

Contents

1	Introduction and Preliminaries	1
1.1	Introduction	1
1.1.1	Linear Approximation Operators	1
1.1.2	Definitions of the Max-Product Operators	10
1.1.3	Main Characteristics of the Max-Product Operators	14
1.2	Preliminaries	19
1.2.1	Notes on Fuzzy Numbers	19
1.2.2	Notes on Possibility Theory	22
2	Approximation by Max-Product Bernstein Operators	25
2.1	Estimates for Positive Functions	25
2.2	Improved Estimates for Strictly Positive Functions	46
2.3	Saturation Results	68
2.4	Localization Results	75
2.5	Iterations and Fixed Points	83
2.6	Applications to Approximation of Fuzzy Numbers	98
2.6.1	Uniform Approximation and Preservation of Characteristics	99
2.6.2	L^1 -Approximation	113
2.7	Bivariate Max-Product Bernstein Operators	122
2.8	Applications to Image Processing	140
2.9	Notes	143
3	Approximation by Max-Product Favard–Szász–Mirakjan Operators	159
3.1	Non-Truncated Operators	159
3.2	Truncated Operators	174
4	Approximation by Max-Product Baskakov Operators	189
4.1	Non-Truncated Operators	189
4.2	Truncated Operators	211

5	Approximation by Max-Product Bleimann–Butzer–Hahn Operators	229
5.1	Quantitative Estimates	229
5.2	Shape Preserving Properties	241
6	Approximation by Max-Product Meyer–König and Zeller Operators	245
6.1	Estimates and Shape Preserving Properties	245
6.2	Saturation Results	260
6.3	Localization Results	268
6.4	Note	279
7	Approximation by Max-Product Interpolation Operators	281
7.1	Max-Product Hermite–Fejér Interpolation on Chebyshev Knots	281
7.2	Max-Product Lagrange Interpolation on Chebyshev Knots	289
7.3	Modified Max-Product Lagrange Interpolation on General Knots	299
7.4	Saturation Results for Equidistant Knots	305
7.5	Localization Results for Equidistant Knots	320
8	Approximations by Max-Product Sampling Operators	327
8.1	Max-Product Generalized Sampling Operators	327
8.2	Max-Product Sampling Operators Based on Sinc-Type Kernels	340
8.3	Saturation and Localization for Truncated Operators	355
8.3.1	The Saturation Order for the $T_n^{(M)}$ Operator	355
8.3.2	The Saturation Order for the $W_n^{(M)}$ Operator	359
8.3.3	Local Inverse Result for the $T_n^{(M)}$ Operator	360
8.3.4	Localization and Local Direct Result for the $T_n^{(M)}$ Operator	364
8.3.5	Localization, Local Inverse, and Local Direct Results for the $W_n^{(M)}$ Operator	369
8.4	Saturation and Localization for Non-Truncated Operators	370
8.4.1	Saturation for the Case of Fejér Kernel	370
8.4.2	Local Inverse Result for the Case of Fejér Kernel	375
8.4.3	Localization Results in the Case of Fejér Kernel	384
8.4.4	The Case of the Whittaker operator	388
8.5	Notes	392
9	Global Smoothness Preservation Properties	393
9.1	The Case of Max-Product Bernstein operator	394
9.2	The Case of Max-Product Hermite–Fejér Operator	400
9.3	The Case of Max-Product Lagrange Operator	403
10	Possibilistic Approaches of the Max-Product Type Operators	407
10.1	Bernstein-Type Approach in Possibility Theory	408
10.1.1	Max-Product Operators on $C_+[0, 1]$	408
10.1.2	Max-Product Operators on $UC_+[0, +\infty)$	411

- 10.2 Feller’s Scheme in Possibility Theory 416
 - 10.3 Approximation by Discrete Possibilistic
Convolution Operators 422
- 11 Max-Product Weierstrass Type Functions..... 429**
 - 11.1 Introduction..... 429
 - 11.2 Continuity and Non-differentiability Points 430
 - 11.3 Fractal Properties..... 443
- References..... 449**
- Index..... 457**

Approximation by Max-Product Type Operators

Bede, B.; Coroianu, L.; Gal, S.G.

2016, XV, 458 p. 12 illus., 1 illus. in color., Hardcover

ISBN: 978-3-319-34188-0
