SPI in Regulated and Safety Critical Domains

Deriving Safety Case Fragments for Assessing MBASafe’s Compliance with EN 50128	3
<i>Barbara Gallina, Elena Gómez-Martínez, and Clara Benac Earle</i>	
Safety Critical Software Development – Extending Quality Management System Practices to Achieve Compliance with Regulatory Requirements	17
<i>Andrzej Beniamin Bujok, Silvana Togneri MacMahon, Fergal McCaffery, Dick Whelan, Bernard Mulcahy, and William J. Rickard</i>	
The Use of Maturity/Capability Frameworks for Healthcare Process Assessment and Improvement.	31
<i>Mehmet Söylemez and Ayca Tarhan</i>	
Software Process Improvement Roadmaps – Using Design Patterns to Aid SME’s Developing Medical Device Software in the Implementation of IEC 62304	43
<i>Peter Rust, Derek Flood, and Fergal McCaffery</i>	

Gamification and Education Issues in SPI

Coverage of ISO/IEC 12207 Software Lifecycle Process by a Simulation-Based Serious Game	59
<i>Alejandro Calderón and Mercedes Ruiz</i>	
A Gamification Approach to Improve the Software Development Process by Exploring the Personality of Software Practitioners	71
<i>Mert Yilmaz, Murat Yilmaz, Rory V. O’Connor, and Paul Clarke</i>	
A Simulation and Gamification Approach for IT Service Management Improvement	84
<i>Elena Orta and Mercedes Ruiz</i>	
Towards a Manifesto for Software Process Education, Training and Professionalism.	98
<i>Jørn Johansen, Ricardo Colomo-Palacios, and Rory V. O’Connor</i>	

SPI in Agile and Small Settings

A Maturity Model for Integrating Agile Processes and User Centred Design . . .	109
<i>Dina Salah, Richard Paige, and Paul Cairns</i>	
Analysis of Tools for Assessing the Implementation and Use of Agile Methodologies in SMEs.	123
<i>Mirna Muñoz, Jezreel Mejia, Brisia Corona, Jose A. Calvo-Manzano, Tomas San Feliu, and Juan Miramontes</i>	
Evaluation of Agility Assessment Tools: A Multiple Case Study.	135
<i>Onat Ege Adalı, Özden Özcan-Top, and Onur Demirörs</i>	
Exploring Processes in Small Software Companies: A Systematic Review . . .	150
<i>Nirnaya Tripathi, Elina Annanperä, Markku Oivo, and Kari Liukkunen</i>	

SPI and Assessment

Developing Process Definition for Financial and Physical Resource Management Process in Government Domain	169
<i>Ebru Gökalp and Onur Demirörs</i>	
A Nominal Group Interview Technique to Support Lightweight Process Assessments: Description and Experience Report	181
<i>Eduardo Miranda</i>	
The Issue of Reliability in Software Mediated Process Assessments.	195
<i>Anup Shrestha, Aileen Cater-Steel, Mark Toleman, Terry Rout, and Suren Behari</i>	
Towards a Process Capability Assessment Model for Government Domain. . .	210
<i>Ebru Gökalp and Onur Demirörs</i>	

SPI and Project Management Concerns

Measuring Global Distance: A Survey of Distance Factors and Interventions.	227
<i>John Noll and Sarah Beecham</i>	
MAMD: Towards a Data Improvement Model Based on ISO 8000-6X and ISO/IEC 33000.	241
<i>Ana G. Carretero, Ismael Caballero, and Mario Piattini</i>	
How to Integrate Risk Management in IT Settings Within Management Systems? Comparison and Integration Perspectives from ISO Standards. . . .	254
<i>Béatrix Barafort, Antoni-Lluís Mesquida, and Antònia Mas</i>	

A Learning Tool for the ISO/IEC 29110 Standard: Understanding the Project Management of Basic Profile	270
<i>Mary-Luz Sánchez-Gordón, Rory V. O'Connor, Ricardo Colomo-Palacios, and Sandra Sanchez-Gordon</i>	

Empirical Research Case Studies of SPI

The Role of Process in Early Software Defect Prediction: Methods, Attributes and Metrics	287
<i>Rana Ozakinci and Ayca Tarhan</i>	
An Empirical Study on Software Testing Practices in Automotive.	301
<i>Giuseppe Lami, Isabella Biscoglio, and Fabio Falcini</i>	
Empirically Derived Recommendations for Personalised Text-Based Technical Support	316
<i>Solomon Gizaw, Jim Buckley, and Sarah Beecham</i>	
SPI Sustainment Model Validation: Two Exploratory Case Studies	334
<i>Nazrina Khurshid and Paul L. Bannerman</i>	

Knowledge and Human Communications Issues in SPI

An Investigation of Software Development Process Terminology	351
<i>Paul Clarke, Antoni-Lluís Mesquida, Damjan Ekert, J.J. Ekstrom, Tatjana Gornostaja, Milos Jovanovic, Jørn Johansen, Antonia Mas, Richard Messnarz, Blanca Nájera Villar, Alexander O'Connor, Rory V. O'Connor, Michael Reiner, Gabriele Sauberer, Klaus-Dirk Schmitz, and Murat Yilmaz</i>	
Representing Software Process in Description Logics: An Ontology Approach for Software Process Reasoning and Verification	362
<i>Edward Kabaale, Lian Wen, Zhe Wang, and Terry Rout</i>	
A Behavior Tree-Based Model for Supporting the Analysis of Knowledge Transferred in Software R&D Teams.	377
<i>Alvaro Fernández Del Carpio</i>	
The Need for Obtaining Real Sponsor Satisfaction that Leads to Steady Generation of SPI Effects.	391
<i>Takeshige Miyoshi</i>	

Short Papers

Investigating the Suitability of Using Agile for Medical Embedded Software Development.	409
<i>Surafel Demissie, Frank Keenan, and Fergal McCaffery</i>	

Agile – Is it Suitable for Medical Device Software Development?	417
<i>Fergal McCaffery, Kitija Trektre, and Ozden Ozcan-Top</i>	
Using Enterprise SPICE in Very Small Entities.	423
<i>Linda Ibrahim, Ernest Wallmüller, and Wolfgang Daschner</i>	
Smart Requirements: How Smart Can They Get?	431
<i>Danilo Assmann</i>	
Current Challenges and Proposed Software Improvement Process for VSEs in Developing Countries	437
<i>Tatsuya Nonoyama, Lian Wen, and Terry Rout</i>	
Erratum to: Software Process Improvement and Capability Determination . . .	E1
<i>Paul M. Clarke, Rory V. O'Connor, Terry Rout, and Alec Dorling</i>	
Author Index	445

Software Process Improvement and Capability
Determination

16th International Conference, SPICE 2016, Dublin,
Ireland, June 9-10, 2016, Proceedings

Clarke, P.; O'Connor, R.V.; Rout, T.; Dorling, A. (Eds.)

2016, XII, 446 p. 72 illus., Softcover

ISBN: 978-3-319-38979-0
