

# Contents

<b>1 Geospatial Information Technology</b>	<b>1</b>
Introduction	1
The Term “GIS”	2
Components of GIS	3
GIS as a Technology	4
Spatial Data	4
Database as Data Store	5
Data Capture	6
Data Modeling	6
Data Retrieval	6
Data Presentation	7
Data Distribution	7
Developments in GIS	8
GIS Packages	8
Packaged GIS	9
Modular GIS	9
Data-Centered GIS	10
Component GIS	10
Internet GIS	10
Ubiquitous GIS	11
Geospatial-Data Modeling	12
Data Model	13
Geo-relational Data Model	14
Integrated Geospatial Data Model	15
Extensibility	16
Characteristics	16
Limitations	17
Object-Oriented Data Model	17
Summary	18
References	19

<b>2 Spatial-Positioning Technology</b>	21
Introduction	21
The Global Positioning System (GPS)	21
System Components.	22
GPS Positioning Principles	24
Sources of Errors.	26
Accuracy of GPS.	27
Differential GPS (DGPS)	28
Architecture of DGPS	28
Accuracy of DGPS	29
Application of GPS/DGPS	29
Assisted GPS (AGPS)	30
Components of AGPS	30
Accuracy of AGPS	32
Application of AGPS	32
Wide Area Augmentation System (WAAS).	32
Architecture of WAAS.	33
Accuracy of WAAS.	34
Application of WAAS	34
GLONASS	34
Galileo—European Satellite Navigation System.	35
Network-Based Positioning System (NBPS)	35
Time of Arrival (TOA).	37
Time Difference of Arrival (TDOA).	38
Applications of NBPS	38
Radio-Based Positioning System (RBPS)	38
Real-Time Locating System (RTLS)	39
Application of RTLS	39
RTLS Versus GPS.	39
Radiofrequency Identification (RFID).	40
Summary	41
References	42
<b>3 Networking and Web-Services.</b>	43
Introduction	43
Wired and Wireless Networking	44
What is a Network?.	44
Local Area Network.	45
Wide Area Network.	45
Asynchronous Transfer Mode (ATM).	45
Network Communications Protocols.	46
Cellular Communications Protocols	47

Client–Server Computing . . . . .	49
Distributed Computing . . . . .	50
Types of Distributed Computing . . . . .	51
Wireless Computing . . . . .	52
Security of Wireless Networks . . . . .	52
Wireless Networks and Ethernet Switch . . . . .	53
The Speed of Wireless Networks . . . . .	53
Where to Use Wireless Networks . . . . .	54
Web Services . . . . .	54
The Web-Services Model . . . . .	55
Roles in Web-Services Elements . . . . .	56
Operations in a Web Service . . . . .	56
Artifacts of a Web Service . . . . .	57
The Life Cycle of Web Services . . . . .	57
Publication and Discovery of Service . . . . .	59
Generation of Service Descriptions . . . . .	59
Publishing Service Descriptions . . . . .	60
The Service-Discovery Concept . . . . .	60
Getting Service Descriptions . . . . .	61
Consumption-of-Service Descriptions . . . . .	61
Summary . . . . .	61
References . . . . .	62
<b>4 Distributed GIS Technology . . . . .</b>	<b>63</b>
Distributed Systems . . . . .	63
Types of Distributed System . . . . .	63
OS-Based Distributed System . . . . .	64
Distributed Computing Environment . . . . .	64
Architecture of a Distributed System . . . . .	65
Distributed GIS . . . . .	66
Distributed GIS Construct . . . . .	67
Functional Requirements for Distributed GIS . . . . .	76
Technologies for Distributed GIS . . . . .	76
Application Issues with Distributed GIS Technology . . . . .	78
Summary . . . . .	79
References . . . . .	80
<b>5 Mobile GIS and Location-Based Services (LBS) . . . . .</b>	<b>83</b>
Introduction . . . . .	83
The Need for Mobile GIS . . . . .	84
Architecture of Mobile GIS Systems . . . . .	86
Mobile GIS Protocols . . . . .	87
Wireless Application Protocol (WAP) and Wireless Markup Language (WML) . . . . .	87

Mobile GIS Requirements . . . . .	88
Mobile Field Devices . . . . .	88
Important Parameters for Selecting Field Devices . . . . .	89
Key Features of Mobile GIS . . . . .	89
Specific Applications . . . . .	90
Limitations of Mobile GIS . . . . .	90
Challenges of Mobile GIS . . . . .	90
Changes in the Location of Human Activities . . . . .	91
Changes in the Character of Activities . . . . .	91
Challenges in the Way Such Activities Are Organized and Coordinated . . . . .	92
Future of Mobile GIS . . . . .	92
Location-Based Services . . . . .	93
Introduction . . . . .	93
Contributors to LBS . . . . .	93
Foundations for LBS . . . . .	94
LBS Architecture . . . . .	95
LBS Interfaces . . . . .	96
Classification of Location-Based Services . . . . .	97
Accuracy . . . . .	99
LBS Protocols . . . . .	100
LBS Applications . . . . .	100
LBS Applications and Future Developments . . . . .	101
Summary . . . . .	102
References . . . . .	102
<b>6 Geospatial Data Integration . . . . .</b>	<b>105</b>
Introduction . . . . .	105
Spatial Databases . . . . .	106
Spatial Database Design . . . . .	106
Data Quality . . . . .	108
Integrated Data Acquisition Systems . . . . .	109
Mobile-Mapping Systems . . . . .	109
Components of MMS . . . . .	109
Accuracy for MMS . . . . .	113
Sensor Networks . . . . .	113
Unmanned Aerial Vehicles (UAVs) . . . . .	116
Autonomous Underwater Vehicle Systems (AUVs) . . . . .	118
Data Products of Integrated Acquisition Systems . . . . .	120
Mobile-Mapping Data Products . . . . .	120
Sensor-Web Data Products . . . . .	120
UAV Data Products . . . . .	120
AUV-Data Products . . . . .	121
Summary . . . . .	121
References . . . . .	122

<b>7 GeoICT Standards</b> . . . . .	125
Introduction . . . . .	125
Standardization Initiatives . . . . .	126
Open Geospatial Consortium (OGC) . . . . .	126
Other OGC Standards . . . . .	132
Emerging Trends in GeoICT Standardization. . . . .	136
The ISO Standardization Efforts for Big Data . . . . .	136
The IHO Standardization Efforts for Hydrographic Data. . . . .	137
The IEEE Standardization Efforts for Networks and Hardware Technology . . . . .	139
W2 and W3 Standardization Efforts on Web Services . . . . .	141
Web 3D Standardization Efforts . . . . .	142
Summary . . . . .	142
References . . . . .	143
 <b>Appendix 1: UAV Image Processing Software.</b> . . . .	145
 <b>Index</b> . . . . .	147

Introduction to Geospatial Information and  
Communication Technology (GeoICT)

Abdalla, R.

2016, XXIII, 153 p. 54 illus. in color., Hardcover

ISBN: 978-3-319-33602-2
