

Contents

Part I Pedestrians

Methodology for Generating Individualised Trajectories from Experiments	3
Wolfgang Mehner, Maik Boltes and Armin Seyfried	
Advances in Measuring Pedestrians at Dutch Train Stations Using Bluetooth, WiFi and Infrared Technology	11
Jeroen van den Heuvel, Danique Ton and Kim Hermansen	
Avoiding Walls: What Distance Do Pedestrians Keep from Walls and Obstacles?	19
Ernst Bosina, Mark Meeder, Beda Büchel and Ulrich Weidmann	
Estimation of Density Levels in the Holy Mosque from a Network of Cameras	27
Yasir S. Ali, Basim Zafar and Mohammed Simsim	
Is Slowing Down Enough to Model Movement on Stairs?	35
Gerta Köster, Daniel Lehmberg and Felix Dietrich	
Data-Driven Characterisation of Multidirectional Pedestrian Traffic	43
Marija Nikolić, Michel Bierlaire and Flurin Hänseler	
Asymmetric Pedestrian Dynamics on a Staircase Landing from Continuous Measurements	49
Alessandro Corbetta, Chung-Min Lee, Adrian Muntean and Federico Toschi	
Experimental Study of High-Density Pedestrian Flow Field Characteristics at a Crossing	57
Liping Lian, Weiguo Song, Yuen Kwok Kit Richard and Chunlin Wu	

Empirical Study of the Influence of Social Groups in Evacuation Scenarios	65
Cornelia von Krüchten, Frank Müller, Anton Svachiy, Oliver Wohak and Andreas Schadschneider	
Detection of Steady State in Pedestrian Experiments	73
Weichen Liao, Antoine Tordeux, Armin Seyfried, Mohcine Chraibi, Xiaoping Zheng and Ying Zhao	
Statistical Models for Pedestrian Behaviour in Front of Bottlenecks	81
Nikolai W.F. Bode and Edward A. Codling	
Congestion Dynamics in Pedestrian Single-File Motion	89
Verena Ziemer, Armin Seyfried and Andreas Schadschneider	
Determining the Density Experienced by Pedestrians in Unstable Flow Situations	97
Dorine C. Duives, Winnie Daamen and Serge P. Hoogendoorn	
Individual Microscopic Results of Bottleneck Experiments	105
Marek Bukáček, Pavel Hrabák and Milan Krbálek	
Modelling Stride Length and Stepping Frequency	113
Isabella von Sivers, Gerta Köster and Benedikt Kleinmeier	
Experimental Study on the Influence of Step Phase in Pedestrian Movement	121
Chi Liu, Weiguo Song and Siuming Lo	
The Influence of Moore and von-Neumann Neighbourhood on the Dynamics of Pedestrian Movement	129
Christian Rogsch	
Simulation of People Flow by a New Fuzzy Discrete Automata Model and an Ergonomic Approach	137
Henrique C. Braga, Gray F. Moita and Paulo E.M. Almeida	
The Inflection Point of the Speed–Density Relation and the Social Force Model	145
Tobias Kretz, Jochen Lohmiller and Johannes Schlaich	
Sensitivity Analysis of the Local Route Choice Parameters of the Continuum Model Regarding Pedestrian Movement Phenomena	153
Dorine C. Duives, Winnie Daamen and Serge P. Hoogendoorn	
How to Get a Model in Pedestrian Dynamics to Produce Stop and Go Waves	161
Felix Dietrich, Stefan Disselinkötter and Gerta Köster	

A Force-Based Model to Reproduce Stop-and-Go Waves in Pedestrian Dynamics	169
Mohcine Chraïbi, Antoine Tordeux and Andreas Schadschneider	
Impact of Impulse Stops on Pedestrian Flow	177
Jaeyoung Kwak, Hang-Hyun Jo, Tapio Luttinen and Iisakki Kosonen	
Investigation on Cooperative Avoiding Behaviour in Bi-directional Flow	185
Daichi Yanagisawa	
A Queuing Model Based on Social Attitudes	193
Gerta Köster and Benedikt Zönnchen	
How Do People Queue? A Study of Different Queuing Models	201
Angelika Kneidl	
The Relationship Between the Waiting Crowd and the Average Service Time	209
Oliver Handel and André Borrmann	
How Do We Wait? Fundamentals, Characteristics, and Modelling Implications	217
Michael J. Seitz, Stefan Seer, Silvia Klettner, Oliver Handel and Gerta Köster	
Collision-Free Speed Model for Pedestrian Dynamics	225
Antoine Tordeux, Mohcine Chraïbi and Armin Seyfried	
Finite Element Simulation of a Macroscopic Model for Pedestrian Flow	233
Rebekka Axthelm	
A Unified Pedestrian Routing Model Combining Multiple Graph-Based Navigation Methods	241
Peter M. Kielar, Daniel H. Biedermann, Angelika Kneidl and André Borrmann	
Wayfinding and Cognitive Maps for Pedestrian Models	249
Erik Andresen, David Haensel, Mohcine Chraïbi and Armin Seyfried	
Adaptive Tactical Decisions in Pedestrian Simulation: A Hybrid Agent Approach	257
Luca Crociani, Giuseppe Vizzari and Stefania Bandini	
Evacuation Dynamics of Asymmetrically Coupled Pedestrian Pairs	265
Frank Müller and Andreas Schadschneider	

Granulometric Distribution and Crowds of Groups: Focusing on Dyads	273
Andrea Gorrini, Giuseppe Vizzari and Stefania Bandini	
Method for Simulating the Evacuation Behaviours of People in Dynamically Changing Situations	281
Tomoichi Takahahi, Toshinori Niwa and Rintaro Isono	
Efficacy of Pedestrian Evacuation Time Estimate Using Agent Based Queuing Network Model	289
Bharat Kunwar, Filippo Simini and Anders Johansson	
Modelling Pedestrian Evacuation Movement on a Swaying Ship	297
Juan Chen, Jian Ma and Siuming Lo	
Granularity of Pre-movement Time Distribution in Crowd Evacuation Simulations	305
Jakub Porzycki, Jarosław Wąs, Robert Lubaś and Grzegorz Bazior	
Estimation of Discretised Motion of Pedestrians by the Decision-Making Model	313
Pavel Hrabák, Ondřej Ticháček and Vladimíra Sečkárová	
Oppilatio: The Forecast of Crowd Congestions on Street Networks During Public Events	321
Daniel H. Biedermann, Peter M. Kielar and André Borrmann	
Simulation-Based Forecasts of Crowd Flows at Major Events Using Real-Time Measurements	329
Thomas Matyus, Stefan Seer and Helmut Schrom-Feiertag	
Level of Safety Concept for Major Events	337
Stefan Holl, Maik Boltes and Armin Seyfried	
Brazilian Legislation and the Boate Kiss Tragedy: Computational Modelling of Evacuation	345
Henrique C. Braga, Gray F. Moita and Paulo E.M. Almeida	
Simulation of Crowd in the Corridor of Ziara in Masjid-e-Nabwi, Madinah	353
Abdullah Alshehri, Muhammad Arif and Emad Felamban	
Pedestrian Dynamics at Transit Stations: An Integrated Pedestrian Flow Modelling Approach	361
Emily Porter, Samer Hamdar and Winnie Daamen	
PedVis: Pedestrian Flow Visualisations	369
Jimmy Schmid, Harald Klingemann, Arne Scheuermann, Judith Bühling, Nicolo Bernasconi and Michael Flückiger	

Facing Needs and Requirements of Crowd Modelling: Towards a Dedicated Computer Vision Toolset	377
Sultan Daud Khan, Giuseppe Vizzari and Stefania Bandini	
 Part II Vehicular Traffic	
Computer-Aided Bifurcation Analysis for a Novel Car-Following Model with Relative Velocity Effect	387
Akiyasu Tomoeda, Tomoyuki Miyaji and Kota Ikeda	
Lane Change Strategies on Freeways: A Microscopic Simulation Study	395
Mehdi Keyvan-Ekbatani, Victor L. Knoop, Vincent Grébert and Winnie Daamen	
When Is a Bottleneck a Bottleneck?	403
Andreas Schadschneider, Johannes Schmidt and Vladislav Popkov	
Jam Avoidance with Autonomous Systems	411
Antoine Tordeux and Sylvain Lassarre	
Modelling Backward Travelling Holes in Mixed Traffic Conditions Using an Agent Based Simulation	419
Amit Agarwal, Gregor Lämmel and Kai Nagel	
Analysis in Kantorovich Geometric Space for Quasi-stable Patterns in 2D-OV Model	427
Ryosuke Ishiwata and Yuki Sugiyama	
Fractal Analysis of Empirical and Simulated Traffic Time Series	435
Thomas Zaksek and Michael Schreckenberg	
Wide Scattering of Nagel-Schreckenberg Fundamental Diagram Under Traffic Bottlenecks	443
Wei Liang Quek and Lock Yue Chew	
A General Scheme for Deterministic Microscopic Traffic Models. Part I: Theoretical Construction	451
Bo Yang and Christopher Monterola	
A General Scheme for Deterministic Microscopic Traffic Models. Part II: Empirical Verifications.	459
Bo Yang, Jiwei Yoon and Christopher Monterola	
Influence of Various Traffic Densities on 1/f Noise	467
Reuben Thieberger	
A Multi-class Vehicular Flow Model for Aggressive Drivers	475
Wilson Marques Jr., Rosa María Velasco and Alma Méndez	

Microscopic Simulations of Oversaturated City Traffic: Features of Synchronised Flow Patterns.	483
Gerhard Hermanns, Peter Hemmerle, Hubert Rehborn, Boris S. Kerner and Michael Schreckenberg	
Traffic Simulations with Empirical Data: How to Replace Missing Traffic Flows?	491
Lars Habel, Alejandro Molina, Thomas Zaksek, Kristian Kersting and Michael Schreckenberg	
Dynamic Model for Assignment in a ‘Sky-Car’ Transit System: Spatial Interactions with Other Common Transport Modes	499
Kwami Sossoe and Jean-Patrick Lebacque	
Phenomena-Based Traffic Flow Multi-scale Modelling	507
Mahtab Joueiai, Hans van Lint and Serge Hoogendoorn	
Calibrating the Local and Platoon Dynamics of Car-Following Models on the Reconstructed NGSIM Data	515
Valentina Kurtc and Martin Treiber	
Scaling from Circuit Experiment to Real Traffic Based on Optimal Velocity Model	523
Akihiro Nakayama, Macoto Kikuchi, Akihiro Shibata, Yuki Sugiyama, Shin-ichi Tadaki and Satoshi Yukawa	
Traffic Flow Optimisation at Sags by Controlling the Acceleration of Some Vehicles.	531
Bernat Goñi-Ros, Victor L. Knoop, Kenichi Kitahama, Bart van Arem and Serge P. Hoogendoorn	
Impact of Synchronised Flow in Oversaturated City Traffic on Energy Efficiency of Conventional and Electrical Vehicles	539
Peter Hemmerle, Micha Koller, Gerhard Hermanns, Michael Schreckenberg, Hubert Rehborn and Boris S. Kerner	
Evaluation of Air Transportation Network Resilience Using Adaptive Capacity.	547
Suhjung Yoo and Hwasoo Yeo	
Network-Wide Mesoscopic State Estimation Based on a Variational Formulation of the LWR Model and Using Lagrangian Observations	555
Yufei Yuan, Aurélien Duret and Hans van Lint	
Route Choice Behaviour in a Three Roads Scenario.	563
Dominik Wegerle and Michael Schreckenberg	

Traffic Phase Dependent Fuel Consumption	571
Micha Koller, Peter Hemmerle, Hubert Rehborn, Boris Kerner and Stefan Kaufmann	
Examining Perimeter Gating Control of Urban Traffic Networks with Locally Adaptive Traffic Signals	579
Mehdi Keyvan-Ekbatani, Xueyu Gao, Vikash V. Gayah and Victor L. Knoop	
A Comparison of Tram Priority at Signalised Intersections in Melbourne	587
Lele Zhang, Timothy Garoni and Somayeh Shiri	
 Part III Other	
Boarding of Finite-Size Passengers to an Airplane	597
Jevgenijs Kaupužs, Reinhard Mahnke and Hans Weber	
Collective Dynamics and Motility of Soft Elliptical Particles	605
Ruben van Drongelen and Timon Idema	
Capacity Estimation Method of a Waterway Intersection	613
Xavier Bellsolà Olba, Winnie Daamen, Tiedo Vellinga and Serge P. Hoogendoorn	
Granular Flow to a Blast Iron Ore Furnace: Influence of Particle Size Distribution on Segregation of a Mixture	621
Dingena Schott, Wouter Vreeburg, Carmen Molhoek and Gabriel Lodewijks	
Two-Channel Partially Coupled Exclusion Process with Mutually Interactive Langmuir Kinetics	629
Arvind Kumar Gupta	
Author Index	637

Traffic and Granular Flow '15

Knoop, V.L.; Daamen, W. (Eds.)
