

Contents

1	Nanotechnology and Its Drug Delivery Applications	1
1.1	Introduction.....	1
1.2	Historical Prospects of Nanotechnology.....	2
1.3	Promising Role in Drug Delivery	3
1.3.1	Nanoparticles and Drug Delivery	8
1.3.2	Use of NPs Formulation in Drug Delivery	9
1.3.3	Cellular and Intracellular Targets.....	11
1.3.4	The Brain—The Ultimate Target for Drug Delivery	12
1.4	Innovations in Nanotechnology	14
1.5	Nanotechnology Theory to Applications	16
1.6	Nanomedicine/Nanoscience/Nano-Engineering and Relationship with Drug Delivery	19
1.6.1	Nanomedicine and Drug Delivery	19
1.6.2	Nanoengineering and Drug Delivery	21
1.7	Types of Nanodelivery: Natural or Synthetic	23
1.7.1	Synthetic Polymers	23
1.7.2	Natural Polymers	23
1.8	Natural and Synthetic Polymeric Nanoparticles	24
	References.....	27
2	Nanoparticles Types, Classification, Characterization, Fabrication Methods and Drug Delivery Applications.....	33
2.1	Introduction.....	34
2.2	Classification of Nanoparticles	40
2.3	Characterization of Nanoparticles.....	40
2.3.1	Particle Size	40
2.3.2	Surface Charge	43
2.3.3	Surface Hydrophobicity	44
2.3.4	Drug Release.....	44

2.4	Preparation of Nanoparticles.....	44
2.4.1	Solvent Evaporation Method.....	45
2.4.2	Spontaneous Emulsification or Solvent Diffusion Method.....	46
2.4.3	Double Emulsion and Evaporation Method.....	46
2.4.4	Salting Out Method.....	46
2.4.5	Emulsions- Diffusion Method.....	47
2.4.6	Solvent Displacement/Precipitation Method.....	48
2.4.7	Coacervation or Ionic Gelation Method.....	48
2.4.8	Polymerization Method.....	49
2.4.9	Production of Nanoparticles Using Supercritical Fluid Technology.....	49
2.5	Most Favorable Requirements for Designing Therapeutic Nanoparticles.....	50
2.6	Types of Pharmaceutical Nanosystems.....	51
2.6.1	Carbon Based Structures.....	51
2.6.2	Fullerenes.....	53
2.6.3	Quantum Dots.....	54
2.6.4	Nanoshells.....	56
2.6.5	Nanobubbles.....	57
2.6.6	Paramagnetic Nanoparticles.....	58
2.6.7	Nanosomes.....	59
2.6.8	Pharmocyte.....	60
2.6.9	Dendrimers.....	61
2.6.10	Nanopores.....	64
2.6.11	Microbivores.....	65
2.6.12	Nanocrystals and Nanosuspension.....	65
2.6.13	Solid Lipid Nanoparticles.....	66
2.6.14	Silicon-Based Structures.....	67
2.6.15	Metallic Nanoparticles.....	68
2.6.16	Liposomes.....	68
2.6.17	Polymeric Micelles.....	69
2.6.18	Polymer Drug Conjugate.....	70
2.6.19	Polyplexes/Lipopolyplexes.....	70
2.6.20	Respirocytes.....	70
2.6.21	Polymeric Nanoparticles.....	71
2.6.22	Applications of Nanoparticulate Delivery Systems.....	73
2.6.23	Passive Targeting.....	74
2.6.24	Active Targeting.....	74
2.6.25	Tumor Targeting Using Nanoparticulate Delivery Systems.....	76
2.6.26	Long-Circulating and Target-Specific Nanoparticles.....	77
2.6.27	Nanoparticles for Oral Delivery of Peptides and Proteins.....	79
2.6.28	Nanoparticles for Gene Delivery.....	80

2.6.29	Nanoparticles for Drug Delivery into the Brain	81
2.6.30	Anthrax Vaccine Uses Nanoparticles to Produce Immunity	82
2.6.31	Stem Cell Therapy	83
2.6.32	Gold Nanoparticles Detect Cancer	83
2.7	Hazards and Toxicity Profile of Nanoparticles	85
2.7.1	Health Implication of Nanoparticles	85
	References	88
3	Natural Polymers vs Synthetic Polymer	95
3.1	Bioengineered Materials: Nano-Engines of Drug Delivery Systems	95
3.2	Polymeric Nanoparticles	96
3.3	Contemporary Methodologies for Fabrication of Polymeric Nanoparticles	97
3.4	Activation-Modulated Drug Delivery: Environmental Activation/Stimuli Responsive Smart Delivery System	98
3.5	Time to Move on Innovative Methods of Administration	100
3.6	History of Drug Delivery from the Ancient to Date	102
3.6.1	Historical Role of Polymers as Plastics	105
3.7	Shift from Nature to Synthetic (Including the Merits and Demerits of Synthetic Polymers)	106
3.7.1	Natural Polymers and Synthetic Polymers for Scaffolds	109
3.7.2	Natural vs Synthetic Polymer (as Biomaterial)	110
3.7.3	Natural vs Synthetic Polymer in Tissue Engineering	112
3.7.4	Natural vs Synthetic Polymer Hydrogels	113
3.8	Natural Polymers (Reasons for Reverting to Nature)	114
3.8.1	Need of Natural Polymers	115
3.8.2	Disadvantages of Herbal Polymers	116
	References	116
4	Plant Derived Polymers, Properties, Modification & Applications.....	119
4.1	Introduction	119
4.2	Sources of Plant Polymers	121
4.3	Methods of Extractions	124
4.3.1	Cold Extraction	124
4.3.2	Hot Extraction [Mild Acidic (EHA), Alkaline (EHB) and Radical Hydrolysis (EHR)]	125
4.3.3	Radical Hydrolysis (EHR)	125
4.3.4	Microwave Assisted Extraction (EM)	125
4.3.5	Ultrasonic Extraction (EU)	126
4.3.6	Enzymatic Hydrolysis (EE)	126
4.4	Chemical Composition Analysis	126
4.5	Physical Properties	126
4.5.1	Determination of Gelling Strength (GS)	126
4.5.2	Determination of Gelling Temperature (GT) and Melting Temperature (MT)	126

4.5.3	Viscosity Measurement (VS)	127
4.5.4	Molecular Mass Determination (MM).....	127
4.6	Physical-Chemical Modification of Plant Based Natural Polymers (PBNPS).....	127
4.6.1	Chemical Modifications of Plant Based Natural Polymers (PBNPS).....	128
4.6.2	Procedure for the Development of Microfibrillated Plant Based Polymers (MPBPS) by Physical Modification.....	134
4.6.3	Pre-treatment.....	138
4.6.4	Post-treatments.....	139
4.6.5	Dual Modifications.....	140
4.6.6	Ozonation.....	142
4.7	Genetic/Biotechnology Modification.....	143
4.8	Applications of Plant Based Polysaccharides	144
4.8.1	Cellulose	144
4.8.2	Hemicellulose	152
4.8.3	Starches	153
4.8.4	Pectin.....	154
4.8.5	Inulin	155
4.8.6	Rosin	156
4.8.7	Plant Based Gums	157
	References.....	164
5	Marine Polysaccharides Based Nano-Materials and Its Applications	185
5.1	Introduction.....	185
5.2	Polysaccharides Derived from Marine Sources	186
5.2.1	Marine Algae Based Polysaccharides	189
5.2.2	Marine Crustaceans Derived Polysaccharides	192
5.3	Nanomaterials Derived from Marine Sources	193
5.3.1	Nano Scaffolds Derived from Fucoidan	194
5.3.2	Alginate Nanoparticles.....	196
5.3.3	Carrageenan Based Nanoparticles	197
5.3.4	Agarose Nanoparticles	200
5.3.5	Porphyran Based Nanoparticles	201
5.3.6	Nanofibers of Ulvan	202
5.3.7	Mauran Based Nanoparticles	203
5.3.8	Chitin and Its Nanoparticles.....	203
5.3.9	Chitosan Based Nanoparticles	204
5.3.10	Chitooligosaccharide Based Nanoparticles.....	206
5.4	Marine Polysaccharide-Based Nanomaterials and Its Biomedical and Biotechnological Applications	208
5.4.1	Biomedical Applications of Marine Polysaccharides	208
5.4.2	Role of Marine Based Polysaccharides for Biotechnological Applications	212
5.5	Marine Polysaccharide-Based Nanomaterials and Its Patents	213
	References.....	213
