1	Introduction	1
1.1	Trauma: A Worldwide Epidemic	1
1.2	Physical Trauma	2
1.3	Responses to Physical Trauma	3
1.3.1	The Historical Timeline of Systematic Trauma Management	3
1.4	Toxic Trauma	6
1.5	The Epidemiology of Toxic Trauma	7
1.6	The Clinical Importance of Toxic Trauma	8
1.7	Approaches to Trauma Management	9
1.8	Conclusion	9
	Further Reading	10
2	Toxic Trauma: A Historical Perspective	11
2.1	Exposure to Chemicals From Early Times to the Nineteenth Century	11
2.2	The Industrial Revolution and the Development of Mass Chemical Warfare	13
2.3	First Suggested Uses of Chemical Weapons in the Nineteenth Century	15
2.4	The First World War	15
2.5	Between the World Wars	18
2.5.1	The 1930s: First Systematic Use of Chemical Warfare Agents Against Civil Populations	18
2.6	The Second World War	19
2.6.1	The Secret Development of Nerve Agents	20
2.7	The Cold War Period	21
2.8	Continued Military Use of Chemical Warfare Agents	21
2.9	Mass Accidental Release of Toxic Industrial Chemicals	22
2.10	Conclusions	22
	Further Reading	23

3	The Classification and Properties of Toxic Hazards	25
3.1	Introduction	25
3.2	Toxic Hazards: Definitions	26
3.3	Acute and Chronic Toxic Hazards	26
3.4	The Classification of Toxic Hazards	27
3.4.1	Toxic Industrial Chemicals	27
3.4.2	Military Toxic Hazards: Agents of Chemical Warfare	28
3.5	Classification of Toxic Hazards According to Their Effects on Body Systems	29
3.5.1	Central Nervous System	30
3.5.2	Peripheral Nervous System	30
3.5.3	Respiratory System	30
3.5.4	Heart and Central Vascular System	31
3.5.5	Alimentary System	31
3.5.6	Skin and Epithelial System	31
3.6	Properties of Toxic Chemical Agents	32
3.6.1	Physical Properties of Toxic Chemical Agents	32
3.6.2	Persistency	34
3.6.3	Toxicity	36
3.6.4	Latency	45
3.7	Conclusions	47
	Further Reading	47
4	Exposure to Toxic Hazards	49
4.1	Introduction	49
4.2	Acute and Chronic Exposures	50
4.3	Routes of Exposure to Toxic Agents	50
4.3.1	Inhalation	50
4.3.2	Skin and Mucous Membranes	51
4.3.3	Ingestion	52
4.3.4	Injection	52
4.3.5	Envenomation	52
4.4	Detection of Accidental and Deliberate Exposure to Toxic Chemical Agents	55
4.4.1	Military	55
4.4.2	Civil	56
4.4.3	Identification of a Toxic Release by Medical Responders	56
4.5	Mitigation of Exposure to Toxic Agents	57
4.6	Personal Protective Equipment	58
4.7	Decontamination	63
4.7.1	Decontamination Basics	63
4.7.2	Secondary Contamination	64

4.8	Conclusions	66
	Further Reading.	66
5	Responding to Chemical Releases: Essentials of Organisation and Incident Management	69
5.1	Introduction	69
5.2	Definitions	70
5.3	Identifying a Chemical Incident	70
5.3.1	Controlling the Release and Transmission of a Toxic Hazard	71
5.4	Important Points for Emergency Medical Personnel Responding to a Chemical Incident	73
5.4.1	Organisation	73
5.4.2	Recognition, Reconnaissance and Reporting of a Chemical Incident.	73
5.4.3	Reconnaissance	74
5.4.4	Approaching the Incident: Key Actions.	74
5.5	Clinical Operations Within a Chemical Incident	75
5.6	Triage	76
5.7	Decontamination in the Warm Zone	77
5.8	Transfer to Hospital	78
5.9	Incident Documentation	79
5.10	Debriefing and Feedback	80
5.11	Planning for Toxic Incidents.	80
5.12	New Directions in the Management of Toxic Trauma: An Example Developed by the International Committee of the Red Cross and Red Crescent	81
5.12.1	Introduction	81
5.12.2	Objectives and Rationale of Chemical Agent Management Within the International Committee of the Red Cross and Red Crescent Societies	82
5.12.3	Specific Elements of the ICRC Chemical Response Initiative.	83
5.13	Conclusions	89
	Further Reading.	90
6	The Pathophysiology of Toxic Trauma	91
6.1	Introduction	91
6.2	Targets for Toxic Trauma	92
6.3	Toxic Trauma to the Nervous System.	92
6.3.1	The Function of the Cholinergic Nervous System.	93
6.3.2	Toxic Disruption of the Cholinergic Nervous System.	101

6.3.3	Actions of Toxins on the Peripheral Nervous System.	105
6.3.4	Non-cholinergic Toxic Trauma of the Central Nervous System.	105
6.4	Pathophysiology of Toxic Trauma of the Respiratory System	106
6.4.1	Mechanisms Leading to Hypoxia.	106
6.4.2	Mechanisms Underlying the Development of Toxic Pulmonary Oedema and Acute Respiratory Distress Syndrome	111
6.5	Asphyxiant Agents	113
6.5.1	Active Asphyxiants	113
6.6	Toxic Trauma to the Heart and Vascular System	114
6.7	Toxic Trauma to the Alimentary System	115
6.7.1	Direct Effects.	115
6.7.2	Indirect Effects.	115
6.8	Toxic Trauma to the Skin and Epithelial Systems	115
6.8.1	Corrosive Chemical Agents	115
6.8.2	Vesicant Agents.	116
6.9	Toxic Trauma to the Blood and Haemopoetic System	117
6.10	Conclusions	117
	Further Reading.	118
7	The Clinical Presentation of Toxic Trauma: Assessment and Diagnosis.	119
7.1	Introduction	119
7.2	Clinical History.	120
7.2.1	Circumstances of the Incident	120
7.2.2	Systemic History	121
7.3	Physical Examination	121
7.3.1	Assessing the Patient: Initial Steps	122
7.4	Triage of Multiple Toxic Casualties	122
7.5	Main Presenting Signs and Symptoms Following Toxic Trauma	124
7.5.1	Nervous System.	124
7.5.2	Respiratory System	126
7.5.3	Heart and Vascular System	128
7.5.4	Skin and Mucous Membranes	128
7.6	Toxidromes.	128
7.6.1	The Nature of Toxidromes.	129
7.6.2	Classical Toxidromes.	129
7.6.3	Cholinergic Toxidromes.	130
7.6.4	Incapacitating Agent Toxidromes.	136
7.6.5	Chemical Asphyxiant Toxidrome.	137
7.6.6	Lung-Damaging Agent Toxidrome	137

7.6.7	Irritant Agent (Riot-Control Agent) Toxidrome	138
7.6.8	Vesicant Agent and Corrosive Substances Toxidromes	139
7.7	Conclusions	140
	Further Reading.	140
8	The Treatment of Toxic Trauma	141
8.1	Introduction	141
8.2	Life-Support Measures	142
8.2.1	Airway Management	142
8.2.2	Options for Ventilation in Emergency	143
8.2.3	Circulation.	146
8.3	Specific Treatment Measures for Toxic Trauma	147
8.3.1	Management of Nerve Agent Exposure	147
8.3.2	Management of Incapacitating Agent Exposure	153
8.3.3	Management of Cyanide Agent Exposure	154
8.3.4	Carbon Monoxide	159
8.4	The Management of Lung-Damaging Toxic Trauma	159
8.4.1	General Considerations	159
8.4.2	Reactive Treatment	160
8.4.3	Proactive Treatment.	162
8.5	The Management of Toxic Trauma from Vesicant Agents	165
8.5.1	Clinical Management of Mustard Gas Casualties.	166
8.6	Management of Exposure to Riot Control Agents.	168
8.7	Conclusions	169
	Further Reading.	170
9	The Longer-Term Consequences of Toxic Trauma.	171
9.1	Introduction	171
9.2	Central Nervous System	172
9.2.1	Organophosphates	172
9.2.2	Incapacitating Agents.	172
9.3	Peripheral Nervous System.	173
9.3.1	Development of the Acute Cholinergic Syndrome	173
9.3.2	Intermediate Syndrome	173
9.3.3	Organophosphate-Induced Delayed Neuropathy.	176
9.4	Longer-Term Effects of Toxic Agent Exposure on the Respiratory System	176
9.4.1	Management of Toxic Pulmonary Oedema	177
9.5	Long-Term Respiratory Conditions Following Exposure to Lung-Damaging Agents	178
9.6	Long-Term Effects of Exposure to Mustard Gas.	178
9.7	Conclusions	179
	Further Reading.	179

10	Preparing for Toxic Trauma	181
10.1	Introduction	181
10.2	The Risk of a Toxic Chemical Agent Release	182
10.3	Key Medical Lessons Learned from Previous Releases of Toxic Chemical Agents	183
10.3.1	World War I	183
10.3.2	1936: Italian Use of Mustard Gas in Abyssinia	184
10.3.3	Use of Nerve Agents and Mustard Gas in the Iran–Iraq War	184
10.3.4	Chemical Attack Against Civilians in Hallabja, Kurdistan	184
10.3.5	1994–1995: Terrorist Sarin Attacks in Matsumoto and Tokyo, Japan	186
10.3.6	2002: The Moscow Theatre Incident	188
10.3.7	1984: Accidental Release of Methyl Isocyanate, Bhopal, India	190
10.3.8	Chemical Attacks on Civilians During the Syrian Civil War	192
10.4	Responding to the Hazards of Toxic Trauma	196
10.4.1	Planning and Preparation	196
10.5	Conclusions	197
	Further Reading (update)	198
11	Toxins	199
11.1	Introduction	199
11.2	Definitions and the Natural History of Toxins	200
11.3	Classification	200
11.4	Actions of Toxins in Humans	200
11.5	Use of Toxins as Research Tools	201
11.6	Toxins and Toxoids	201
11.7	Toxicity	201
11.8	Comparison of Toxins with Chemical Warfare Agents	202
11.9	Toxin Release: Factors Affecting Practical Toxicity	202
11.10	Hazards and Threats: The Deliberate Release of Toxins for Harmful Purposes	203
11.11	Neurotoxin Hazards	204
11.12	DNA Toxin Hazards	205
11.13	Applied Toxicity of Toxins	205
11.13.1	High-Risk Toxins	206
11.13.2	Medium-Risk Toxins	206
11.13.3	Low-Risk Toxins	206
11.13.4	Stability	207
11.14	Management of Deliberate Toxin Exposure	207
11.15	Conclusions	208
	Further Reading	208

12 Chemical, Biological, Radiological and Nuclear Hazards:	
An Overview and Comparison	209
12.1 Introduction: The Origins and History of the CBRN	
Classification.	210
12.1.1 The Scope of This Chapter	211
12.2 ‘Weapons of Mass Destruction’ in Perspective	212
12.3 A Brief Overview of Biological Agents of Warfare	
and Terrorism	213
12.3.1 Routes of Exposure to BW Agents	214
12.3.2 Recognising a BW Attack	215
12.3.3 Medical Prophylactic and Treatment Measures	
Against BW Agents.	216
12.3.4 The Importance of Latency in BW Agent	
Exposure	217
12.4 An Introduction to Radiation Injury	217
12.4.1 Ionising Radiation	217
12.4.2 Electromagnetic Radiation	219
12.4.3 Particle Radiation.	219
12.4.4 The Measurement of Radiation	220
12.4.5 Radioactivity	221
12.4.6 Key Points to Remember About Radiation	
and Radioactivity.	222
12.4.7 Exposure to Radiation and Radioactive	
Contamination: Prevention and Management.	222
12.4.8 Injury from Radiological and Nuclear Agents	224
12.4.9 The Trauma of Ionising Radiation.	224
12.5 Comparison of the Trauma Produced by Chemical,	
Biological, Radiological and Nuclear Agents	225
12.5.1 Physical Form	226
12.5.2 Persistency.	226
12.5.3 Toxicity	227
12.5.4 Latency	228
12.5.5 Protection and Decontamination	228
12.6 Conclusions	230
Suggestions for Further Reading	230
Appendices.	231
Index	235

Toxic Trauma

A Basic Clinical Guide

Baker, D.J.

2016, XXIII, 238 p. 42 illus., 27 illus. in color., Hardcover

ISBN: 978-3-319-40915-3
