

# Contents

<b>1</b>	<b>Synopsis</b>	<b>1</b>
<b>2</b>	<b>Towards Wave-like Approach</b>	<b>9</b>
2.1	Overview	9
2.2	Evolving Economic Systems	12
2.3	Methodological Framework	15
2.4	Pervasive Information Field (PIF) Concept	21
2.5	Wave-like Interaction Mechanism (WIM)	25
2.5.1	The Latent (Involuntary) Emission and Absorption Process	26
2.5.2	The Active (Voluntary) Emission and Absorption Process	27
<b>3</b>	<b>Oscillation-Based Social Simulation Paradigm: The Conceptual Premises</b>	<b>29</b>
3.1	General Outlines	29
3.2	The OSIMAS Paradigm: Basic Hypothesis, Assumptions, and Postulates	35
3.3	The Pervasive Information Field (PIF): Extended Conceptual Framework	39
3.4	Information Versus Order in the Case of Coherent Oscillations	44
3.5	Related Other Approaches	55
<b>4</b>	<b>From Baseline Individual to Social Neurodynamics: Experimental Framework</b>	<b>59</b>
4.1	Overview of the Related Research Scope	59
4.2	The OSIMAS Paradigm: Conceptual and Experimental Framework	62
4.3	EEG Experimental Setup: Cross-Correlation of Individual Mind States	65
4.4	Further Prospects	78

<b>5</b>	<b>Oscillations-Based Simulation of Human Brain EEG Signal Dynamics Using Coupled Oscillators Energy Exchange Model (COEEM)</b>	83
5.1	Neuroscience Context	84
5.2	The COEEM Setup and Phase-Locking Mechanism	86
5.3	COEEM Refind with Narrow Spectral Bands Superposition Approach	90
5.4	The Results of the COEEM Simulation for Short and Long Periods	92
5.5	Concluding Remarks	104
<b>6</b>	<b>Mind-Field States and Transitions: Quantum Approach</b>	107
6.1	Stylized Quantum States Model	109
6.2	Constraints and Conditions	115
<b>7</b>	<b>OAM Simulation Setup and Results Using Entropy and Free Energy Terms</b>	125
7.1	OAM in Terms of Free Energy and Negentropy	125
7.2	Bridging the Gap: Quantum Beats Approach	132
7.3	OAM Construction Framework	142
7.4	BMS as Dynamic Processes	154
7.5	Simulation Setup: Circadian Cycles Case	163
7.6	Simulation Results	173
<b>8</b>	<b>OAM-Based MAS: Collective Circadian Rhythms' Simulation Setup and Results</b>	197
8.1	OAM-Based MAS Construction Principles	197
8.2	Simulation Setup: Coherent Collective Circadian Cycles	206
8.3	Simulation Results	214
<b>9</b>	<b>Agent-Based Modeling of Excitable Social Media Fluctuations</b>	223
9.1	Overview	224
9.2	The Basic Model	227
9.3	Social Media Model Composed of Several Agent Groups	234
9.4	Propagation of Two Competing Signals in Populations of Agents	235
<b>10</b>	<b>Agent-Based Modeling of Fluctuations in Automated Trading Systems</b>	241
10.1	Introduction	241
10.2	Mimicking of Financial Times Series by Excitable Agent Media	244
10.3	Portfolio Management Rules in High-Dimensional Situations	249
10.4	Data Used and Its Preliminary Analysis	252
<b>11</b>	<b>Epilogue</b>	261

**Appendix A: Autopoietic Systems . . . . . 267**

**Appendix B: Global Workspace Theory . . . . . 281**

**Appendix C: Embodied and Distributed Cognition . . . . . 293**

**Appendix D: Cognition, Categorization, and Adaptive Resonance . . . . . 301**

**References . . . . . 311**

Introducing the Oscillations Based Paradigm

The Simulation of Agents and Social Systems

Plikynas, D.

2016, XXIV, 325 p. 97 illus., 16 illus. in color., Hardcover

ISBN: 978-3-319-39039-0
