

# Contents

<b>1</b>	<b>Introduction</b>	<b>1</b>
1.1	Available Methods for Formation Control	1
1.1.1	The Consensus Algorithm	2
1.1.2	The PDE-Based Model	3
1.1.3	The Containment Control Approach	3
1.1.4	Problems Definitions	4
1.2	MAS Evolution As Continuum Deformation	6
<b>2</b>	<b>Homogeneous Deformation without Interagent Communication</b>	<b>11</b>
2.1	Homogeneous Transformation	11
2.1.1	Homogeneous Deformation of the Leading Polytope	12
2.1.2	Homogeneous Deformation of the Leading Triangle	15
2.1.3	Homogeneous Deformation of Agents with Finite Size	18
2.1.4	Force Analysis	20
2.1.5	Path Planning: MAS As Particles of Newtonian Viscous Flow	22
2.2	Evolution of a Multi-Agent System with Constrained Dynamics	31
2.3	Homogeneous Deformation of Followers with Linear Dynamics	42
2.3.1	Continuous Time	42
2.3.2	Discrete Time Finite Time Reachability Model	45
<b>3</b>	<b>Homogeneous Deformation of Multi-Agent Systems Communication</b>	<b>51</b>
3.1	Graph Theory Notions and Definitions	51
3.2	Protocol of Minimum Communication	52
3.2.1	Communication Weights	53
3.2.2	Weight Matrix	55
3.2.3	MAS Evolution Dynamics-First Order Kinematic Model-Method 1	61
3.2.4	MAS Evolution Dynamics-First Order Kinematic Model-Method 2	92
3.3	Homogeneous Deformation of an MAS Using Preservation of Volumetric Ratios	96

3.4	Comparison of the Different Continuous-Time Algorithms for Homogeneous Deformation of an MAS .....	105
3.5	Discrete Time Dynamics for Homogeneous Deformation of an MAS .....	113
3.6	Final Remarks .....	115
3.6.1	Homogeneous Deformation in a 3- <i>D</i> Space .....	115
3.6.2	<i>p</i> - <i>D</i> Homogeneous Deformation in an <i>n</i> - <i>D</i> Space ( $p \leq n$ ) ....	119
<b>4</b>	<b>Higher Order Dynamics for MAS Evolution as Continuum Deformation .....</b>	<b>125</b>
4.1	Second Order Dynamics for Continuum Deformation of an MAS .....	125
4.2	Asymptotic Tracking of Desired Positions .....	133
4.3	MAS Evolution in Presence of Communication Delay .....	140
<b>5</b>	<b>Alignment as Biological Inspiration for Control of Multi-Agent Systems .....</b>	<b>147</b>
5.1	Initial Distribution of the Agents .....	147
5.2	Evolution of Leader Agents .....	148
5.3	Evolution of Follower Agents .....	150
5.3.1	Followers' Desired Positions .....	150
5.3.2	Perception Weights .....	153
5.3.3	Followers' Dynamics .....	153
5.4	Alignment Using Agents' Triangulation .....	158
5.4.1	Evolution of the Secondary Leaders .....	159
5.4.2	Evolution of the Followers .....	163
<b>6</b>	<b>Deployment of a Multi-Agent System on a Desired Formation .....</b>	<b>169</b>
6.1	Definitions .....	169
6.2	q-Communication Weight and q-Weight Matrix .....	173
6.3	Agents' positions in the Desired Configuration .....	177
6.4	Dynamics of Agents .....	179
6.4.1	First-Order Dynamics for Evolution of the MAS .....	179
6.4.2	Double Integrator Kinematic Model (Asymptotic Tracking of a Moving Desired Formation) .....	180
<b>7</b>	<b>Continuum Deformation of a Multi-Agent System over Nonlinear Surfaces .....</b>	<b>185</b>
7.1	Discrete-Time Dynamics of Collective Motion on a Nonlinear Surface .....	185
7.1.1	Dynamics of an Individual Agent .....	185
7.1.2	Interagent Communication .....	186
7.1.3	Collective Dynamics .....	187
7.2	Continuum Deformation Along a Smooth Path in a 3- <i>D</i> Motion Space .....	187
7.3	Continuum Deformation Along a Smooth Surface in a 3- <i>D</i> Motion Space .....	190

Contents	xiii
<b>A Kinematics of a Continuum</b> .....	195
<b>B Notions of Graph Theory</b> .....	199
<b>References</b> .....	203
<b>Index</b> .....	213

Continuum Deformation of Multi-Agent Systems

Rastgoftar, H.

2016, XIII, 217 p. 136 illus., 99 illus. in color., Hardcover

ISBN: 978-3-319-41593-2

A product of Birkhäuser Basel
