

Contents

1	Fixed Point Results and Their Applications in Left Multivariate Fractional Calculus	1
1.1	Introduction	1
1.2	Convergence	2
1.3	Applications to Left Multivariate Fractional Calculus	5
	References	14
2	Fixed Point Results and Their Applications in Right Multivariate Fractional Calculus	17
2.1	Introduction	17
2.2	Convergence	18
2.3	Applications to Right Multivariate Fractional Calculus	21
	References	30
3	Semi-local Convergence of Iterative Procedures and Their Applications in k-Multivariate Fractional Calculus	31
3.1	Introduction	31
3.2	Convergence	32
3.3	Applications to k -Multivariate Fractional Calculus	35
	References	49
4	Newton-Like Procedures and Their Applications in Multivariate Fractional Calculus	51
4.1	Introduction	51
4.2	Semi-local Convergence	52
4.3	Applications to Multivariate Fractional Calculus	56
	References	62
5	Implicit Iterative Algorithms and Their Applications in Multivariate Calculus	63
5.1	Introduction	63
5.2	Semilocal Convergence	64

5.3	Application to Multivariate Calculus	68
	References	69
6	Monotone Convergence of Iterative Schemes and Their Applications in Fractional Calculus	71
6.1	Introduction	71
6.2	Semi-local Convergence	72
6.3	Applications to Fractional Calculus	75
	References	81
7	Extending the Convergence Domain of Newton's Method	83
7.1	Introduction	83
7.2	Convergence Analysis	87
7.3	Numerical Examples	89
	References	92
8	The Left Multidimensional Riemann–Liouville Fractional Integral.	93
8.1	Motivation	93
8.2	Main Results.	93
	Reference.	103
9	The Right Multidimensional Riemann–Liouville Fractional Integral.	105
9.1	Motivation	105
9.2	Main Results.	105
	Reference.	116

Intelligent Numerical Methods II: Applications to
Multivariate Fractional Calculus

Anastassiou, G.A.; Argyros, I.K.

2016, XII, 116 p., Hardcover

ISBN: 978-3-319-33605-3
