Contents

1 Introduction 1
1.1 Energy and Force Concepts. 1
1.1.1 Electric and Magnetic Fields and Forces in Nanotechnology. 2
1.1.2 Geometric Energy Concept 7
1.1.3 Nano-Energy. 9
1.2 Energy Sources 11
1.2.1 Fossil Energy Sources 12
1.2.2 Renewable Energy Sources 22
1.2.3 Nuclear Energy Sources 25
1.3 World's Present Energy Situation. 28
References 30

2 Future Energy Sources 33
2.1 Introduction 33
2.2 Renewable Energy Scenarios. 34
2.3 Research and Development of Biomass Energy 38
2.3.1 Introduction 38
2.3.2 Transportation Biofuels from Biomass 40
2.4 Water Energy and Power 47
2.5 Hydrogen Energy 48
2.6 Biogas Energy. 51
2.7 Algae Energy 56
2.7.1 Biodiesel Production from Algal Oil 58
2.7.2 Glycerol from Vegetable Oil for a Promising Carbon Source. 63
2.8 The Next Generation of Hybrid Transportation Vehicles. 65
References 67

3 Unconventional Energy Sources 71
3.1 Introduction 71
3.2 Waste Energy 73

3.2.1 Waste Heat Recovery by Cogeneration (COGEN or CHP) . . . 76
3.2.2 Waste Heat Recovery by Trigeneration or Combined Cooling, Heat and Power (CCHP) . . . 77
3.3 Energy Use . . . 79
3.3.1 Energy Use in Buildings, Transportation and Industry . . . 81
3.3.2 Energy Use in Energy and Power Systems . . . 83
3.4 Shaking Energy . . . 87
3.5 Squeezing Energy . . . 91
3.5.1 Introduction . . . 91
3.5.2 Energy Storage Systems . . . 93
3.6 Water Energy . . . 94
3.7 Inactive Energy Sources . . . 103
3.7.1 Introduction . . . 103
3.7.2 Geothermal Energy . . . 105
3.7.3 Natural Gas Hydrates . . . 107
3.8 Promising Energy Systems . . . 109
3.8.1 Introduction . . . 109
3.8.2 Hydrogen as a Future Promising Fuel . . . 109
3.8.3 Future Transportation Vehicles . . . 113
3.8.4 Energy from Boron . . . 115
3.8.5 Energy from Non-nuclear Metallic Fuels . . . 117
References . . . 118

4 Energy from Waste Materials and Unconventional Sources . . . 123
4.1 Introduction . . . 123
4.2 Wind Power Generation Using Shaking Energy . . . 125
4.3 Compressed Air Energy . . . 128
4.3.1 Introduction . . . 128
4.3.2 Compressed Air Powered Vehicles . . . 128
4.4 Water Forces and Water Energy . . . 130
4.5 Gas Hydrates as a Potential Future Energy Resource . . . 133
4.6 Biofuels from High Quality Microalgae . . . 138
4.7 Thermochemical Conversion Processes of Biomass to Hydrogen-Rich Gas Mixtures . . . 146
4.8 Biofuels from Sewage Sludge . . . 154
4.8.1 Biodiesel from Sewage Sludge . . . 154
4.8.2 Biogas from Sewage Sludge . . . 157
4.9 Biodiesel and Bioethanol from Unconventional Resources . . . 162
4.9.1 Biodiesel from Unconventional Resources . . . 162
4.9.2 Bioethanol from Unconventional Resources . . . 171
4.10 Gasoline-like Products from Plastic and Tire Wastes . . . 183
4.10.1 Gasoline-like Products from Plastic Wastes . . . 183
4.10.2 Gasoline-like Products from Tire Wastes . . . 188

4.11 Conversion of Oil Shale to Liquid Fuels 193
4.12 Conversion of Used Oils to Gasoline-like Products 196
4.13 Conversion of Heavy Oil to Light Products 204
4.14 Upgrading of Crude Oil and Heavy Oil 211
4.14.1 Introduction 211
4.14.2 Deposition and Flocculation of Asphaltenes from Petroleum 216
4.14.3 Removing of Resins from Petroleum 221
4.14.4 Dewaxing Processes of Petroleum 223
4.14.5 Sulfur Removal from Petroleum 227
4.15 Gasoline and Diesel Range Hydrocarbons from Waste Vegetable Oils 230
References 238

5 Optimization of Energy Systems 257
5.1 Optimization of Energy Conversion Processes 257
5.2 Waste Heat Utilization Facilities 259
5.3 Importance of Unconventional Energy Sources 263
5.4 Energy Economy 264
5.5 Energy Policy and Barriers 272

Waste Energy for Life Cycle Assessment

Demirbas, A.

2016, IX, 276 p. 63 illus., Hardcover
ISBN: 978-3-319-40550-6
