

Contents

- 1 Prologue 1**
 - 1.1 Introduction..... 2
 - 1.2 Why Is ABM Necessary for Computing Digital Creativity?..... 4
 - 1.3 Digital Creativity and Its Relationship with Corporate Performance 6
- 2 Computational Aspects of ABM 9**
 - 2.1 Background 10
 - 2.2 Multiagents and MCNSS 12
 - 2.3 Role of Knowledge Base in MCNSS 13
 - 2.4 Designing MCNSS with NetLogo 14
 - 2.4.1 Basics 14
 - 2.4.2 S-Agent 15
 - 2.4.3 B-Agent..... 16
 - 2.4.4 Negotiation Mechanism 17
 - 2.5 Source Code Analysis of MCNSS 18
 - 2.6 Experimenting MCNSS Using a Sample Problem 20
 - 2.6.1 Sample Problem Description 20
 - 2.6.2 Simulation 26
- 3 Conceptual Backgrounds 33**
 - 3.1 Diversity..... 34
 - 3.2 Task Variety and Task Analyzability..... 35
 - 3.3 Exploration and Exploitation 36
 - 3.4 Organizational Culture 37
 - 3.5 Team Creativity 38
 - 3.6 Social Network Structure..... 39
- 4 DCSE (Digital Creativity Simulation Engine)..... 41**
 - 4.1 Design Logics 41
 - 4.2 Setup Parameters..... 51
 - 4.3 Output Analysis and Implications..... 54

5 Future into the Digital Creativity 59

Acknowledgment..... 63
