

Contents

- 1 Introduction: Spacetime and Quantum Gravity** 1
 - 1.1 Quantum Gravity: What Is It and Why Do We Want It? 2
 - 1.1.1 Correspondence and Emergence 8
 - 1.2 Spacetime 11
 - 1.3 Motivations and Indications for the Breakdown of Spacetime . . . 13
 - 1.4 Quantum Gravity as a Physical Theory 15
 - 1.5 The Problem of Time 16
 - 1.6 The Recovery of Spacetime 19
 - 1.7 Two Transitions 20
 - 1.7.1 Decoherence 22
 - 1.8 Weinberg–Witten Theorem 26
 - 1.9 AdS/CFT Duality 27
 - 1.10 The World in a Grain of Sand 29
 - 1.11 Synopsis 30
 - References 34
- 2 Emergence and Reduction** 39
 - 2.1 Introduction 39
 - 2.2 Emergence 41
 - 2.2.1 Distinguishing in Principle from in Practice 43
 - 2.2.2 The Problem of Defining “Derivation” 44
 - 2.2.3 A Varied Landscape Where Less Is Different 45
 - 2.3 Emergence in Physics 46
 - 2.3.1 Reduction 47
 - 2.4 Emergence as Dependence Plus Novelty and Autonomy 50
 - 2.5 The Anderson/Weinberg Debate 53
 - 2.6 Fundamentality 55
 - 2.7 Conclusion 56
 - References 57

3	Effective Field Theory	59
3.1	Introduction	59
3.2	Quantum Field Theory and Renormalisation	60
3.3	Renormalisation Group and the Re-conceptualisation of QFT	64
3.3.1	Block-Spin RG	66
3.3.2	Fixed Points	68
3.4	Effective Field Theory	68
3.4.1	Basic Formalism	70
3.4.2	Appelquist-Carazzone Decoupling Theorem	71
3.5	Tower of Theories	72
3.5.1	Bottom-Up	72
3.5.2	Top-Down	74
3.5.3	Wilsonian Versus Continuum EFTs	75
3.6	Reconceptualising the Cutoff	76
3.7	Philosophy of EFT: Cao and Schweber (1993)	77
3.7.1	Epistemological Antifoundationalism	78
3.7.2	Final Theory	78
3.7.3	Methodological Antireductionism	80
3.7.4	Ontological Pluralism	83
3.7.5	Emergence: Quasi-Autonomous Domains	84
3.7.6	Emergence: Relations Between the Layers	86
3.8	EFT as Effective	87
3.8.1	Effective EFT and High-Energy Physics	88
3.8.2	Effective QFT	90
3.8.3	Axiomatic Quantum Field Theory	91
3.8.4	Underdetermination	93
3.8.5	Taking EFT Effectively	94
3.9	Conclusion: Emergence	96
	References	98
4	Universality, Higher Organising Principles and Emergence	101
4.1	Introduction	101
4.2	Multiple-Realisability and Universality	102
4.3	Higher Organising Principles	105
4.4	Universality and Emergence	106
4.5	Fixed Points and Critical Phenomena	107
4.6	Superconductors and Symmetry Breaking	112
4.7	Batterman's Account of Emergence	116
4.8	Morrison's Account of Emergence	117
4.9	Symmetry Breaking and Higher Organising Principles	119
4.10	Comparing the Accounts	120
4.11	Singularities, Limiting Relations and Emergence	124
4.12	Conclusion	125
