</b>   | 385 |
| German Bernhart and Jan-Frederik Mai  |     |
| <b>The Impact of a New CoCo Issuance on the Price Performance of Outstanding CoCos . . . . .</b>                          | 405 |
| Jan De Spiegeleer, Stephan Höcht, Ine Marquet and Wim Schoutens   |     |
| <b>The Impact of Cointegration on Commodity Spread Options . . . . .</b>  | 421 |
| Walter Farkas, Elise Gourier, Robert Huitema and Ciprian Necula   |     |
| <b>The Dynamic Correlation Model and Its Application to the Heston Model . . . . .</b>                                    | 437 |
| L. Teng, M. Ehrhardt and M. Günther   |     |

Innovations in Derivatives Markets

Fixed Income Modeling, Valuation Adjustments, Risk  
Management, and Regulation
