Contents

Part I Ergonomics and Material Environment Design

Comparison Between Domestic Water Heating Systems Based on Either Solar Heaters or Electrical Boilers by the Life Cycle Assessment Approach 3
Raquel Diniz Oliveira, Eduardo H.M. Nunes, Jessica de Oliveira Notório Ribeiro and Rodrigo de Mello Morado Penna

Aggregate Replacement and Its Usefulness in Cement Concrete for Sustainable Development—A Study on Rubber, Jarosite and Sandstone Aggregates 13
Sanjeev Kumar, Ramesh Chandra Gupta, Blessen Skariah Thomas and Priyansha Mehra

Incubating and Nurturing Sustainable Practices Through Staged Social Engagements 27
Satyakam Sharma and Kin Wai Michael Siu

Public Facilities Driven by Service Demand for Space 39
Robert Rusek and Joan Colomer-Llinas

Adaptive Reuse of Buildings as an Important Factor of Sustainable Development 51
Krystyna Strumiłło

Part II Ergonomics in Building and Architecture

New Concepts in Arrangement of Living Spaces for Students 63
Anna Jaglarz

Re-consumption of Materials in Architecture 75
Jerzy Charytonowicz and Maciej Skowroński

Le Corbusier in Algeria: The Quest for the Human Scale in Architecture 85
Leila Chebaiki-Adli

Design Aspects Applied to Engineering: Technology Sustainable Development and Innovation in the Science Parks 95
Ekaterina Emmanuil Inglesis Barcellos, Galdenoro Botura, Jr. and Luiz Carlos Paschoarelli

Cross-Cultural Design and Its Application in Architecture 105
Wojciech Bonenberg

Aesthetics and Composition of Forms in the Design of Means of Transport and Rehabilitation for People with Disabilities 115
Agata Bonenberg

Application of the Green Roof System in Small and Medium Urban Cities 125
Mo Zhou and Wojciech Bonenberg

Shift of the Function of "Temple of the Travelling" from Railway Stations to Airports 137
Romuald Tarczewski, Elzbieta Trocka-Leszczynska and Joanna Jablonska
