

Contents

1	General Introduction	1
1.1	Evolution of Thermochemical Heat Storage Systems	2
1.2	Emergence of Thermal Issues	6
1.3	Motivation of This Thesis	7
	References	11
2	State-of-Art of Thermochemical Heat Storage Systems	15
2.1	Short Review of Thermal Energy Storage System with Cogeneration System	15
2.2	Review of Thermochemical Heat Storage Systems	19
2.2.1	Absorption Systems	29
2.2.2	Adsorption Systems	31
2.2.3	Thermochemical Systems	34
2.3	Thermal Management and Chemical Reaction in Heat Storage Systems	43
2.3.1	Heat Transfer in the Material/Reactive Bed Process	44
2.3.2	Mass Transfer in the Material/Reactive Bed Process	45
2.3.3	Reaction/Sorption Kinetics	46
2.4	Conclusion	48
	References	49
3	Thermal Management Modeling in Thermo-Chemical Heat Storage Systems	59
3.1	Different Types of Chemical Reactors	59
3.2	Storage System Description	61
3.3	Heat Exchanger Investigations	64
3.3.1	Numerical Design and Modeling	65
3.3.2	Numerical Investigation Results	68
3.4	Kinetics Modeling	71

3.5	Heat and Mass Transfer Modeling	74
3.5.1	Hypothesis and Assumptions	74
3.5.2	Geometry Design	75
3.5.3	Mathematical Modeling	77
3.6	Comsol Multiphysics and Meshing	87
3.6.1	Reacting Flow in Porous Media (RFDS)	87
3.6.2	Heat Transfer in Porous Media (HT)	88
3.6.3	Non-isothermal Flow (NITF)	89
3.6.4	Meshing.	89
3.7	Conclusion	90
	References	91
4	Characterization of Thermal Transfers and Chemical Kinetics	95
4.1	Heat Transfer Characterization (Thermal Conductivity and Specific Heat Capacity)	95
4.1.1	Experimental Methods	97
4.2	Mass Transfer Characterization (Permeability).	107
4.2.1	Experimental Methods	108
4.3	Chemical Kinetics Analysis (Sorption and Reaction Rate).	111
4.4	Material Preparation.	113
4.5	Results, Analysis and Discussion.	114
4.5.1	Thermal Conductivity Results	114
4.5.2	Heat Capacity Results	122
4.5.3	Permeability Results	122
4.5.4	Chemical Kinetics Results	126
4.6	Conclusion	128
	References	130
5	Performance Analysis of the Thermochemical Heat Storage System	135
5.1	General Analysis	135
5.2	Numerical Investigations	136
5.2.1	Optimal Parameters Evaluation	137
5.2.2	Kinetics Analysis	139
5.2.3	Heat and Mass Transfer Results	142
5.2.4	Thermal Power and Efficiency	148
5.3	Experimental Investigations	152
5.3.1	Reactor Concept	152
5.3.2	Test Bench for the Lab-Scale Experiment.	153
5.3.3	Experimental Methodology.	156
5.4	Experimental Results	158
5.4.1	Cycle (Dehydration/Hydration) Test Number 4 Results . . .	159
5.4.2	The Global Cycle (Dehydration/Hydration) Test Results	164

- 5.5 Comparison Analysis Between Experimental and Numerical Results 167
 - 5.5.1 Model Validation and Discussion 167
- 5.6 Conclusion 171
- References 172
- 6 Conclusion and Guidelines 175**
 - References 179
- Appendix 181**

A Thermochemical Heat Storage System for Households
Combined Investigations of Thermal Transfers Coupled
to Chemical Reactions

Fopah Lele, A.

2016, XXIII, 202 p. 74 illus., 63 illus. in color., Hardcover

ISBN: 978-3-319-41227-6
