<b>Laudation at the AFSI 2014 Conference Banquet Celebrating Tayfun Tezduyar's 60th Birthday, Tokyo, Japan, March 2014.....</b>	<b>1</b>
Thomas J.R. Hughes	
<b>Part I CFD: Methods and Applications</b>	
<b>Numerical Comparison of the Particle Finite Element Method Against an Eulerian Formulation .....</b>	<b>7</b>
Juan M. Gimenez, Pedro Morin, Norberto Nigro, and Sergio Idelsohn	
<b>An Implicit Gradient Meshfree Formulation for Convection-Dominated Problems .....</b>	<b>25</b>
M. Hillman and JS. Chen	
<b>Flow Analysis of a Wave-Energy Air Turbine with the SUPG/PSPG Method and DCDD .....</b>	<b>39</b>
Lucio Cardillo, Alessandro Corsini, Giovanni Delibra, Franco Rispoli, and Tayfun E. Tezduyar	
<b>The Advection –Diffusion Analysis of Smoke Flows Around a Body .....</b>	<b>55</b>
Takashi Nomura, Hiroshi Hasebe, and Takehiro Kobayashi	
<b>Finite Element Computation of Buzz Instability in Supersonic Air Intakes .....</b>	<b>65</b>
V.M. Krushnrao Kottedda and Sanjay Mittal	
<b>SUPG/PSPG Computational Analysis of Rain Erosion in Wind-Turbine Blades .....</b>	<b>77</b>
Alessio Castorini, Alessandro Corsini, Franco Rispoli, Paolo Venturini, Kenji Takizawa, and Tayfun E. Tezduyar	
<b>The Multi-Moment Finite Volume Solver for Incompressible Navier-Stokes Equations on Unstructured Grids.....</b>	<b>97</b>
Bin Xie and Feng Xiao	

<b>An Immersogeometric Method for the Simulation of Turbulent Flow Around Complex Geometries .....</b>	<b>111</b>
Fei Xu, David Kamensky, Vasco Varduhn, Chenglong Wang, Sean A. Wason, Bryann Sotomayor-Rinaldi, Carolyn N. Darling, Dominik Schillinger, and Ming-Chen Hsu	
 <b>Part II   CFD: Moving Boundaries and Interfaces</b>	
<b>Numerical Simulation of the Behavior of a Rising Bubble by an Energy-Stable Lagrange-Galerkin Scheme .....</b>	<b>129</b>
Masahisa Tabata	
<b>A Numerical Review of Multi-Fluid SPH Algorithms for High Density Ratios .....</b>	<b>139</b>
Jan-Philipp Fürstenau, Bircan Avci, and Peter Wriggers	
<b>Self-Propulsion of a Killifish from Impulsive Starts .....</b>	<b>151</b>
Yoichi Ogata and Takayuki Azama	
<b>New Directions in Space–Time Computational Methods .....</b>	<b>159</b>
Kenji Takizawa and Tayfun E. Tezduyar	
 <b>Part III   CFD: Phase-Field Modeling</b>	
<b>Interfacial Instability of a Non-magnetized Drop in Ferrofluids Subjected to an Azimuthal Field: A Diffuse-Interface Approach .....</b>	<b>181</b>
Ching-Yao Chen and Ting-Shiang Lin	
<b>Numerical Analysis of Backward Erosion of Soils by Solving the Darcy–Brinkman Equations .....</b>	<b>193</b>
Kazunori Fujisawa	
<b>A Diffuse Interface Model for Incompressible Two-Phase Flow with Large Density Ratios .....</b>	<b>203</b>
Yu Xie, Olga Wodo, and Baskar Ganapathysubramanian	
<b>Isogeometric Phase-Field Simulation of Boiling .....</b>	<b>217</b>
Ju Liu and Thomas J.R. Hughes	
 <b>Part IV   Computer Science and HPC Aspects</b>	
<b>How to Generate Effective Block Jacobi Preconditioners for Solving Large Sparse Linear Systems .....</b>	<b>231</b>
Yao Zhu and Ahmed H. Sameh	
<b>Parallel Analysis System for Fluid–Structure Interaction with Free-Surfaces Using ADVENTURE_Solid and LexADV_EMPS .....</b>	<b>245</b>
Naoto Mitsume, Tomonori Yamada, Shinobu Yoshimura, and Kohei Murotani	

<b>A Review on Fast Quasi-Newton and Accelerated Fixed-Point Iterations for Partitioned Fluid–Structure Interaction Simulation</b> .....	257
David Blom, Florian Lindner, Miriam Mehl, Klaudius Scheufele, Benjamin Uekermann, and Alexander van Zuijlen	
<b>Rhino 3D to Abaqus: A T-Spline Based Isogeometric Analysis Software Framework</b> .....	271
Yicong Lai, Lei Liu, Yongjie Jessica Zhang, Joshua Chen, Eugene Fang, and Jim Lua	
<b>A Multithreaded Recursive and Nonrecursive Parallel Sparse Direct Solver</b> .....	283
Ercan Selcuk Bolukbasi and Murat Manguoglu	
<b>Part V Mathematical Methods</b>	
<b>Macroscopic First Order Models of Multicomponent Human Crowds with Behavioral Dynamics</b> .....	295
N. Bellomo, S. Berrone, L. Gibelli, and A.B. Pieri	
<b>Energy Inequalities and Outflow Boundary Conditions for the Navier–Stokes Equations</b> .....	307
Norikazu Saito, Yoshiki Sugitani, and Guanyu Zhou	
<b>Numerical Studies on the Stability of Mixed Finite Elements Over Anisotropic Meshes Arising from Immersed Boundary Stokes Problems</b> .....	319
Ferdinando Auricchio, Franco Brezzi, Adrien Lefieux, and Alessandro Reali	
<b>Stabilized Lagrange–Galerkin Schemes of First- and Second-Order in Time for the Navier–Stokes Equations</b> .....	331
Hirofumi Notsu and Masahisa Tabata	
<b>Part VI Biomedical Applications</b>	
<b>On Three-Dimensional ALE Finite Element Model For Simulating Interstitial Medium Deformation in the Presence of a Moving Needle</b> .....	347
Yannick Deleuze, Marc Thiriet, and Tony W.H. Sheu	
<b>Time-Dependent Outflow Boundary Conditions for Blood Flow in the Arterial System</b> .....	359
JaeHyuk Kwack, Soonpil Kang, Geetha Bhat, and Arif Masud	
<b>A Geometrical-Characteristics Study in Patient-Specific FSI Analysis of Blood Flow in the Thoracic Aorta</b> .....	379
Hiroshi Suito, Kenji Takizawa, Viet Q.H. Huynh, Daniel Sze, Takuya Ueda, and Tayfun E. Tezduyar	

<b>Particle Method Simulation of Thrombus Formation in Fontan Route</b> ....	387
Ken-ichi Tsubota, Koichi Sugimoto, Kazuki Okauchi, and Hao Liu	
<b>Computational Study of Aortic Hemodynamics: From Simplified to Patient-Specific Geometries</b> .....	397
A. Lefieux, F. Auricchio, M. Conti, S. Morganti, A. Reali, S. Trimarchi, and A. Veneziani	
<b>An Image-Based Computational Framework for Analyzing Disease Occurrence and Treatment Outcome in Patients with Peripheral Arterial Disease</b> .....	409
Shaolie S. Hossain	
 <b>Part VII Fluid–Structure Interaction</b>	
<b>Modal Analysis of Liquid–Structure Interaction</b> .....	423
Roger Ohayon and Jean-Sébastien Schotté	
<b>A Fluid–Structure Interaction Algorithm Using Radial Basis Function Interpolation Between Non-Conforming Interfaces</b> .....	439
Simone Deparis, Davide Forti, and Alfio Quarteroni	
<b>Elasto-Capillarity Simulations Based on the Navier–Stokes–Cahn–Hilliard Equations</b> .....	451
E.H. van Brummelen, M. Shokrpour-Roudbari, and G.J. van Zwieten	
<b>Fluid–Structure Interaction Modeling and Isogeometric Analysis of a Hydraulic Arresting Gear at Full Scale</b> .....	463
Ming-Chen Hsu, Chenglong Wang, Michael C.H. Wu, Fei Xu, and Yuri Bazilevs	
<b>Finite-Element/Boundary-Element Coupling for Inflatables: Effective Contact Resolution</b> .....	477
T.M. van Opstal	
<b>Recent Advances in Fluid–Structure Interaction Simulations of Wind Turbines</b> .....	489
A. Korobenko, X. Deng, J. Yan, and Y. Bazilevs	

Advances in Computational Fluid-Structure Interaction  
and Flow Simulation

New Methods and Challenging Computations

Bazilevs, Y.; Takizawa, K. (Eds.)

2016, XII, 500 p. 193 illus., 158 illus. in color.,

Hardcover

ISBN: 978-3-319-40825-5
