

Contents

Screening

Agreement Between Radiologists' Interpretations of Screening Mammograms	3
<i>Robert M. Nishikawa, Christopher E. Comstock, Michael N. Linver, Gillian M. Newstead, Vinay Sandhir, and Robert A. Schmidt</i>	
Quality Control of Breast Tomosynthesis for a Screening Trial: Preliminary Experience	11
<i>Aili Maki, James Mainprize, Gordon Mawdsley, and Martin Yaffe</i>	
Summary of Outcomes from Consecutive Years of Tomosynthesis Screening at an American Academic Institution	20
<i>Emily F. Conant, Andrew Oustimov, Samantha P. Zuckerman, Elizabeth S. McDonald, Susan P. Weinstein, Andrew D.A. Maidment, Bruno Barufaldi, Marie Synnestvedt, and Mitchell Schnall</i>	

CAD

LUT-QNE: Look-Up-Table Quantum Noise Equalization in Digital Mammograms	27
<i>Alessandro Bria, Claudio Marrocco, Jan-Jurre Mordang, Nico Karssemeijer, Mario Molinara, and Francesco Tortorella</i>	
Automatic Microcalcification Detection in Multi-vendor Mammography Using Convolutional Neural Networks	35
<i>Jan-Jurre Mordang, Tim Janssen, Alessandro Bria, Thijs Kooi, Albert Gubern-Mérida, and Nico Karssemeijer</i>	
Similar Image Retrieval of Breast Masses on Ultrasonography Using Subjective Data and Multidimensional Scaling	43
<i>Chisako Muramatsu, Tetsuya Takahashi, Takako Morita, Tokiko Endo, and Hiroshi Fujita</i>	
A Comparison Between a Deep Convolutional Neural Network and Radiologists for Classifying Regions of Interest in Mammography	51
<i>Thijs Kooi, Albert Gubern-Merida, Jan-Jurre Mordang, Ritse Mann, Ruud Pijnappel, Klaas Schuur, Ard den Heeten, and Nico Karssemeijer</i>	

Mammography, Tomosynthesis and Breast CT

Diagnostic Usefulness of Synthetic MMG (SMMG) with DBT (Digital Breast Tomosynthesis) for Clinical Setting in Breast Cancer Screening	59
<i>Nachiko Uchiyama, Mari Kikuchi, Minoru Machida, Yasuaki Arai, Ryusuke Murakami, Kyoichi Otsuka, Anna Jerebko, Michael Kelm, and Thomas Mertelmeier</i>	
Development of Digital Phantom for Digital Mammography with Soft-Copy Reading	68
<i>Norimitsu Shinohara, Katsuhei Horita, and Tokiko Endo</i>	
Improving the Quality of Optimisation Studies Undertaken in Mammography and General Radiology Using High Level Blended Teaching	75
<i>Alistair Mackenzie, Kenneth C. Young, Saartje Creten, Nelis Van Peteghem, and Hilde Bosmans</i>	
Simplified Method for FROC Observer Study to Evaluate the Diagnostic Accuracy of a Digital Breast Imaging System by Using a CDMAM Phantom	83
<i>Rie Tanaka, Fujiyo Akita, Daisuke Fukuoka, Yusuke Bamba, and Junji Shiraishi</i>	
Equivocal Breast Findings Are Reduced with Digital Tomosynthesis	89
<i>Maram Alakhras, Claudia Mello-Thoms, Roger Bourne, Mary Rickard, and Patrick C. Brennan</i>	
The Accuracy of an Estimating Method for the Mammary Gland Composition in the Mammography Using the CdTe-Series Photon Counting Detector	98
<i>Ai Nakajima, Misa Kato, Chizuru Okamoto, Akiko Ihori, Tsutomu Yamakawa, Shuichiro Yamamoto, Masahiro Okada, and Yoshie Kodera</i>	
Towards Optimization of Image Quality as a Function of Breast Thickness in Mammography: An Investigation of the Breast Thickness Compensation Schemes on Analogue and Digital Mammography Units	107
<i>Lesley J. Grattan and Adam Workman</i>	
Lower Recall Rates Reduced Readers' Sensitivity in Screening Mammography	116
<i>Norhashimah Mohd Norsuddin, Claudia Mello-Thoms, Warren Reed, Patrick C. Brennan, and Sarah Lewis</i>	
Simulation of Positron Emission Mammography Imaging with Pixelated CdTe.	122
<i>Machiel Kolstein and Mokhtar Chmeissani</i>	

The International Use of PERFORMS Mammographic Test Sets.	130
<i>Yan Chen, Leng Dong, Hossein Nevisi, and Alastair Gale</i>	
Dependence of Contrast-Enhanced Lesion Detection in Contrast-Enhanced Digital Breast Tomosynthesis on Imaging Chain Design	136
<i>David A. Scaduto, Yue-Houng Hu, Yihuan Lu, Hailiang Huang, Jingxuan Liu, Kim Rinaldi, Gene Gindi, Paul R. Fisher, and Wei Zhao</i>	
Evaluation of the <i>BreastSimulator</i> Software Platform for Breast Tomography: Preliminary Results	145
<i>Giovanni Mettivier, Kristina Bliznakova, Francesca Di Lillo, Antonio Sarno, and Paolo Russo</i>	
Effect of Dose on the Detection of Micro-Calcification Clusters for Planar and Tomosynthesis Imaging	152
<i>Alistair Mackenzie, Andria Hadjipanteli, Premkumar Elangovan, Padraig T. Looney, Rebecca Ealden, Lucy M. Warren, David R. Dance, Kevin Wells, and Kenneth C. Young</i>	
Dosimetric Modeling of Mammography Using the Monte Carlo Code PENELOPE and Its Validation	160
<i>Jason Tse, Roger Fulton, and Donald McLean</i>	
Nonlinear Local Transformation Based Mammographic Image Enhancement	167
<i>Cuiping Ding, Min Dong, Hongjuan Zhang, Yide Ma, Yaping Yan, and Reyer Zwiggelaar</i>	
A Hybrid Detection Scheme of Architectural Distortion in Mammograms Using Iris Filter and Gabor Filter	174
<i>Mizuki Yamazaki, Atsushi Teramoto, and Hiroshi Fujita</i>	
Performance of Breast Cancer Screening Depends on Mammographic Compression.	183
<i>Katharina Holland, Ioannis Sechopoulos, Gerard den Heeten, Ritse M. Mann, and Nico Karssemeijer</i>	
Monte Carlo Evaluation of Normalized Glandular Dose Coefficients in Mammography	190
<i>Antonio Sarno, Giovanni Mettivier, Francesca Di Lillo, and Paolo Russo</i>	
Breast Density Assessment Using Breast Tomosynthesis Images	197
<i>Pontus Timberg, Andreas Fieselmann, Magnus Dustler, Hannie Petersson, Hanna Sartor, Kristina Lång, Daniel Föörnvik, and Sophia Zackrisson</i>	

Detailed Analysis of Scatter Contribution from Different Simulated Geometries of X-ray Detectors	203
<i>Elena Marimon, Hammadi Nait-Charif, Asmar Khan, Philip A. Marsden, and Oliver Diaz</i>	
Calibration Procedure of Three Component Mammographic Breast Imaging . . .	211
<i>Sergei Malkov, Jesus Avila, Bo Fan, Bonnie Joe, Karla Kerlikowske, Maryellen Giger, Karen Drukker, Jennifer Drukteinis, Leila Kazemi, Malesa Pereira, and John Shepherd</i>	
Local Detectability Maps as a Tool for Predicting Masking Probability and Mammographic Performance	219
<i>Olivier Alonzo-Proulx, James Mainprize, Heba Hussein, Roberta Jong, and Martin Yaffe</i>	
The Effect of Breast Composition on a No-reference Anisotropic Quality Index for Digital Mammography	226
<i>Bruno Barufaldi, Lucas R. Borges, Marcelo A.C. Vieira, Salvador Gabarda, Andrew D.A. Maidment, Predrag R. Bakic, David D. Pokrajac, and Homero Schiabel</i>	
Grid-Less Imaging with Anti-scatter Correction Software in 2D Mammography: A JAFROC Study Using Simulated Lesions	234
<i>Frédéric Bemelmans, Nelis Van Peteghem, Xenia Bramaje Adversalo, Elena Salvagnini, Chantal Van Ongeval, and Hilde Bosmans</i>	
Towards a Phantom for Multimodality Performance Evaluation of Breast Imaging: A 3D Structured Phantom with Simulated Lesions Tested for 2D Digital Mammography	243
<i>Kristina Tri Wigati, Lesley Cockmartin, Nicholas Marshall, Djarwani S. Soejoko, and Hilde Bosmans</i>	
Novel Technology	
Simulation and Visualization to Support Breast Surgery Planning	257
<i>Joachim Georgii, Torben Paetz, Markus Harz, Christina Stoecker, Michael Rothgang, Joseph Colletta, Kathy Schilling, Margrethe Schlooz-Vries, Ritse M. Mann, and Horst K. Hahn</i>	
Single Section Biomarker Measurement and Colocalization via a Novel Multiplexing Staining Technology	265
<i>Tyna Hope, Dan Wang, Sharon Nofech-Mozes, Kela Liu, Sireesha Kaanumalle, Yousef Al-Kohafi, Kashan Shaikh, Robert Filkins, and Martin Yaffe</i>	

Breast Conserving Surgery Outcome Prediction: A Patient-Specific, Integrated Multi-modal Imaging and Mechano-Biological Modelling Framework.	274
<i>Björn Eiben, Rene Lacher, Vasileios Vavourakis, John H. Hipwell, Danail Stoyanov, Norman R. Williams, Jörg Sabczynski, Thomas Bülow, Dominik Kutra, Kirsten Meetz, Stewart Young, Hans Barschdorf, Hélder P. Oliveira, Jaime S. Cardoso, João P. Monteiro, Hooshiar Zolfagharnasab, Ralph Sinkus, Pedro Gouveia, Gerrit-Jan Liefers, Barbara Molenkamp, Cornelis J.H. van de Velde, David J. Hawkes, Maria João Cardoso, and Mohammed Keshtgar</i>	
The Characteristics of Malignant Breast Tumors Imaged Using a Prototype Mechanical Imaging System as an Adjunct to Mammography.	282
<i>Magnus Dustler, Daniel Förnvik, Pontus Timberg, Hannie Petersson, Anders Tingberg, and Sophia Zackrisson</i>	
Density Assessment and Tissue Analysis	
Mammographic Density Over Time in Women With and Without Breast Cancer.	291
<i>Abigail Humphrey, Elaine F. Harkness, Emmanouil Moschidis, Emma Hurley, Philip Foden, Megan Bydder, Mary Wilson, Soujanya Gadde, Anthony Maxwell, Yit Y. Lim, Ursula Beetles, Anthony Howell, D. Gareth Evans, and Susan M. Astley</i>	
Learning Density Independent Texture Features	299
<i>Michiel Kallenberg, Mads Nielsen, Katharina Holland, Nico Karssemeijer, Christian Igel, and Martin Lillholm</i>	
Breast Asymmetry, Distortion and Density Are Key Factors for False Positive Decisions.	307
<i>Zoey Z.Y. Ang, Rob Heard, Mohammad A. Rawashdeh, Patrick C. Brennan, Warwick Lee, and Sarah J. Lewis</i>	
Estimation of Perceived Background Tissue Complexity in Mammograms . . .	316
<i>Ali R.N. Avanaki, Kathryn S. Espig, Albert Xthona, and Tom R.L. Kimpe</i>	
Dose and Classification	
Patient Dose Survey of Mammography Systems in the UK in 2013–2015 . . .	327
<i>Jennifer Oduko and Kenneth Young</i>	

A Pilot Study on Radiation Dose from Combined Mammography Screening in Australia	335
<i>Jason Tse, Roger Fulton, Mary Rickard, Patrick Brennan, and Donald McLean</i>	
Simulation of Dose Reduction in Digital Breast Tomosynthesis	343
<i>Lucas R. Borges, Igor Guerrero, Predrag R. Bakic, Andrew D.A. Maidment, Homero Schiabel, and Marcelo A.C. Vieira</i>	
Non-expert Classification of Microcalcification Clusters Using Mereotopological Barcodes.	351
<i>Harry Strange and Reyer Zwiggelaar</i>	
Mammographic Segmentation and Density Classification: A Fractal Inspired Approach.	359
<i>Wenda He, Sam Harvey, Arne Juette, Erika R.E. Denton, and Reyer Zwiggelaar</i>	
Whole Mastectomy Volume Reconstruction from 2D Radiographs and Its Mapping to Histology	367
<i>Thomy Mertzanidou, John H. Hipwell, Sara Reis, Babak Ehteshami Bejnordi, Meyke Hermesen, Mehmet Dalmis, Suzan Vreemann, Bram Platel, Jeroen van der Laak, Nico Karssemeijer, Ritse Mann, Peter Bult, and David J. Hawkes</i>	
Image Processing, CAD, Breast Density and New Technology	
Accurate Quantification of Glandularity and Its Applications with Regard to Breast Radiation Doses and Missed Lesion Rates During Individualized Screening Mammography.	377
<i>Mika Yamamuro, Kanako Yamada, Yoshiyuki Asai, Koji Yamada, Yoshiaki Ozaki, Masao Matsumoto, and Takamichi Murakami</i>	
A Preliminary Study on Breast Cancer Risk Analysis Using Deep Neural Network.	385
<i>Wenqing Sun, Tzu-Liang (Bill) Tseng, Bin Zheng, and Wei Qian</i>	
A Novel Breast Cancer Risk Assessment Scheme Design Using Dual View Mammograms.	392
<i>Wenqing Sun, Tzu-Liang (Bill) Tseng, Bin Zheng, Jiangying Zhang, and Wei Qian</i>	
Automated Multimodal Computer Aided Detection Based on a 3D-2D Image Registration	400
<i>T. Hopp, B. Neupane, and N.V. Ruiter</i>	

Exposure Conditions According to Breast Thickness and Glandularity in Japanese Women	408
<i>Hiroko Nishide, Kouji Ohta, Kaori Murata, and Yoshie Kodera</i>	
Deep Cascade Classifiers to Detect Clusters of Microcalcifications	415
<i>Alessandro Bria, Claudio Marrocco, Nico Karssemeijer, Mario Molinara, and Francesco Tortorella</i>	
Mammographic Ellipse Modelling Towards Birads Density Classification . . .	423
<i>Minu George, Andrik Rampun, Erika Denton, and Reyer Zwiggelaar</i>	
Automatic Image Quality Assessment for Digital Pathology	431
<i>Ali R.N. Avanaki, Kathryn S. Espig, Albert Xthona, Christian Lanciault, and Tom R.L. Kimpe</i>	
Automated Analysis of Breast Tumour in the Breast DCE-MR Images Using Level Set Method and Selective Enhancement of Invasive Regions . . .	439
<i>Atsushi Teramoto, Satomi Miyajo, Hiroshi Fujita, Osamu Yamamuro, Kumiko Omi, and Masami Nishio</i>	
Feasibility of Depth Sensors to Study Breast Deformation During Mammography Procedures	446
<i>Oliver Díaz, Arnau Oliver, Sergi Ganau, Eloy García, Joan Martí, Melcior Sentís, and Robert Martí</i>	
Proposal of Semi-automatic Classification of Breast Lesions for Strain Sonoelastography Using a Dedicated CAD System	454
<i>Karem D. Marcomini, Eduardo F.C. Fleury, Homero Schiabel, and Robert M. Nishikawa</i>	
Markovian Approach to Automatic Annotation of Breast Mass Spicules Using an A Contrario Model	461
<i>Sègbédji R.T.J. Goubalan, Yves Goussard, and Hichem Maaref</i>	
Improving Mammographic Density Estimation in the Breast Periphery	469
<i>Xin Chen, Emmanouil Moschidis, Chris Taylor, and Susan Astley</i>	
Simulation of Breast Anatomy: Bridging the Radiology-Pathology Scale Gap	478
<i>Predrag R. Bakic, David D. Pokrajac, Rebecca Batiste, Michael D. Feldman, and Andrew D.A. Maidment</i>	
Volumetric Breast Density Combined with Masking Risk: Enhanced Characterization of Breast Density from Mammography Images	486
<i>Andreas Fieselmann, Anna K. Jerebko, and Thomas Mertelmeier</i>	

Comparison of Four Breast Tissue Segmentation Algorithms for Multi-modal MRI to X-ray Mammography Registration	493
<i>E. García, A. Oliver, Y. Diez, O. Diaz, A. Gubern-Mérida, X. Lladó, and J. Martí</i>	
3D Total Variation Minimization Filter for Breast Tomosynthesis Imaging . .	501
<i>Ana M. Mota, Nuno Oliveira, Pedro Almeida, and Nuno Matela</i>	
Variations in Breast Density and Mammographic Risk Factors in Different Ethnic Groups	510
<i>Elaine F. Harkness, Fatik Bashir, Philip Foden, Megan Bydder, Soujanya Gadde, Mary Wilson, Anthony Maxwell, Emma Hurley, Anthony Howell, D. Gareth Evans, and Susan M. Astley</i>	
Virtual Tools for the Evaluation of Breast Imaging: State-of-the Science and Future Directions	518
<i>Predrag R. Bakic, Kyle J. Myers, Stephen J. Glick, and Andrew D.A. Maidment</i>	
A Measure of Regional Mammographic Masking Based on the CDMAM Phantom	525
<i>Benjamin Hinton, Serghei Malkov, Jesus Avila, Bo Fan, Bonnie Joe, Karla Kerlikowske, Lin Ma, Amir Mahmoudzadeh, and John Shepherd</i>	
A Statistical Method for Low Contrast Detectability Assessment in Digital Mammography	532
<i>Chiara Spadavecchia, Raffaele Villa, Claudia Pasquali, Nicoletta Paruccini, Nadia Oberhofer, and Andrea Crespi</i>	
Should We Adjust Visually Assessed Mammographic Density for Observer Variability?	540
<i>Elaine F. Harkness, Jamie C. Sergeant, Mary Wilson, Ursula Beetles, Soujanya Gadde, Yit Y. Lim, Anthony Howell, D. Gareth Evans, and Susan M. Astley</i>	
Do Women with Low Breast Density Have Regionally High Breast Density?	548
<i>Amir Pasha Mahmoudzadeh, Serghei Malkov, Benjamin Hinton, Brian Sprague, Karla Kerlikowske, and John Shepherd</i>	
Energy Dependence of Water and Lipid Calibration Materials for Three-Compartment Breast Imaging.	554
<i>Jesus Avila, Serghei Malkov, Maryellen Giger, Karen Drukker, and John A. Shepherd</i>	

Contrast-Enhanced Imaging

Development of Fully-3D CT in a Hybrid SPECT-CT Breast Imaging System	567
<i>Martin P. Tornai, Jainil P. Shah, Steve D. Mann, and Randolph L. McKinley</i>	
Volumetric Breast-Density Measurement Using Spectral Photon-Counting Tomosynthesis: First Clinical Results.	576
<i>Erik Fredenberg, Karl Berggren, Matthias Bartels, and Klaus Erhard</i>	
Texture Analysis of Contrast-Enhanced Digital Mammography (CEDM) Images.	585
<i>María-Julieta Mateos, Alfonso Gastelum, Jorge Márquez, and Maria-Ester Brandan</i>	
Estimating Breast Thickness for Dual-Energy Subtraction in Contrast-Enhanced Digital Mammography: A Theoretical Model.	593
<i>Kristen C. Lau, Raymond J. Acciavatti, and Andrew D.A. Maidment</i>	
A Simulation Study on Spectral Lesion Characterization	601
<i>Klaus Erhard and Udo van Stevendaal</i>	

Phase Contrast Breast Imaging

Contrast Detail Phantoms for X-ray Phase-Contrast Mammography and Tomography.	611
<i>Kristina Bliznakova, Giovanni Mettivier, Paolo Russo, and Ivan Buliev</i>	
Image Quality and Radiation Dose in Propagation Based Phase Contrast Mammography with a Microfocus X-ray Tube: A Phantom Study.	618
<i>Roberta Castriconi, Giovanni Mettivier, and Paolo Russo</i>	
Phase-Contrast Clinical Breast CT: Optimization of Imaging Setups and Reconstruction Workflows	625
<i>Giuliana Tromba, Serena Pacilè, Yakov I. Nesterets, Francesco Brun, Christian Dullin, Diego Dreossi, Sheridan C. Mayo, Andrew W. Stevenson, Konstantin M. Pavlov, Markus J. Kitchen, Darren Thompson, Jeremy M.C. Brown, Darren Lockie, Maura Tonutti, Fulvio Stacul, Fabrizio Zanconati, Agostino Accardo, and T.E. Gureyev</i>	
Improving Breast Mass Segmentation in Local Dense Background: An Entropy Based Optimization of Statistical Region Merging Method	635
<i>Shelda Sajeev, Mariusz Bajger, and Gobert Lee</i>	

Simulations and Virtual Clinical Trials

System Calibration for Quantitative Contrast-Enhanced Digital Breast Tomosynthesis (CEDBT)	645
<i>Melissa L. Hill, James G. Mainprize, and Martin J. Yaffe</i>	
Rapid Generation of Structured Physical Phantoms for Mammography and Digital Breast Tomosynthesis	654
<i>Lynda Ikejimba, Christian Graff, and Stephen Glick</i>	
A Novel 3D Stochastic Solid Breast Texture Model for X-Ray Breast Imaging	660
<i>Zhijin Li, Agnès Desolneux, Serge Muller, and Ann-Katherine Carton</i>	
OPTIMAM Image Simulation Toolbox - Recent Developments and Ongoing Studies	668
<i>Premkumar Elangovan, Andria Hadjipanteli, Alistair Mackenzie, David R. Dance, Kenneth C. Young, and Kevin Wells</i>	
Impact of Clinical Display Device on Detectability of Breast Masses in 2D Digital Mammography: A Virtual Clinical Study.	676
<i>Alaleh Rashidnasab, Frédéric Bemelmans, Nicholas W. Marshall, Tom Kimpe, and Hilde Bosmans</i>	
Author Index	685

Breast Imaging

13th International Workshop, IWDM 2016, Malmö,

Sweden, June 19-22, 2016, Proceedings

Tingberg, A.; Lång, K.; Timberg, P. (Eds.)

2016, XVIII, 688 p. 322 illus., Softcover

ISBN: 978-3-319-41545-1
