Part I Game Playing in Virtual Worlds by Humans and Agents

1	From Player Types to Motivation	3
1.1	Virtual Worlds and Online Games	3
1.2	Explorer, Achiever, Socialiser, Aggressor: Human Player Types	4
1.3	Incentive-Based Theories of Motivation	9
1.3.1	Incentive	9
1.3.2	Achievement Motivation	10
1.3.3	Affiliation Motivation	13
1.3.4	Power Motivation	14
1.3.5	Dominant Motives and Motive Profiles	15
1.3.6	Motivation and Zeitgeist	16
1.4	Conclusion	17
	References	18
2	Computational Models of Achievement, Affiliation and Power Motivation	21
2.1	Towards Computational Motivation	21
2.2	Modelling Incentive-Based Motives Using Approach-Avoidance Theory	22
2.2.1	Modelling Achievement Motivation	26
2.2.2	Modelling Affiliation Motivation	31
2.2.3	Modelling Power Motivation	33
2.3	Motive Profiles for Artificial Agents	34
2.3.1	Modelling Profiles of Achievement, Affiliation and Power	35
2.3.2	Modelling the Dominant Motive Only	36
2.3.3	Optimally Motivating Incentive	36
2.4	Using Motive Profiles for Goal Selection	39
2.4.1	Winner-Takes-All	40
2.4.2	Probabilistic Goal Selection	41

2.5	Summary	41
	References	42
3	Game-Playing Agents and Non-player Characters	45
3.1	Artificial Intelligence in Non-player Characters	45
3.2	Rule-Based Agents	46
3.2.1	Game Scenarios for Motivated Rule-Based Agents	47
3.2.2	Motivated Rule-Based Agents	48
3.3	Crowds	49
3.3.1	Motivated Crowds	51
3.4	Learning Agents	52
3.4.1	Social Dilemma Games	53
3.4.2	Strategies in Game Theory	55
3.4.3	Motivated Learning Agents	56
3.5	Evolution	59
3.5.1	Multiplayer Social Dilemma Games	59
3.5.2	Evolution in Multiplayer Social Dilemma Games	60
3.5.3	Evolution of Motivated Agents	60
3.6	Summary	64
	References	64
 Part II Comparing Human and Artificial Motives		
4	Achievement Motivation	69
4.1	Scenarios and Mini-games for Motivated Agents	69
4.2	The Ring-Toss Game	70
4.3	Modelling Achievement-Motivated Rule-Based Agents	72
4.4	AchAgents Playing the Ring-Toss Game	75
4.4.1	Comparison to Humans	75
4.4.2	Comparison to Atkinson's Risk-Taking Model	77
4.4.3	Comparison to a Model of Achievement Motivation with Learning	79
4.5	Conclusion	80
	References	82
5	Profiles of Achievement, Affiliation and Power Motivation	83
5.1	Evolving Motivated Agents to Play Multiple Games	83
5.2	Roulette	84
5.2.1	Motive Profiles for Roulette	85
5.2.2	Motivated Rule-Based Agents Playing Roulette	87
5.2.3	Comparison to Humans	89
5.3	The Prisoners' Dilemma Game	90
5.3.1	Motivated Rule-Based Agents and the Prisoners' Dilemma	92
5.3.2	Comparison to Humans	92
5.4	Conclusion	94
	References	95

Part III Game Scenarios for Motivated Agents

6	Enemies	99
6.1	Types of Non-player Characters and Their Roles	99
6.2	<i>Paratrooper</i>	100
6.2.1	Motivated Rule-Based Agents as Paratroopers	101
6.2.2	Empirical Study: Motivated Paratroopers	103
6.2.3	Summary	104
6.3	The Prisoners' Dilemma Revisited	105
6.3.1	Arms Races in Turn-Based Strategy Games	106
6.3.2	Perception of Arms Races by Motivated Learning Agents	106
6.3.3	Empirical Study: Motivated Learning Agents in an Arms Race	110
6.4	The Leader Game	113
6.4.1	Perception of Leader Games by Motivated Learning Agents	115
6.4.2	Empirical Study: Motivated Learning Agents as Explorers	117
6.4.3	Application: Motivation to Explore in a Turn-Based Strategy Game	119
6.5	Conclusion	124
	References	125
7	Pets and Partner Characters	127
7.1	Pets, Partners and Minions	127
7.2	The Chicken (or Snowdrift) Game	128
7.2.1	Perception of the Snowdrift Game by Motivated Learning Agents	129
7.2.2	Empirical Study: Motivated Learning Agents as Partner Characters	131
7.2.3	Application: Motivated Battle Pets or Minions	133
7.3	Battle of the Sexes	137
7.3.1	Perception of Battle of the Sexes by Motivated Learning Agents	138
7.3.2	Empirical Study: Motivated Learning Agents as Negotiators	140
7.4	Conclusion	142
	References	143
8	Support Characters	145
8.1	Motivation in Multi-agent Systems	145
8.2	<i>Breadcrumbs</i>	146
8.2.1	Attracting a (Motivated) Crowd	146
8.2.2	Case Studies	147
8.2.3	Scenarios Abstracted by Breadcrumbs	150

8.3	Chicken Revisited	151
8.3.1	Player-Base Motive Indices	151
8.3.2	Motivated Learning Agents as Vendors	152
8.3.3	Empirical Study: Vendors Bargaining with Multiple Opponents	153
8.4	Battle of the Sexes Revisited	155
8.4.1	Motivated Learning Agents as Quest Givers	155
8.4.2	Empirical Study: Quest Givers Negotiating with Multiple Opponents	158
8.5	Conclusion	158
	References	159

Part IV Evolution and the Future of Motivated Agents

9	Evolution of Motivated Agents	163
9.1	The Evolutionary Perspective	163
9.2	Multiplayer Social Dilemma Games	164
9.2.1	Common Pool Resource Games	168
9.2.2	n-Player Leader	171
9.2.3	The Hawk-Dove Game	173
9.2.4	n-Player Battle of the Sexes	176
9.2.5	Summary	180
9.3	<i>Paratrooper</i> Revisited	180
9.3.1	Evolution of Motivated Paratroopers	180
9.3.2	Case Study	181
9.4	Conclusion	182
	References	183
10	Conclusion and Future	185
10.1	The Building Blocks of Computational Motivation	185
10.1.1	Feature Selection	186
10.1.2	Task or Goal Generation	187
10.1.3	Motivation Functions	188
10.1.4	Arbitration Functions	189
10.1.5	Goal Selection	189
10.1.6	Summary	190
10.2	Motivated Agents	190
10.2.1	Motivated Rule-Based Agents	190
10.2.2	Motivated Learning Agents	191
10.2.3	Motivated Reinforcement Learning Agents	191
10.2.4	Crowds of Motivated Agents	192
10.2.5	Evolution of Motivated Agents	192
10.2.6	Summary	192

10.3 Future 193

10.3.1 Motivated Agents in Computer Games 193

10.3.2 The Future of Computational Motivation 194
