

Contents

1	Introduction	1
1.1	Introduction	1
	References	2
2	Nanostructured Materials	3
2.1	General Considerations	3
2.2	Measurement of Crystallite Size	4
	References	5
3	Ball Milling	7
3.1	Introduction	7
3.2	Synthesis of Intermetallic Alloys	7
3.3	Metastable Phases	8
3.4	Effect of Milling on Hydrogenation Properties of Metal Hydrides	8
3.5	Conclusion	9
	References	9
4	High-Pressure Torsion	11
4.1	Description of the Technique	11
4.2	Strain	12
4.3	HPT Effects on Metal Hydrides	13
4.4	Conclusion	15
	References	15
5	Equal Channel Angular Pressing	19
5.1	Description of the Technique	19
5.2	Strain	19
5.3	Effect of Billet Rotation	20
5.4	ECAP Effects on Metal Hydrides	22
5.5	Conclusion	25
	References	25

6	Cold Rolling	27
6.1	Description of the Technique	27
6.2	Strain.	28
6.3	Accumulative Roll Bonding	28
6.4	CR Effects on Metal Hydrides.	29
6.4.1	Membranes for Hydrogen Purification	29
6.4.2	Alloys for Hydrogen Storage	30
6.5	Conclusion	35
	References	36
7	General Conclusion	39

Enhancing Hydrogen Storage Properties of Metal
Hybrides

Enhancement by Mechanical Deformations

Huot, J.

2016, VI, 39 p. 14 illus., 6 illus. in color., Softcover

ISBN: 978-3-319-35106-3
