<b>1</b>	<b>Introduction</b>	1
	References	4
<b>2</b>	<b>Theoretical Concepts of Scanning Probe Microscopy and Dynamic Light Scattering and Their Relation to the Study of Peptide Nanostructures</b>	7
2.1	Introduction	7
2.2	Scanning Probe Microscopy	8
2.2.1	Tip-Surface Interactions	8
2.2.2	AFM Detection Modes	10
2.3	Dynamic Light Scattering (DLS)	21
2.4	Direct Imaging via AFM and Electron Microscopy Studies of A $\beta$ 1:42 and Their Findings	23
2.5	Conclusion	25
	References	26
<b>3</b>	<b>Alzheimer's Disease and the Aggregation of Amyloid <math>\beta</math></b>	31
3.1	Introduction	31
3.2	Symptoms and Diagnosis	32
3.3	Pathology and Physiology	33
3.4	Epidemiology of AD	34
3.5	Genetic Risk Factors Associated with AD	35
3.6	The Amyloid Precursor Protein	36
3.7	The Amyloid Cascade Hypothesis	39
3.8	Oligomers of A $\beta$ Are Likely to Be the Cause of AD Pathology	41
3.9	Counter Arguments of the Amyloid Cascade Hypothesis	43
3.10	Therapeutic Design for the Treatment of AD	44
3.11	Amyloidosis as the Causative Factor in a Wide Range of Diseases	45
3.12	Conclusions	46
	References	47

<b>4</b>	<b>Experimental Methodology</b>	53
4.1	Introduction	53
4.2	Materials and General Reagents	53
4.3	Nanomechanical Methods of SPM	54
4.3.1	Nanomechanical Mapping of Peptides and Proteins via Scanning Probe Microscopy	54
4.4	Spectroscopic Methods of SPM	60
4.5	SPM Image Processing and Tip Convolution	65
4.6	Identification of Amyloid $\beta$ by Classical Biomedical Techniques	65
4.6.1	Aggregation Conditions of Amyloid Peptides	65
4.6.2	Monitoring of Aggregation State Using Thioflavin T Assay	66
4.7	Dynamic Light Scattering	67
4.7.1	Calibration of DLS System Using Gold Nanoparticles	69
4.7.2	Experimental Setup for Temperature Dependent Measurements of LCST Compounds	69
4.7.3	Characterization of Peptide Inhibitor NanoParticle Liposomes Using DLS	69
4.7.4	Detection of A $\beta$ 1:40 and 1:42 Using DLS	69
4.8	Substrate Modification for the Attachment of Amyloid Proteins	70
4.8.1	Confirmation of A $\beta$ Attachment to the Substrate	70
4.9	Conclusion	71
	References	72
<b>5</b>	<b>Substrate Development of the Imaging of Amyloid Proteins with SPM Methods</b>	73
5.1	Introduction	73
5.2	Muscovite Mica as a Standard SPM Substrate	74
5.3	Incubation of A $\beta$ 1:42 in Volatile Buffers	75
5.4	Chemical Modification of the Mica Substrate	76
5.4.1	Incubation of Cleaved Mica with Divalent Ions	77
5.4.2	Poly Prep Slides	77
5.4.3	PLL-Mica	78
5.5	Confirmation that PLL Does not Interfere with Fibre Morphology	80
5.6	Confirmation of Attachment of A $\beta$ 1:42 to PLL Coated Mica	81
5.7	Conclusion	84
