

# Contents

<b>Bifurcation and Stability at Finite and Infinite Degrees of Freedom . . . . .</b>	<b>1</b>
Péter B. BÉda	
<b>Reduction of Low Frequency Acoustical Resonances Inside Bounded Space Using Eigenvalue Problem Solutions and Topology Optimization. . . . .</b>	<b>15</b>
Andrzej Błażejowski	
<b>Analysis of the Macro Fiber Composite Characteristics for Energy Harvesting Efficiency . . . . .</b>	<b>27</b>
Marek Borowiec, Marcin Bocheński, Jarosław Gawryluk and Michał Augustyniak	
<b>Research of Modified Mechanical Sensor of Atomic Force Microscope . . . . .</b>	<b>39</b>
Vytautas Bučinskas, Andrius Dzedzickis, Nikolaj Šešok, Ernestas Šutinys and Igor Iljin	
<b>Nonlinear Dynamics of the Car Driving System with a Sequential Manual Transmission. . . . .</b>	<b>49</b>
Radek Bulín, Michal Hajžman, Štěpán Dyk and Miroslav Byrtus	
<b>Random Attractors for Von Karman Plates Subjected to Multiplicative White Noise Loadings . . . . .</b>	<b>59</b>
Huatao Chen, Dengqing Cao and Jingfei Jiang	
<b>The Use of Fuzzy Logic in the Control of an Inverted Pendulum . . . . .</b>	<b>71</b>
Adrian Chmielewski, Robert Gumiński, Paweł Maciąg and Jędrzej Mączak	
<b>Artificial Neural Network for Stabilization of the Flexible Rope Submerged in Sea Water . . . . .</b>	<b>83</b>
Łukasz Drag	

<b>Analysis of Non-autonomous Linear ODE Systems in Bifurcation Problems via Lie Group Geometric Numerical Integrators . . . . .</b>	<b>97</b>
Pilade Foti, Aguinardo Fraddosio, Salvatore Marzano and Mario Daniele Piccioni	
<b>Transient Vibrations of a Simply Supported Viscoelastic Beam of a Fractional Derivative Type Under the Transient Motion of the Supports . . . . .</b>	<b>113</b>
Jan Freundlich	
<b>Analysis of Reachability Areas of a Manoeuvring Air Target by a Modified Maritime Missile-Artillery System ZU-23-2MRE . . . . .</b>	<b>125</b>
Daniel Gapiński and Zbigniew Koruba	
<b>Angular Velocity and Intensity Change of the Basic Vectors of Position Vector Tangent Space of a Material System Kinetic Point—Four Examples . . . . .</b>	<b>145</b>
Katica R. (Stevanović) Hedrih	
<b>Dynamics of Impacts and Collisions of the Rolling Balls . . . . .</b>	<b>157</b>
Katica R. (Stevanović) Hedrih	
<b>Approximate Analytical Solutions to Jerk Equations . . . . .</b>	<b>169</b>
Nicolae Herişanu and Vasile Marinca	
<b>Chandler Wobble: Stochastic and Deterministic Dynamics . . . . .</b>	<b>177</b>
Alejandro Jenkins	
<b>Impact of Varying Excitation Frequency on the Behaviour of 2-DoF Mechanical System with Stick-Slip Vibrations . . . . .</b>	<b>187</b>
Wojciech Kunikowski, Paweł Olejnik and Jan Awrejcewicz	
<b>An Analysis of the 1/2 Superharmonic Contact Resonance . . . . .</b>	<b>201</b>
Robert Kostek	
<b>The Oscillator with Linear and Cubic Elastic Restoring Force and Quadratic Damping . . . . .</b>	<b>215</b>
V. Marinca and N. Herişanu	
<b>Wave-Based Control of a Mass-Restricted Robotic Arm for a Planetary Rover . . . . .</b>	<b>225</b>
David J. McKeown and William J. O'Connor	
<b>Soft Suppression of Traveling Localized Vibrations in Medium-Length Thin Sandwich-Like Cylindrical Shells Containing Magnetorheological Layers via Nonstationary Magnetic Field . . . . .</b>	<b>241</b>
Gennadi Mikhasev, Ihnat Mlechka and Holm Altenbach	

<b>The Vehicle Tire Model Based on Energy Flow . . . . .</b>	<b>261</b>
Tomasz Mirosław and Zbigniew Żebrowski	
<b>Research on Dynamics of Shunting Locomotive During Movement on Marshalling Yard by Using Prototype of Remote Control Unit. . . . .</b>	<b>279</b>
Jakub Młyńczak, Rafał Burdzik and Ireneusz Celiński	
<b>Durability Tests Acceleration Performed on Machine Components Using Electromagnetic Shakers . . . . .</b>	<b>293</b>
Adam Niesłony, Artur Dziura and Robert Owsiniński	
<b>Identification of Impulse Force at Electrodes' Cleaning Process in Electrostatic Precipitators (ESP) . . . . .</b>	<b>307</b>
Andrzej Nowak, Paweł Nowak and Stanisław Wojciech	
<b>Using Saturation Phenomenon to Improve Energy Harvesting in a Portal Frame Platform with Passive Control by a Pendulum . . . . .</b>	<b>319</b>
Rodrigo Tumolin Rocha, Jose Manoel Balthazar, Angelo Marcelo Tusset, Vinicius Piccirillo and Jorge Luis Palacios Felix	
<b>Differential Drive Robot: Spline-Based Design of Circular Path . . . . .</b>	<b>331</b>
Alexandr Štefek, Václav Křivánek, Yves T. Bergeon and Jean Motsch	
<b>Multiple Solutions and Corresponding Power Output of Nonlinear Piezoelectric Energy Harvester . . . . .</b>	<b>343</b>
Arkadiusz Syta, Grzegorz Litak, Michael I. Friswell and Marek Borowiec	
<b>On the Dynamics of the Rigid Body Lying on the Vibrating Table with the Use of Special Approximations of the Resulting Friction Forces . . . . .</b>	<b>351</b>
Michał Szewc, Grzegorz Kudra and Jan Awrejcewicz	
<b>Analysis of a Constrained Two-Body Problem . . . . .</b>	<b>361</b>
Wojciech Szumiński and Tomasz Stachowiak	
<b>Analysis of the Forces Generated in the Shock Absorber for Conditions Similar to the Excitation Caused by Road Roughness . . . . .</b>	<b>373</b>
Jan Warczek, Rafał Burdzik and Łukasz Konieczny	
<b>A Pendulum Driven by a Crank-Shaft-Slider Mechanism and a DC Motor—Mathematical Modeling, Parameter Identification, and Experimental Validation of Bifurcational Dynamics. . . . .</b>	<b>385</b>
Grzegorz Wasilewski, Grzegorz Kudra, Jan Awrejcewicz, Maciej Kaźmierczak, Mateusz Tyborowski and Marek Kaźmierczak	

**Bio-Inspired Tactile Sensors for Contour Detection**  
**Using an FEM Based Approach . . . . . 399**  
Christoph Will

**Kinematics and Dynamics of the Drum Cutting Units. . . . . 409**  
Marcin Zastempowski and Andrzej Bochat

Dynamical Systems: Theoretical and Experimental  
Analysis

Łódź, Poland, December 7-10, 2015

Awrejcewicz, J. (Ed.)

2016, XIV, 421 p. 242 illus., 114 illus. in color.,

Hardcover

ISBN: 978-3-319-42407-1
