

Contents

1	Why Should I Read This Book?	1
2	What Are Radioactivity and Radiation?	7
2.1	Radioactivity	11
2.2	Activity and Half-Life	17
2.3	Radiation Doses	18
2.3.1	Weighting Factors	20
2.3.2	Avoiding Doses	23
	Summary	24
	Putting doses in context	25
3	What Does Radiation Do?	27
3.1	Interactions of Charged Particles	27
3.2	Interactions of Neutrons	31
3.3	Interactions of Photons	32
	Summary	35
4	How Can We Make Radiation?	37
4.1	Charged Particle Sources	37
4.2	Photon Sources	39
4.3	Neutron Sources	41
4.4	Cosmic-Ray Sources	42
4.5	Medical Applications	43
4.6	Radioisotope Batteries	47
	Summary	48
5	What Are X Rays?	49
5.1	Medical X Rays	52
5.2	X-Ray Crystallography	54
5.3	Inspection and Quality Control Systems	54
5.4	X Rays in Art	56
5.5	Sources of Unwanted X Rays	56
	Summary	59

6	Is Radioactivity Everywhere?	61
6.1	Cosmic Rays	62
6.2	Terrestrial Radiation	64
6.3	Incorporation of Radioisotopes	65
6.4	Radiation Exposures from Technical Installations	67
6.5	Specific Environmental Exposures	70
6.5.1	Exposures from Air Travel	71
6.5.2	Exposures from Smoking	73
6.5.3	Exposures from Water	75
6.5.4	Questionable Applications in Medicine	75
	Summary	78
7	What Does Radiation Do to Us?	79
7.0.1	Early Effects	79
7.0.2	Delayed Radiation Damage	81
7.0.3	Genetic Damage	83
7.1	Radiosensitivity	83
7.2	Decorporation	84
7.3	Non-Human Organisms	86
7.4	Radiation-Absorbing Fungi	87
7.5	Radiation Risk Factors	88
7.6	Low Radiation Doses	89
7.7	Eradication of Insect Pests	91
7.8	Metabolism of Plutonium	92
	Summary	93
8	How Can We Use Radioactivity Productively?	95
8.1	Nuclear Fission Reactors	97
8.2	Fusion Reactors	103
8.2.1	Inertial Fusion	106
8.2.2	Fusion by Magnetic Confinement	107
8.3	The First Nuclear Reactor	110
8.4	Natural Nuclear Reactors	111
	Summary	113
9	How Can We Use Radioactivity Destructively?	115
	Summary	121
10	What Happens When It Goes Wrong?	123
10.1	Smaller-Scale Radiation Incidents	130
	Summary	132
11	What About Non-Ionising Radiation?	133
11.1	Microwaves	136
11.2	Ultraviolet Light	139
11.3	Lasers	141
	Summary	142

12 How Can We Stay Safe?	145
12.1 Waste Storage	147
12.2 Waste Transmutation	148
12.3 Packaging and Transport	151
12.4 Storage and Security of Radioactive Substances	153
12.5 Handling of Unsealed Radioactive Sources	154
12.6 Mitigating the Consequences of Accidents	155
12.7 Arrangements for Fire Fighting	155
12.8 Protection of Air, Water, and Soil	157
Summary	157
13 What Have We Learned?	159
Appendices	161
A How Can We Detect Radiation?	161
A.1 Ionisation Chambers	161
A.2 Proportional Counters	164
A.3 Geiger-Müller Counters	165
A.4 Solid-State Detectors	167
A.5 Scintillators	168
A.6 Neutron Counters	171
A.7 Personal Dosimeters	171
A.8 Accident Dosimetry	176
A.9 Overview of Radiation Detector Types	177
Summary	178
B How is Radiation Protection Organised?	179
B.1 National Regulations	182
B.2 Radiation Protection Inside Organisations	186
B.2.1 Licensing	187
B.2.2 Bookkeeping	189
B.2.3 Instruction and Training	190
B.2.4 Medical Supervision	190
B.2.5 Handling of Incidents	191
B.2.6 Disposing of Radioactive Waste	191
Summary	192
C Periodic Table of Elements	193
D Further Reading	195
Glossary	197
Index	233

Radioactivity and Radiation

What They Are, What They Do, and How to Harness
Them

Gruppen, C.; Rodgers, M.

2016, XI, 248 p. 137 illus., 26 illus. in color., Hardcover

ISBN: 978-3-319-42329-6
