

Contents

1	Bionanomaterials for the Skin: More than Just Size	1
	References.....	4
2	Skin, Genetic Defects, and Aging	7
2.1	The Skin.....	7
2.2	Genetic Defects in the Skin Barrier	10
2.3	Skin Aging	12
	References.....	13
3	Wound Healing and Skin Regeneration	17
3.1	Wound Care.....	18
3.2	Autograft Procedures	19
3.3	Wound Dressings	20
3.4	Delivery of Growth Factors to Wounds	21
3.5	Stem Cells for Skin Regeneration.....	22
	References.....	23
4	Transdermal and Topical Delivery to the Skin	27
4.1	Chemical Enhancers.....	30
4.2	Prodrug Approach	30
4.3	Formulation Approaches	31
4.4	Biochemical Enhancers.....	32
4.5	Enhancement Using Physical Methods.....	32
	References.....	33
5	Nanoparticles, Nanomaterials and Nanocarriers	37
5.1	Nanoemulsions.....	40
5.2	Liposomes and Related Nanostructures.....	40
5.3	Solid Lipid Nanoparticles	42
5.4	Dendrimers.....	43
5.5	Still to Address.....	43
	References.....	45

6	Bioavailability in Delivery to the Skin.....	47
	References.....	51
7	Lipid-Based Nanoparticles in Cosmetic and Pharmaceutical Products for the Skin	53
	References.....	59
8	Bionanomaterials with Antioxidant Effect for Skin Regeneration	61
	References.....	66
9	Nanochitosan and the Skin.....	69
9.1	Chitosan. Properties and Applications.....	69
9.2	Nanochitosan. Preparative Methods and Characterization.....	71
9.3	Loading Active Agents into Nanochitosan	73
	References.....	76
10	Nanocellulose.....	79
10.1	Types of Nanocelluloses. Preparation and Properties.....	79
10.2	Nanocellulose-Based Wound Dressings	82
10.3	Nanocellulose in Cosmetic Products for the Skin.....	85
	References.....	86
11	Bionanomaterials from Plant Sources.....	91
11.1	Phenolic Compounds from Plant Sources Delivered as Nanoparticles.....	91
11.2	Essential Oils Delivered in Nanostructures	94
11.3	Carbohydrates and Polysaccharides from Honey and Seaweed in Nanomedicines and Cosmetic Products for the Skin.....	95
11.4	Nanoparticles Containing Hops, Aloe, Coconut Oil and Other Ingredients from Plants	97
	References.....	99
12	Nanomaterials, Scaffolds, and Skin Tissue Regeneration	103
12.1	Biomaterials for Scaffolds and Skin Tissue	103
12.2	The Scaffolds	107
12.3	Skin Substitutes.....	109
	References.....	114
13	Peptide and Protein-Based Nanomaterials in Applications for the Skin	117
13.1	Growth Factors Delivered in Nanoparticles	118
13.2	Collagen, Elastin, Protease Inhibitors, Thrombin, DNA, and Stem Cells Delivered in Nanosized Carriers.....	120
13.3	Bacteriocins Delivered in Nanostructures	121
13.4	Silk Proteins in Nanostructures.....	122
13.5	Zein-Based Nanostructures.....	123
13.6	Melanin in Nanosize for the Skin	125
13.7	siRNA Delivered to the Skin.....	126
	References.....	127

14	Nanotoxicity and the Skin	131
	References	134
15	Ethical and Social Issues Linked to Using Nanomaterials in Skin Regeneration.....	135
	References	139
	Index.....	141

Bionanomaterials for Skin Regeneration

Leonida, M.D.; Kumar, I.

2016, XVIII, 144 p. 22 illus., 12 illus. in color., Softcover

ISBN: 978-3-319-39166-3
