1	Introduction to Hazards and Factors that Affect Impacts on Global Societies	1
	References	5
2	Mitigation	7
2.1	Mitigation Defined	7
2.2	Preparedness	7
	Reference	8
3	Risk Assessment/Vulnerability	9
3.1	Risk Assessment Analysis	9
3.2	Role of Public Health	10
3.3	Risk Reduction Funding Shortfall	10
	References	11
4	Conditions that Aggravate the Effects of a Hazard Event on Citizens and Property	13
4.1	Location	13
4.2	Population Density	13
	Reference	14
5	Early Warning Systems (EWSs)	15
5.1	Alert to an Impending Disaster	15
5.2	Status of Selected EWSs	15
5.2.1	No EWS for Earthquakes	15
5.2.2	Extreme Weather EWS	16
5.2.3	Infectious Disease EWS	16
5.2.4	Pollution EWS May Be Problematic	17
5.2.5	EWSs Problems	17
	References	18

6 Damping the Dangers from Tectonics-Driven (Natural) Hazards: Earthquakes and Volcanoes.....	19
6.1 Tectonic Drive	19
7 Earthquakes.....	21
7.1 Prediction, Prevention	21
7.2 Precursors for Earthquakes Being Researched	22
7.2.1 The Gap Theory	22
7.2.2 Seismic Activity	23
7.2.3 Change in Water Levels	23
7.2.4 Anomalous Animal Activity	23
7.2.4.1 Prediction Successful, Prediction Unsuccessful.....	23
7.2.5 Strain Gauges	24
7.2.6 Radon Gas Concentration Change	24
7.3 Mitigation.....	24
7.3.1 The Earthquake Itself	24
7.3.2 Earthquake Triggered Hazards.....	26
7.3.2.1 Tsunamis	26
7.3.2.2 Landslides	27
7.3.2.3 Fires.....	28
7.3.2.4 Infectious Diseases.....	28
7.4 Preparedness	29
References.....	29
8 Volcanoes.....	31
8.1 Prediction, Prevention	31
8.2 Mitigation: The Volcano Itself	32
8.3 Volcanic Triggered Hazards (Mudflows, Fires, Flooding).....	32
8.4 Preparedness	33
Reference	34
9 Lessening the Impacts from Non-Tectonic (Natural) Hazards and Triggered Events	35
9.1 Floods.....	35
9.2 Mass Movements	36
9.2.1 Landslides	36
9.2.1.1 Observation and Measurements that Reveal Landslide Prone Regions	37
9.2.1.2 Human Activity that Can Cause Landslides	38
9.2.1.3 Protection Against Landslides.....	38
9.3 Avalanches: Mass Movements of Snow in Alpine Settings	39
9.3.1 Protection from Avalanches	40
9.4 Rockfalls	40
9.4.1 Conditions that Favor Rockfalls.....	40
9.4.2 Rockfall Prediction, Protection for Citizens	40

9.5	Subsidence	41
9.5.1	Cause of Subsidence	41
9.5.2	Mitigating Subsidence	41
9.5.3	Economic Problems from Subsidence	41
9.6	Collapse/Sinkholes.....	43
9.6.1	How Sinkholes Form	43
9.6.2	Minimizing Risk to Land Used for Housing and Development	43
9.6.3	Prediction/Mitigation	44
9.7	Health Hazards.....	45
9.7.1	Diseases.....	45
9.7.2	Mitigation.....	45
9.7.3	Preparedness	47
9.7.4	Diarrheal Diseases	48
9.7.5	Vaccines in Research Phases.....	48
9.8	Mental Stress.....	49
9.8.1	Mental Stress Evoked from Living Through Hazards	49
9.8.2	Principal Causes of Stress from Surviving a Killing, Destructive Hazard.....	49
	References.....	50
10	Magnified Impact of Natural Hazards from Global Warming/Climate Change and Inadequate Land-Use Planning.....	53
10.1	Global Warming/Climate Change	53
10.1.1	Sea Level Rise.....	54
10.1.2	Heat Waves.....	55
10.1.3	Drought	56
10.1.4	Wildfires.....	57
10.1.5	High Energy Storms (Hurricanes, Typhoons, Monsoons; Tornados, Cyclones).....	58
10.2	Hazards Triggered by Extreme Weather Events	59
10.2.1	Wind and Hail Damage.....	59
10.2.2	Flooding	59
	References.....	60
11	Disease.....	61
11.1	Vectors Expanding Reach in Latitude and Altitude	61
11.2	Humans as Vectors	62
	Reference	62
12	Natural Processes Linked to Climate Changes that Threaten Food Security	63
12.1	Soil Salinization	63
12.2	Desertification	63
	References.....	65

13 Land-Use Planning to Minimize Dangers to Citizens and Ecosystems.....	67
13.1 Planning to Protect People	67
13.2 Avoiding Hidden Dangers.....	67
13.3 Response to Known Radioactive Waste Storage Threats.....	68
13.4 Human/Ecosystem Protection in Planning for Massive Development Projects	69
13.4.1 International Road and Railway Projects in Africa.....	69
13.4.2 Proposed Large Scale Clean Renewable Electric Energy Projects for Africa	70
References.....	71
14 Physical Siting of Locations for Housing, Commerce, Industry, and Parkland	73
14.1 Avoidance Siting	73
14.2 Dam Siting for Hydroelectric and Reservoirs Purposes: A Special Concern	74
14.2.1 Examples of Dam Failures/Disasters from Lack of Thorough Geological Analysis	75
14.2.2 Some Human/Ecosystems Effects from Dam Emplacement	76
References.....	77
15 Pollution	79
15.1 Air	79
15.1.1 Indoor Air Pollution	79
15.1.2 Outdoor Air Pollution	80
15.2 Waterways.....	81
15.3 Soils.....	82
15.4 Oceans.....	82
15.4.1 Acidification.....	82
15.4.2 Overfishing.....	83
15.4.3 Oil Spills	83
15.4.4 Radioactivity	84
References.....	85
16 Mitigation of Hazard Impacts on Ecosystems and Their Inhabitants: Possible for Some, Not Possible for Others.....	87
16.1 Introduction.....	87
16.2 Migration of Life Forms	87
16.3 Ecosystem Contraction	88
16.4 Expansion of the Reach of Vector-Borne Diseases.....	88
16.5 Global Warming Role in Coastal Hazards and in Ocean Acidification.....	89
16.5.1 Coastal Hazards Intensified by Global Warming	89
16.5.2 Effects on Marine Ecosystems in Addition to Fish Migration.....	89

17 Mitigation of Impacts on Ecosystems and Their Inhabitants	
Directly from Human Activities	91
17.1 Introduction.....	91
17.2 Soil Damage from the Atmosphere: Mitigation and Reclamation.....	92
17.3 Dangerous Disposal of Pollutant-Bearing Wastes	92
17.4 Special Sources of Fluid Wastes: Acid Mine Drainage and Acid Rock Drainage	93
17.5 Tracking Down Sources of Contaminants That Invade Ecosystems.....	93
References.....	94
18 Mitigation Economics	95
18.1 Funding Limitations/Sources for Mitigation Projects.....	95
18.2 Benefits/Costs to Evaluate Targets for Investment in Mitigation Projects.....	96
18.2.1 Academic Exercise for Benefit/Cost Analysis	96
18.2.2 Real Life: One Dollar for Mitigation Yields Four Dollars Saved.....	97
18.3 Example of ‘Not Costs Only’ for Mitigation Project Decision Making	97
References.....	98
19 Insurance as a Mitigator of Post-Hazard Economic Stress:	
Coverage and Exclusions	101
19.1 Homeowners and Automobile Policies in the United States.....	102
19.1.1 Homeowners Policies.....	102
19.1.1.1 Wildfire Protection	102
19.1.2 Automobile Coverage	103
19.2 Tectonic Hazard Insurance.....	103
19.2.1 Earthquake Insurance.....	103
19.2.2 Volcano Insurance.....	104
19.3 Flood Insurance.....	105
19.4 Insurance Against Mass Movements.....	106
19.4.1 Against Landslide Damage/Destruction	106
19.4.2 Against Collapse/Sinkhole Loss	106
19.4.3 Against Subsidence Damage.....	107
19.5 Agricultural (Crop/Livestock) Insurance	107
19.6 Drought Insurance.....	108
19.6.1 For Other than Crop/Livestock Loss Protection	108
19.6.2 Associated Heat Waves	109
19.7 Extreme Weather Event Insurance	109
19.7.1 Against Windstorm Damage	109
19.7.2 Against Tornado Damage/Destruction.....	109

19.8	Pollution/Environmental/Workers Compensation	
	Liability Insurance	110
19.8.1	For Environmental Reclamation	110
19.8.2	To Protect Workers Against Harm	
	from Workplace Accidents	110
19.9	War/Conflict/Hijacking (Piracy) Insurance.....	111
19.9.1	For Protection Against Property Loss	111
19.9.2	Protection for the Transport Sector.....	111
	References.....	111
20	Conflicts/Wars: Human-Driven Events That Injure/Kill People	
	and Damage/Destroy Property	113
20.1	Extent of Conflict as an Anthropogenic Hazard	113
20.2	Population Displacement, A Human Disaster.....	114
21	Uncommon but Noteworthy Natural Hazards	115
21.1	Death by Asphyxiation from Lake Eruption	
	of a CO ₂ Laden Cloud.....	115
21.1.1	Mitigating the Threat of a Future Occurrence	116
21.2	Seiche: Infrequent Coastal Hazard at Lakes	
	or Partially Enclosed Bays	116
21.3	Occasional Food Security Disaster: Desert Locust Swarms	
	in a Regional Swath	116
21.3.1	Mitigation Programs	117
	References.....	117
	Epilogue	119
	Index	123

Mitigation of Dangers from Natural and Anthropogenic
Hazards

Prediction, Prevention, and Preparedness

Siegel, F.R.

2016, XIV, 127 p., Softcover

ISBN: 978-3-319-38874-8
