

Contents

1	Characteristics of Surface Water Quality	1
1.1	Hydro-Physical Indicators	1
1.2	Hydro-Chemical Indicators	7
1.3	Hydro-Biological Indicators	9
	References	9
2	Hydrological Processes	11
2.1	Transport of Substances Within a River Basin	12
2.2	Effects of Water Runoff on the Chemical Composition of Water Bodies	15
2.2.1	Watercourses	16
2.2.2	Reservoirs	31
2.3	Hydrodynamic Processes	37
2.3.1	Watercourses	38
2.3.2	Reservoirs	42
2.3.3	Regulated Flows	44
2.4	Hydro-Physical Parameters	46
2.4.1	Effect of Hydro-Physical Factors on Dissolved Oxygen Concentrations in Water	46
2.4.2	Turbidity	51
2.4.3	Water Color	54
2.5	Bottom Sediments	56
	References	63
3	Physico-Chemical Processes	69
3.1	Dependence of Ionic Activity Coefficients on Ionic Strength and Mineralization of Surface Water	70
3.2	Acid-Base Balance	78
3.2.1	Dissociation of Acids	78
3.2.2	Carbonic Acid. Carbonate System. Aggressive Carbon Dioxide	79

3.2.3	Phosphoric, Silicic and Chromic Acids	84
3.2.4	Organic Acids	85
3.2.5	Dissociation of Bases. Ammonium Ions, Ammonia. Amines	86
3.2.6	Hydrolysis of Metal Ions	88
3.3	Complexation Processes	97
3.3.1	Complexes with Inorganic Ligands	101
3.3.2	Complexes with Organic Ligands	103
3.3.3	Overview of Complexation Processes in Surface Water	109
3.4	Redox Processes	118
3.4.1	Nitrogen Compounds	120
3.4.2	Sulfur Compounds	122
3.4.3	Iron, Mangan, Chromium	123
3.4.4	Organic Compounds	128
3.5	Slightly Soluble Compounds	128
3.5.1	Effect of pH on the Solubility of Slightly Soluble Compounds	129
3.5.2	Influence of Complexation and Water Mineralization	129
3.5.3	General Pattern of Calculating Solubility of Slightly Soluble Compounds	130
3.6	Sorption-Desorption Processes in “Water-Suspensions—Bottom Sediments” System	131
3.6.1	Sorption of Metal Ions and Their Compounds	132
3.6.2	Sorption of Organic Compounds	137
3.7	The Impact of Humic Substances on Surface Water Quality	139
	Addendum	140
	References	162
4	Biological Processes. Effects of Hydrobionts on Surface Water Quality	165
4.1	Effects of Hydrobionts on Water <i>pH</i> , Concentration of Dissolved Oxygen and Redox Potential	170
4.2	Effects of Hydrobionts on the Dynamics of Concentrations of Biogenic Elements in Water Bodies with Slow Water Exchange	175
4.3	The Role of Hydrations’ in Producing of Organic Substances in Surface Water Bodies	177
4.3.1	Organic Acids	183
4.3.2	Protein Compounds	184
4.3.3	Amino Acids	186
4.3.4	Amines	187
4.3.5	Indoles, Alkaloids, Algotoxins.	189
4.3.6	Lipids	190
4.3.7	Terpenes, Alcohols, Ethers, Aldehydes and Ketones. . . .	192

4.3.8	Carbohydrates	193
4.3.9	Humic Substances (Plankton Humus).	194
4.3.10	Phenolic Compounds	195
4.4	Effects of Hydrobionts on Organic Matter Cycle	199
4.5	Effect of Hydrobionts on Migration of Metals in Surface Water	200
4.6	The Role of Hydrobionts' Exometabolites in Heavy Metal Detoxification Processes	203
4.7	Buffer Capacity of Freshwater Ecosystems in Relation to Metals	206
	References	214
5	General Description of Effects of Anthropogenic Factors on Surface Water Quality	223
	References	234
	Addendum	237

Processes Determining Surface Water Chemistry

Osadchyy, V.; Nabyvanets, B.; Linnik, P.; Osadcha, N.;
Nabyvanets, Y.

2016, IX, 265 p. 87 illus., 2 illus. in color., Hardcover

ISBN: 978-3-319-42158-2
