

# Contents

<b>1</b>	<b>Introduction</b>	1
1.1	Motivation	1
1.2	Approaches Related to the Fraenkel-Mostowski Framework	5
1.3	Finitely Supported Mathematics	7
1.4	Outline	9
<b>2</b>	<b>Fraenkel-Mostowski Set Theory: A Framework for Finitely Supported Mathematics</b>	11
2.1	Axiom of Choice	11
2.2	Permutative Renaming	15
2.3	Sets with Atoms	17
2.4	Constructions of Sets with Atoms	19
2.4.1	Powersets	19
2.4.2	Cartesian Products	20
2.4.3	Disjoint Unions	20
2.4.4	Function Spaces	21
2.4.5	Categorical Constructions	24
2.5	Fraenkel-Mostowski Axioms	24
2.6	Logical Notions in the FM Cumulative Universe	28
2.7	Inconsistency of Choice Principles	30
2.8	Finiteness	39
2.9	Freshness	41
2.10	Abstraction	43
2.10.1	Formal Definition	43
2.10.2	Motivation	44
2.10.3	Properties	46
<b>3</b>	<b>Algebraic Structures in Finitely Supported Mathematics</b>	49
3.1	Multisets in Finitely Supported Mathematics	49
3.1.1	Algebraic Properties of Multisets	50
3.1.2	Multisets over Infinite Alphabets	54

3.1.3	An Extension of the Framework	60
3.2	Generalized Multisets in Finitely Supported Mathematics	62
3.2.1	Algebraic Properties of Generalized Multisets	63
3.2.2	Generalized Multisets over Infinite Alphabets	73
3.3	Order Theory in Finitely Supported Mathematics	77
3.3.1	Partially Ordered Sets	78
3.3.2	Galois Connections	83
3.3.3	Rough Set Approximations	87
3.3.4	Abstract Interpretation	90
3.3.5	Calculability: Approximations of Fixed Points	95
3.3.6	Complete Partially Ordered Sets	100
3.3.7	Recursive Equations over CPOs	104
3.4	Groups in Finitely Supported Mathematics	105
3.4.1	Basic Results	106
3.4.2	Isomorphism Theorems	109
3.4.3	Embedding Theorems	112
3.4.4	Finitely Supported Subgroups	115
3.5	General Comments	120
3.6	Comments on the Methods Used in This Chapter	123
3.7	Conclusion	125
<b>4</b>	<b>Extended Fraenkel-Mostowski Set Theory</b>	<b>129</b>
4.1	Axioms of Extended Fraenkel-Mostowski Set Theory	129
4.2	Inconsistency of the Axiom of Choice	132
4.3	Algebraic Properties of EFM Sets	133
4.4	Topological Properties of EFM Sets	138
4.4.1	Subgroup Lattices as Domains	138
4.4.2	Scott Topology over the Subgroup Lattice of a Group	139
4.4.3	Topological Properties of the Group of Permutations of Atoms in EFM Set Theory	142
4.5	Renamings in the Extended Fraenkel-Mostowski Framework	144
4.6	Comments	148
<b>5</b>	<b>Process Calculi in Finitely Supported Mathematics</b>	<b>151</b>
5.1	Introduction and Methods	151
5.2	A Case Study: The Monadic Fusion Calculus	152
5.3	FSM Semantics of the Fusion Calculus	156
5.4	FSM Semantics of Other Process Calculi	168
5.4.1	FSM Semantics of the $\pi$ -calculus	168
5.4.2	FSM Semantics of the $\pi I$ -calculus	173
5.5	Comments	177

Finitely Supported Mathematics

An Introduction

Alexandru, A.; Ciobanu, G.

2016, VII, 185 p., Hardcover

ISBN: 978-3-319-42281-7
