

Contents

1	The $\gamma\acute{\epsilon}\nu\omicron\varsigma$ According to Aristotle	1
Part I Algebraic Curves		
2	Descartes and the New World of Curves	5
3	Newton and the Classification of Curves	7
4	When Integrals Hide Curves	9
5	Jakob Bernoulli and the Construction of Curves	11
6	Fagnano and the Lemniscate	15
7	Euler and the Addition of Lemniscatic Integrals	17
8	Legendre and Elliptic Functions	19
9	Abel and the New Transcendental Functions	21
10	A Proof by Abel	23
11	Abel's Motivations	25
12	Cauchy and the Integration Paths	27
13	Puiseux and the Permutations of Roots	31
14	Riemann and the Cutting of Surfaces	35
15	Riemann and the Birational Invariance of Genus	41
16	The Riemann–Roch Theorem	43
17	A Reinterpretation of Abel's Works	45
18	Jordan and the Topological Classification	51
19	Clifford and the Number of Holes	53

20	Clebsch and the Choice of the Term “Genus”	59
21	Cayley and the Deficiency	63
22	Noether and the Adjoint Curves	65
23	Klein, Weyl, and the Notion of an Abstract Surface	67
24	The Uniformization of Riemann Surfaces	69
25	The Genus and the Arithmetic of Curves	71
26	Several Historical Considerations by Weil	73
27	And More Recently?	77
 Part II Algebraic Surfaces		
28	The Beginnings of a Theory of Algebraic Surfaces	81
29	The Problem of the Singular Locus	85
30	A Profusion of Genera for Surfaces	91
31	The Classification of Algebraic Surfaces	93
32	The Geometric Genus and the Newton Polyhedron	97
33	Singularities Which Do Not Affect the Genus	99
34	Hodge’s Topological Interpretation of Genera	103
35	Comparison of Structures	105
 Part III Higher Dimensions		
36	Hilbert’s Characteristic Function of a Module	109
37	Severi and His Genera in Arbitrary Dimension	113
38	Poincaré and Analysis Situs	117
39	The Homology and Cohomology Theories	121
40	Elie Cartan and Differential Forms	125
41	de Rham and His Cohomology	129
42	Hodge and the Harmonic Forms	133
43	Weil’s Conjectures	137
44	Serre and the Riemann–Roch Problem	139
45	New Ingredients	143
46	Whitney and the Cohomology of Fibre Bundles	147

47	Genus Versus Euler–Poincaré Characteristic	149
48	Harnack and Real Algebraic Curves	155
49	The Riemann–Roch–Hirzebruch Theorem	159
50	The Riemann–Roch–Grothendieck Theorem	163
	Epilogue	167
	References	169
	Index	179

What is the Genus?

Popescu-Pampu, P.

2016, XVII, 184 p. 20 illus., Softcover

ISBN: 978-3-319-42311-1
