

Contents

Genome Editing with Targetable Nucleases	1
Stephane Pelletier	
CRISPR/Cas9 Approaches to Investigate the Noncoding Genome	31
Davide Seruggia and Lluís Montoliu	
At the Conflux of Human Genome Engineering and Induced Pluripotency	45
Knut Woltjen, Fabian Ocegüera-Yanez, Harunobu Kagawa, and Shin-Il Kim	
CRISPR/Cas9 and the Paradigm Shift in Mouse Genome Manipulation Technologies	65
Channabasavaiah B. Gurumurthy, Rolen M. Quadros, Masahiro Sato, Tomoji Mashimo, K.C. Kent Lloyd, and Masato Ohtsuka	
Genome-Editing Technology in CRISPR/Cas System: How to Increase Knock-In Efficiency in Mouse Zygotes.....	79
Takuro Horii and Izuho Hatada	
Developments in the Generation of Reporter Stem Cells.....	93
Samvel Avagyan, Kyle Sylakowski, and Uma Lakshmipathy	
Current Status of Genome Editing in Cardiovascular Medicine	107
Vittavat Termglinchan, Ioannis Karakikes, Timon Seeger, and Joseph C. Wu	
Using CRISPR-Cas9 Genome Editing to Enhance Cell Based Therapies for the Treatment of Diabetes Mellitus	127
Nicole A.J. Krentz and Francis C. Lynn	
Genome Editing in the Retina: A Case Study in CRISPR for a Patient-Specific Autosomal Dominant Retinitis Pigmentosa Model	149
Sally Justus, Andrew Zheng, Yi-Ting Tsai, Wen-Hsuan Wu, Chun-Wei Hsu, Wei-Pu Wu, Alexander G. Bassuk, Vinit B. Mahajan, and Stephen H. Tsang	
Index.....	163

Genome Editing

Turksen, K. (Ed.)

2016, IX, 166 p. 24 illus. in color., Hardcover

ISBN: 978-3-319-34146-0
