

Contents

Designing and Developing Smart Environments

Towards Ubiquitous Services Design and Development Approach.	3
<i>Aicha Azoui and Djilali Idoughi</i>	
Exploring Design for Multi-device, Multi-environment and Multimodal Connected Experiences	15
<i>Himanshu Bansal, Sai Shruthi Chivukula, and Sanjay Ghosh</i>	
Investigating Low-Cost Wireless Occupancy Sensors for Beds	26
<i>Andreas Braun, Martin Majewski, Reiner Wichert, and Arjan Kuijper</i>	
User Interface Design for Ambient Assisted Living Systems.	35
<i>Caroline Byrne, Rem Collier, Michael O'Grady, and Gregory M.P. O'Hare</i>	
Establishing Guidelines for User Quality of Experience in Ubiquitous Systems	46
<i>Deógenes Pereira da Silva Junior, Patricia Cristiane de Souza, and Cristiano Maciel</i>	
Towards Big Data Interactive Visualization in Ambient Intelligence Environments	58
<i>Giannis Drossis, George Margetis, and Constantine Stephanidis</i>	
End-User Development Tools for the Smart Home: A Systematic Literature Review	69
<i>Daniela Fogli, Rosa Lanzilotti, and Antonio Piccinno</i>	
The Interaction Design Research About 3D Demo Animation in Smart Home	80
<i>Minggang Yang and Xiaofan Ma</i>	
A Formal Model for Context-Aware Semantic Augmented Reality Systems	91
<i>Tamás Matuszka, Attila Kiss, and Woontack Woo</i>	
How to Support the Design of User-Oriented Product-Related Services	103
<i>Maura Mengoni and Margherita Peruzzini</i>	
Design and Sensitive Configurations: Memory and Learning Neural Circuits Correlated with the Creative Processes in Design	111
<i>Leila Reinert</i>	
Data-Driven Smart Home System for Elderly People Based on Web Technologies	122
<i>Daeil Seo, Byounghyun Yoo, and Heedong Ko</i>	

A Unified Framework for Remote Collaboration Using Interactive AR Authoring and Hands Tracking	132
<i>Jeongmin Yu, Jin-u Jeon, Gabyong Park, Hyung-il Kim, and Woontack Woo</i>	

Game Design and Neuroscience Cooperation in the Challenge-Based Immersion in Mobile Devices as Tablets and Smartphones	142
<i>Rachel Zuanon</i>	

Tracking and Recognition Techniques in Ambient Intelligence

Exploring Machine Learning Object Classification for Interactive Proximity Surfaces	157
<i>Andreas Braun, Michael Alekseew, and Arjan Kuijper</i>	

Machine Learning and Location Fingerprinting to Improve UX in a Ubiquitous Application	168
<i>Rainara M. Carvalho, Ismayle S. Santos, Ricardo G. Meira, Paulo A. Aguiar, and Rossana M.C. Andrade</i>	

Exploring the Ergonomic Issues of User-Defined Mid-Air Gestures for Interactive Product Exhibition	180
<i>Li-Chieh Chen, Po-Ying Chu, and Yun-Maw Cheng</i>	

Facial Tracking-Assisted Hand Pointing Technique for Wall-Sized Displays . . .	191
<i>Haokan Cheng, Takahashi Shin, and Jiro Tanaka</i>	

3-Dimensional Face from a Single Face Image with Various Expressions. . . .	202
<i>Yu-Jin Hong, Gi Pyo Nam, Heeseung Choi, Junghyun Cho, and Ig-Jae Kim</i>	

User-Independent Face Landmark Detection and Tracking for Spatial AR Interaction	210
<i>Youngkyoon Jang, Eunah Jung, Sung Sil Kim, Jeongmin Yu, and Woontack Woo</i>	

Mid-Air Gestures for Virtual Modeling with Leap Motion	221
<i>Jian Cui, Dieter W. Fellner, Arjan Kuijper, and Alexei Sourin</i>	

Human Behavior in Smart Environments

Fashion Design and Tactile Perception: A Teaching/Learning Methodology to Enable Visually Handicapped People to Identify Textile Structures	233
<i>Geraldo Coelho Lima Júnior and Rachel Zuanon</i>	

Towards Effective Interventive Health Applications: On the Problem of User Triggering	245
<i>Tim Dutz, Augusto Garcia, Sandro Hardy, Stefan Göbel, and Ralf Steinmetz</i>	

Body Storytelling and the Performance of Memory: Arts-Based-Research and Human Enhancement.	257
<i>Maria Manuela Lopes</i>	
Voices of the Internet of Things: An Exploration of Multiple Voice Effects in Smart Homes	270
<i>Yohan Moon, Ki Joon Kim, and Dong-Hee Shin</i>	
Mental Model Development Using Collaborative 3D Virtual Environments . . .	279
<i>Ali Asghar Nazari Shirehjini, Farideh Soltani Nejad, Gazelle Saniee-Monfared, Azin Semsar, and Shervin Shirmohammadi</i>	
Effects of Playing Mobile Games While Driving.	291
<i>Cristian-Cezar Postelnicu, Octavian-Mihai Machidon, Florin Gîrbacia, Gheorghe-Daniel Voinea, and Mihai Duguleana</i>	
Emotions and Affect in Intelligent Environments	
Empirical Study of Humor Support in Social Human-Robot Interaction	305
<i>Lucile Bechade, Guillaume Dubuisson Duplessis, and Laurence Devillers</i>	
Laughter and Humour as Conversational Mind-Reading Displays	317
<i>Gary McKeown</i>	
Smart Bugs and Digital Banana Peels: Accidental Humor in Smart Environments?.	329
<i>Anton Nijholt</i>	
Ambient Scripts in Humor and Beyond	341
<i>Victor Raskin</i>	
Affect and Atmosphere in Controlled Responsive Environments	350
<i>Andreas Simon, Jan Torpus, Christiane Heibach, and Jose Navarro</i>	
Towards Simulation of Semantic Generation and Detection of Humorous Response	362
<i>Julia M. Taylor and Vitaliy L. Rayz</i>	
Infusing Humor in Unexpected Events.	370
<i>Alessandro Valitutti and Tony Veale</i>	
When Worlds and Scripts Collide	380
<i>Tony Veale</i>	
Smart Cities and Communities	
On Feasibility of Crowdsourced Mobile Sensing for Smarter City Life	395
<i>Kenro Aihara, Piao Bin, Hajime Imura, Atsuhiko Takasu, and Yuzuru Tanaka</i>	

Quantitative, Qualitative, and Historical Urban Data Visualization Tools for Professionals and Stakeholders.	405
<i>Cody Dunne, Carl Skelton, Sara Diamond, Isabel Meirelles, and Mauro Martino</i>	
Computational Community: A Procedural Approach for Guiding Collective Human Behavior Towards Achieving a Flourished Society.	417
<i>Kota Gushima, Tatsuya Aikawa, Mizuki Sakamoto, and Tatsuo Nakajima</i>	
Transcendent Telepresence: Tele-Communication Better Than Face to Face Interaction.	429
<i>Yuki Kinoshita, Masanori Yokoyama, Keita Suzuki, Takayoshi Mochizuki, Tomohiro Yamada, Sho Sakurai, Takuji Narumi, Tomohiro Tanikawa, and Michitaka Hirose</i>	
An Improvisation Based Framework for Interactive Urban Environments	439
<i>Kristian Kloeckl</i>	
Live Sound System with Social Media for Remotely Conducting Wildlife Monitoring.	450
<i>Hill Hiroki Kobayashi</i>	
User Participatory Sensing for Disaster Detection and Mitigation in Urban Environments	459
<i>Shin'ichi Konomi, Kazuki Wakasa, Masaki Ito, and Kaoru Sezaki</i>	
The Use of Historical Information to Support Civic Crowdsourcing.	470
<i>Tomoyo Sasao and Shin'ichi Konomi</i>	
One to Many: Opportunities to Understanding Collective Behaviors in Urban Environments Through Individual's Passively-Collected Locative Data	482
<i>Anthony Vanky, Theodore Courtney, Santosh Verma, and Carlo Ratti</i>	
Gamification and Social Dynamics: Insights from a Corporate Cycling Campaign.	494
<i>Matthias Wunsch, Agnis Stibe, Alexandra Millonig, Stefan Seer, Ryan C.C. Chin, and Katja Schechtner</i>	
Erratum to: Voices of the Internet of Things: An Exploration of Multiple Voice Effects in Smart Homes.	E1
<i>Yohan Moon, Ki Joon Kim, and Dong-Hee Shin</i>	
Erratum to: Mental Model Development Using Collaborative 3D Virtual Environments	E2
<i>Ali Asghar Nazari Shirehjini, Farideh Soltani Nejad, Gazelle Saniee-Monfared, Azin Semsar, and Shervin Shirmohammadi</i>	
Author Index	505

Distributed, Ambient and Pervasive Interactions
4th International Conference, DAPI 2016, Held as Part
of HCI International 2016, Toronto, ON, Canada, July
17-22, 2016, Proceedings
Streitz, N.; Markopoulos, P. (Eds.)
2016, XVI, 506 p. 177 illus., Softcover
ISBN: 978-3-319-39861-7
