

# Contents

<b>1</b>	<b>Numerical Semigroups, the Basics</b>	<b>1</b>
1.1	Notable Elements	1
1.2	Numerical Semigroups with Maximal Embedding Dimension	11
1.3	Special Gaps and Unitary Extensions of a Numerical Semigroup	14
<b>2</b>	<b>Irreducible Numerical Semigroups</b>	<b>17</b>
2.1	Characterizations of Irreducible Numerical Semigroups	18
2.2	Decomposition of a Numerical Semigroup into Irreducible Semigroups.	24
2.3	Free Numerical Semigroups	26
<b>3</b>	<b>Semigroup of an Irreducible Meromorphic Series</b>	<b>31</b>
3.1	Some Notation	31
3.2	Characteristic Sequences.	32
3.3	Contact	48
3.4	The Local Case.	52
3.5	The Case of Curves with One Place at Infinity	59
<b>4</b>	<b>Minimal Presentations</b>	<b>69</b>
4.1	Generators and Relations	69
4.2	Free Numerical Semigroups	71
4.3	Graphs of Factorizations and Minimal Presentations.	72
4.4	Presentations and Binomial Ideals	76
4.5	Shaded Sets and Generating Functions	79
<b>5</b>	<b>Factorizations and Divisibility</b>	<b>85</b>
5.1	Length-Based Invariants	85
5.2	Distance-Based Invariants.	90

5.3 How Far Is an Irreducible from Being Prime . . . . . 92

5.4 Divisors and Feng–Rao Distances . . . . . 96

**References** . . . . . 101

**Index** . . . . . 105

Numerical Semigroups and Applications

Assi, A.; García-Sánchez, P.A.

2016, XIV, 106 p. 5 illus., Hardcover

ISBN: 978-3-319-41329-7
