

# Contents

<b>1</b>	<b>Picard's Theorems</b>	1
1.1	Borel–Carathéodory's Theorem	1
1.2	Schottky's Theorem	3
1.3	Picard's First Theorem	10
1.4	Picard's Second Theorem	11
<b>2</b>	<b>The Weierstrass Factorization Theorem</b>	15
2.1	Mittag-Leffler's Series	15
2.2	Infinite Products	19
2.3	Weierstrass' Products	21
<b>3</b>	<b>Entire Functions of Finite Order</b>	27
3.1	Order of a Function	27
3.2	Hadamard's Theorem	31
<b>4</b>	<b>Bernoulli Numbers and Polynomials</b>	39
4.1	Euler's Factorization of $\sin z$	39
4.2	Bernoulli Numbers	41
4.3	Bernoulli Polynomials	44
<b>5</b>	<b>Summation Formulae</b>	49
5.1	Stirling's Formula for $n!$	49
5.2	Partial Summation and Euler's Constant	53
5.3	The Euler–MacLaurin Summation Formula	58
5.4	Kronecker's Summation Formula	62
<b>6</b>	<b>The Euler Gamma-Function</b>	67
6.1	Eulerian Integrals	67
6.2	Euler's Limit Formula and Consequences	70
6.3	Stirling's Formula	76
6.4	The Psi-Function	82
6.5	Binet's Integral Formulae	88

<b>7</b>	<b>Linear Differential Equations</b>	93
7.1	Cauchy's Method	93
7.2	Singular Points of the Coefficients	98
7.3	Fuchs' Theorem	104
<b>8</b>	<b>Hypergeometric Functions</b>	115
8.1	Totally Fuchsian Differential Equations	115
8.2	The Hypergeometric Differential Equation	116
8.3	Euler's Integral Representation of ${}_2F_1$	120
8.4	${}_2F_1$ as a Function of the Parameters	127
8.5	Linear Transformations	129
8.6	The Confluent Hypergeometric Function ${}_1F_1$	136
8.7	The Confluent Hypergeometric Equation	139
8.8	Mellin–Barnes' Integral Representations	155
	<b>Bibliography</b>	165
	<b>Index</b>	167
