

Contents

1	Fundamentals of Absorption Refrigeration Systems.	1
1.1	Introduction	1
1.2	Absorption Process	2
1.3	Absorbents and Refrigerants	2
1.4	Classification of Absorption Refrigeration Systems.	4
1.5	Components of Absorption Refrigeration Systems	5
1.5.1	Generator	5
1.5.2	Absorber.	7
1.5.3	Condenser.	8
1.5.4	Evaporator	8
1.5.5	Pump	9
1.5.6	Expansion Valve	9
1.6	Operating Principle	10
1.7	Types of Absorption Refrigeration Systems.	10
1.7.1	Single Effect Absorption Refrigeration System.	11
1.7.2	Double Effect Absorption Refrigeration System.	12
1.7.3	Triple Effect Absorption Refrigeration System.	13
1.7.4	Multiple Effect Absorption Refrigeration System	15
1.8	Heat Sources.	17
1.9	Advantages and Disadvantages	18
1.10	Comparison with Other Cooling Systems	18
1.10.1	Solar PV Cooling System	19
1.10.2	Solar Thermoelectric Cooling System.	20
1.10.3	Thermomechanical Cooling System	21
1.10.4	Desiccant Cooling Systems	21
1.10.5	Adsorption Cooling System.	22
1.11	Absorption Heat Pumps	23
1.12	Closing Remarks	24

2	Thermodynamic Analysis	27
2.1	Introduction	27
2.2	Energy and Exergy Analyses	27
2.2.1	Pump	28
2.2.2	Generator	31
2.2.3	Condenser	33
2.2.4	Evaporator	35
2.2.5	Absorber	36
2.2.6	Expansion Valve	37
2.2.7	Coefficient of Performance	38
2.3	Exergoeconomic Analysis	39
2.4	Exergoenvironmental Analysis	41
2.4.1	Exergoenvironmental Impact Factor	41
2.4.2	Exergoenvironmental Impact Coefficient	42
2.4.3	Exergoenvironmental Impact Index	42
2.4.4	Exergoenvironmental Impact Improvement	42
2.4.5	Exergetic Stability Factor	43
2.4.6	Exergetic Sustainability Index	43
2.5	Optimization	44
2.6	Closing Remarks	46
	References	46
3	Single Effect Absorption Refrigeration System	47
3.1	Introduction	47
3.2	System Description	48
3.3	Energy and Exergy Analyses	49
3.4	Exergoeconomic Analysis	54
3.5	Exergoenvironmental Analysis	55
3.6	Optimization	56
3.7	Illustrative Example	56
3.8	Closing Remarks	69
4	Double Effect Absorption Refrigeration System	71
4.1	Introduction	71
4.2	System Description	72
4.3	Energy and Exergy Analyses	73
4.4	Exergoeconomic Analysis	81
4.5	Exergoenvironmental Analysis	82
4.6	Optimization	83
4.7	Illustrative Example	83
4.8	Closing Remarks	105
5	Triple Effect Absorption Refrigeration System	107
5.1	Introduction	107
5.2	System Description	108
5.3	Energy and Exergy Analyses	109

5.4	Exergoeconomic Analysis	119
5.5	Exergoenvironmental Analysis.	120
5.6	Optimization	121
5.7	Illustrative Example	121
5.8	Closing Remarks	148
6	Quadruple Effect Absorption Refrigeration System	149
6.1	Introduction	149
6.2	System Description	150
6.3	Energy and Exergy Analyses.	152
6.4	Exergoeconomic Analysis.	163
6.5	Exergoenvironmental Analysis.	164
6.6	Optimization Study	165
6.7	Illustrative Example	166
6.8	Closing Remarks	196
7	Integrated Absorption Refrigeration Systems: Case Studies	197
7.1	Introduction	197
7.2	Case Study 1: Geothermal-Based Power, Cooling, and Liquefied Hydrogen Generation System	197
7.3	Case Study 2: Solar-Based Integrated Absorption Refrigeration and Desalination System for Cooling and Fresh Water Production	207
7.4	Case Study 3: Geothermal-Based Multigeneration System.	219
7.5	Case Study 4: Geothermal-Based Integrated System for Standalone Building Needs	228
7.6	Closing Remarks	239
8	Developments in Absorption Refrigeration Systems	241
8.1	Introduction	241
8.2	Advanced Solar-Based Absorption Refrigeration Systems	242
8.3	Solid Oxide Fuel Cell-Based Multigeneration Systems	246
8.4	Biomass-Based Multigeneration Systems	248
8.5	Fossil Fuels-Based Multigeneration System.	251
8.6	Novel ARS-Based Combined Heating and Power Generation Systems	251
8.7	Novel ARS Designs.	253
8.8	Advanced Numerical and Optimization Studies of ARS	255
8.9	Novel Working Mixtures	256
8.10	Closing Remarks	257
	References	259
	Index	265

Integrated Absorption Refrigeration Systems

Comparative Energy and Exergy Analyses

Dincer, I.; Ratlamwala, T.A.H.

2016, XVII, 270 p. 108 illus., 34 illus. in color.,

Hardcover

ISBN: 978-3-319-33656-5
