

Contents

Part I Invited Papers

Multilevel Monte Carlo Implementation for SDEs Driven by Truncated Stable Processes	3
Steffen Dereich and Sangmeng Li	
Construction of a Mean Square Error Adaptive Euler–Maruyama Method With Applications in Multilevel Monte Carlo	29
Håkon Hoel, Juho Häppölä and Raúl Tempone	
Vandermonde Nets and Vandermonde Sequences	87
Roswitha Hofer and Harald Niederreiter	
Path Space Markov Chain Monte Carlo Methods in Computer Graphics	107
Wenzel Jakob	
Walsh Figure of Merit for Digital Nets: An Easy Measure for Higher Order Convergent QMC	143
Makoto Matsumoto and Ryuichi Ohori	
Some Results on the Complexity of Numerical Integration	161
Erich Novak	
Approximate Bayesian Computation: A Survey on Recent Results	185
Christian P. Robert	

Part II Contributed Papers

Multilevel Monte Carlo Simulation of Statistical Solutions to the Navier–Stokes Equations	209
Andrea Barth, Christoph Schwab and Jonas Šukys	

Unbiased Simulation of Distributions with Explicitly Known Integral Transforms	229
Denis Belomestny, Nan Chen and Yiwei Wang	
Central Limit Theorem for Adaptive Multilevel Splitting Estimators in an Idealized Setting	245
Charles-Edouard Bréhier, Ludovic Goudenège and Loïc Tudela	
Comparison Between LS-Sequences and β-Adic van der Corput Sequences	261
Ingrid Carbone	
Computational Higher Order Quasi-Monte Carlo Integration	271
Robert N. Gantner and Christoph Schwab	
Numerical Computation of Multivariate Normal Probabilities Using Bivariate Conditioning	289
Alan Genz and Giang Trinh	
Non-nested Adaptive Timesteps in Multilevel Monte Carlo Computations	303
Michael B. Giles, Christopher Lester and James Whittle	
On ANOVA Decompositions of Kernels and Gaussian Random Field Paths	315
David Ginsbourger, Olivier Roustant, Dominic Schuhmacher, Nicolas Durrande and Nicolas Lenz	
The Mean Square Quasi-Monte Carlo Error for Digitally Shifted Digital Nets	331
Takashi Goda, Ryuichi Ohori, Kosuke Suzuki and Takehito Yoshiki	
Uncertainty and Robustness in Weather Derivative Models	351
Ahmet Göncü, Yaning Liu, Giray Ökten and M. Yousuff Hussaini	
Reliable Adaptive Cubature Using Digital Sequences	367
Fred J. Hickernell and Lluís Antoni Jiménez Rugama	
Optimal Point Sets for Quasi-Monte Carlo Integration of Bivariate Periodic Functions with Bounded Mixed Derivatives	385
Aicke Hinrichs and Jens Oettershagen	
Adaptive Multidimensional Integration Based on Rank-1 Lattices	407
Lluís Antoni Jiménez Rugama and Fred J. Hickernell	
Path Space Filtering	423
Alexander Keller, Ken Dahm and Nikolaus Binder	
Tractability of Multivariate Integration in Hybrid Function Spaces	437
Peter Kritzer and Friedrich Pillichshammer	

Derivative-Based Global Sensitivity Measures and Their Link with Sobol' Sensitivity Indices	455
Sergei Kucherenko and Shugfang Song	
Bernstein Numbers and Lower Bounds for the Monte Carlo Error	471
Robert J. Kunsch	
A Note on the Importance of Weak Convergence Rates for SPDE Approximations in Multilevel Monte Carlo Schemes	489
Annika Lang	
A Strategy for Parallel Implementations of Stochastic Lagrangian Simulation	507
Lionel Lenôtre	
A New Rejection Sampling Method for Truncated Multivariate Gaussian Random Variables Restricted to Convex Sets	521
Hassan Maatouk and Xavier Bay	
Van der Corput and Golden Ratio Sequences Along the Hilbert Space-Filling Curve	531
Colas Schretter, Zhijian He, Mathieu Gerber, Nicolas Chopin and Harald Niederreiter	
Uniform Weak Tractability of Weighted Integration	545
Paweł Siedlecki	
Incremental Greedy Algorithm and Its Applications in Numerical Integration	557
Vladimir Temlyakov	
On “Upper Error Bounds for Quadrature Formulas on Function Classes” by K.K. Frolov	571
Mario Ullrich	
Tractability of Function Approximation with Product Kernels	583
Xuan Zhou and Fred J. Hickernell	
Discrepancy Estimates For Acceptance-Rejection Samplers Using Stratified Inputs	599
Houying Zhu and Josef Dick	
Index	621

Monte Carlo and Quasi-Monte Carlo Methods

MCQMC, Leuven, Belgium, April 2014

Cools, R.; Nuyens, D. (Eds.)

2016, XVIII, 622 p. 116 illus., 57 illus. in color.,

Hardcover

ISBN: 978-3-319-33505-6
