1	Introduction	1
	Samiha A.H. Ouda and Abd El-Hafeez Zohry	
	References	3
2	Potential Evapotranspiration Under Present and Future Climate	5
	Mostafa Morsy, Tarek El-Sayed and Samiha A.H. Ouda	
	Introduction	6
	Selected Governorates	7
	Calculation of PET Values Under Present Climate	7
	Assessment of the Effect of Climate Change on PET Values	7
	CMIP5 Global Climate Models	9
	Statistical Analysis	10
	Willmott Index of Agreement (d-stat)	10
	Coefficient of Determination (R^2)	10
	Root Mean Square Error Per Observation (RMSE/Obs)	11
	The Averages of the Goodness of Fit Test	11
	WRF-RCM Model	13
	Projected Weather Data and PET Values in 2030	14
	Comparison Between Climate Normals and Its Values in 2030	16
	Comparison Between Normal and Future PET Values	19
	Conclusion	23
	References	23
3	Rain Fed Areas in Egypt: Obstacles and Opportunities	27
	Samiha A.H. Ouda, Tahany Noreldin and Alia Amer	
	Introduction	28
	Selected Governorates and Crops	30
	Current Situation of Rain Fed Areas in Egypt	31
	Values of Rain Fall	31
	Existing Crops Structure in the Studied Governorates	31
	Simulation of Crops Productivity in Rain Fed Area	32

Calibration of Yield-Stress Model for Prevailing Crops Structure in Rain Fed Area	33
Barley and Wheat	33
Olive, Peach and Fig Trees	34
Management Practices to Improve Productivity in Rain Fed Areas	35
Application of Supplementary Irrigation.	35
Use of Interplanting and Crop Rotation	36
Application of Manure as Fertilizer	37
Future of Rain Fed Agriculture in Egypt	37
Comparison Between Past and Future Annual Rain Fall	37
Projected Daily Rain Fall in 2029/30 Season	39
Assessment of the Reduction of Rain Fall on Crops Productivity	40
Adaptation of Crops Structure in Rain Fed Areas to Climate Change	42
Water and Land Productivity in Rain Fed Areas	43
Conclusion	44
References	45
4 Crops Intensification to Face Climate Induced Water Scarcity in Nile Delta Region.	47
Abd El-Hafeez Zohry and Samiha A.H. Ouda	
Introduction	48
The Selected Site	52
The Studied Crops	52
Calculation of Crops Water Requirements Using BISm Model	53
Suggested Crops Structure	53
Changing Crops Sequence	53
Intercropping in One Growing Season	55
Intercropping in Two Growing Seasons	57
Effect of Climate Change on Water Requirements of Crops Structure	57
Reduction of Climate Change Risk on the Selected Crops	58
Changing Crops Sequence	58
Intercropping in One Growing Season	58
Intercropping in Two Growing Season	60
Conclusion	60
References	61
5 Upper Egypt: Management of High Water Consumption Crops by Intensification	63
Abd El-Hafeez Zohry and Samiha A.H. Ouda	
Introduction	64
Sohag Governorate	65
Water Requirements Calculation for Crops Structures	66
Cultivation of Sugarcane Crop	67

Intercropping with Spring Sugarcane	68
Intercropping with Fall Sugarcane	69
Effect of Climate Change on Sugarcane Water Requirements	70
Prevailing and Suggested Crops Structure	71
Changing Crops Sequence	71
Intercropping in One Growing Season	73
Effect of Climate Change on Intercropping in One Growing Season . . .	74
Conclusion	75
References	75
6 Combating Deterioration in Salt-Affected Soil in Egypt	
by Crop Rotations	77
Samiha A.H. Ouda, Abd El-Hafeez Zohry and Hamdy Khalifa	
Introduction	78
The Selected Site	80
Cultivation of Sugar Beet Crop	80
Cultivation of Rice Crop	81
Cultivation of Cotton Crop	82
Suggested Crop Rotations	82
Calculation of Water Requirements for Each Crop Rotation	83
Description of the Suggested Crop Rotations	84
Suggested Crop Rotation Number (1)	84
Suggested Crop Rotation Number (2)	86
Suggested Crop Rotation Number (3)	88
Suggested Crop Rotation Number (4)	89
Suggested Crop Rotation Number (5)	91
Conclusion	93
References	93
7 General Conclusion	97
Samiha A.H. Ouda and Abd El-Hafeez Zohry	

Management of Climate Induced Drought and Water
Scarcity in Egypt

Unconventional Solutions

Ouda, S.A.H.; Zohry, A.E.-H.

2016, IX, 100 p. 30 illus., 25 illus. in color., Softcover

ISBN: 978-3-319-33659-6
