

Contents

1	Time Series Methods	1
1.1	Stationarity Analysis	1
1.2	Recurrence Plots	2
1.3	Linear Detrending	2
1.4	Noise Reduction	3
1.5	Power Spectrum	3
1.6	Autocorrelation	4
1.7	Mutual Information	4
1.8	Noise 1/f and Random Walks	5
1.9	Fractal Dimension and Hurst Exponent	5
1.9.1	The Box-Dimension	5
1.9.2	The Hurst Exponent	6
1.10	Multifractals	7
1.11	False Nearest Neighbors	8
1.12	Lyapunov Spectrum	8
1.13	Daily Patterns	8
1.14	Time Series Clustering	10
1.14.1	The Exclusive Clustering	11
1.14.2	The Overlapping Clustering	11
1.14.3	The Hierarchical Clustering	12
1.14.4	The Probabilistic Clustering	12
1.14.5	Feature Based Clustering	13
1.14.6	Choosing the Number of Clusters	13
1.15	Conclusions	14
	References	15
2	Analysis of Solar Radiation Time Series	17
2.1	Energy from the Sun	17
2.2	The Solar Radiation Data Set	18
2.2.1	Stationarity Analysis	19
2.2.2	Autocorrelation and Mutual Information	20

2.2.3	Power Spectra	21
2.2.4	Hurst Exponent and Fractal Dimension.	22
2.2.5	Multifractal Analysis of Solar Radiation	24
2.2.6	Estimation of the Embedding Dimension	24
2.2.7	Maximal Lyapunov Exponent	25
2.3	Conclusions	26
	References	27
3	Analysis of Wind Speed Time Series.	29
3.1	Energy from the Wind	29
3.2	The Wind Speed Data Set.	30
3.3	Stationary Analysis	32
3.4	Autocorrelation and Mutual Information	33
3.5	Power Spectra	34
3.6	Hurst Exponent and Fractal Dimension.	36
3.7	Multifractal Spectrum.	38
3.8	Estimation of the Embedding Dimension	38
3.9	Lyapunov Exponents	39
3.10	Conclusions	40
	References	40
4	Prediction Models for Solar Radiation and Wind Speed Time Series	41
4.1	NARX Time Series Models	41
4.2	Multistep Ahead Prediction Models	42
4.3	EPS Time Series Models	42
4.4	Mapping Approximation.	43
4.4.1	The Neuro-Fuzzy Approach	44
4.4.2	The Feedforward Neural Network Approach	44
4.5	Assessing the Model Performances	45
4.5.1	Reference Models	45
4.6	Conclusions	46
	References	46
5	Modeling Hourly Average Solar Radiation Time Series	47
5.1	Introduction	47
5.2	Modeling Results.	48
5.2.1	Performances of the EPSNF Approach	48
5.2.2	Performances of the EPSNN Approach.	53
5.2.3	A Direct Comparison Between EPSNF and EPSNN.	56
5.2.4	Average Skill Index Considering the P_{24} Reference Model	57
5.3	Conclusions	58
	References	59

6	Modeling Hourly Average Wind Speed Time Series	61
6.1	Introduction	61
6.2	Considerations on the Choice of Model Parameters	61
6.3	Performances for All the Considered Stations	64
6.4	Conclusions	66
	References	66
7	Clustering Daily Solar Radiation Time Series	69
7.1	Two Features of Solar Radiation Time Series	69
7.1.1	The Area Ratio A_r Index	69
7.1.2	The GPH_r Index	70
7.2	Clustering Daily Patterns of Solar Radiation	71
7.3	Daily Pattern Shapes	72
7.3.1	Weight of a Solar Radiation Class	73
7.3.2	Permanence of a Solar Radiation Class	76
7.4	Conclusions	78
	References	78
8	Clustering Daily Wind Speed Time Series	79
8.1	Introduction	79
8.2	Two Features of Daily Wind Speed Time Series	79
8.3	The W_r Index	80
8.4	The Hurst Exponent of Daily Wind Speed	81
8.5	Clustering Wind Speed Daily Patterns	81
8.5.1	Stability of the Wind Speed Features	
	Cluster Centers	84
8.6	Some Applications	85
8.6.1	Weight of a Class	86
8.6.2	Permanence of Patterns in a Class	86
8.7	Conclusions	88
	References	89
9	Concluding Remarks	91
	Appendix A: Software Tools and Data	93
	Index	97

Nonlinear Modeling of Solar Radiation and Wind Speed
Time Series

Fortuna, L.; Nunnari, G.; Nunnari, S.

2016, XV, 98 p. 57 illus., 49 illus. in color. With online
files/update., Softcover

ISBN: 978-3-319-38763-5
