

# Contents

## Full Papers

The Natural Biped, Birds and Humans: An Inspiration for Bipedal Robots. . . .	3
<i>Anick Abourachid and Vincent Hugel</i>	
Retina Color-Opponency Based Pursuit Implemented Through Spiking Neural Networks in the Neurobotics Platform . . . . .	16
<i>Alessandro Ambrosano, Lorenzo Vannucci, Ugo Albanese, Murat Kirtay, Egidio Falotico, Pablo Martínez-Cañada, Georg Hinkel, Jacques Kaiser, Stefan Ulbrich, Paul Levi, Christian Morillas, Alois Knoll, Marc-Oliver Gewaltig, and Cecilia Laschi</i>	
A Two-Fingered Anthropomorphic Robotic Hand with Contact-Aided Cross Four-Bar Mechanisms as Finger Joints . . . . .	28
<i>Guochao Bai, Jieyu Wang, and Xianwen Kong</i>	
Living Designs . . . . .	40
<i>Rina Bernabei and Jacqueline Power</i>	
iCub Visual Memory Inspector: Visualising the iCub’s Thoughts . . . . .	48
<i>Daniel Camilleri, Andreas Damianou, Harry Jackson, Neil Lawrence, and Tony Prescott</i>	
A Preliminary Framework for a Social Robot “Sixth Sense”. . . . .	58
<i>Lorenzo Cominelli, Daniele Mazzei, Nicola Carbonaro, Roberto Garofalo, Abolfazl Zarak, Alessandro Tognetti, and Danilo De Rossi</i>	
A Bio-Inspired Photopatterning Method to Deposit Silver Nanoparticles onto Non Conductive Surfaces Using Spinach Leaves Extract in Ethanol . . . .	71
<i>Marc P.Y. Desmulliez, David E. Watson, Jose Marques-Hueso, and Jack Hoy-Gig Ng</i>	
Leg Stiffness Control Based on “TEGOTAE” for Quadruped Locomotion . . .	79
<i>Akira Fukuhara, Dai Owaki, Takeshi Kano, and Akio Ishiguro</i>	
Wall Following in a Semi-closed-loop Fly-Robotic Interface. . . . .	85
<i>Jiaqi V. Huang, Yilin Wang, and Holger G. Krapp</i>	
Sensing Contact Constraints in a Worm-like Robot by Detecting Load Anomalies . . . . .	97
<i>Akhil Kandhari, Andrew D. Horchler, George S. Zucker, Kathryn A. Daltorio, Hillel J. Chiel, and Roger D. Quinn</i>	

Head-Mounted Sensory Augmentation Device: Comparing Haptic and Audio Modality . . . . .	107
<i>Hamideh Kerdegari, Yeongmi Kim, and Tony J. Prescott</i>	
Visual Target Sequence Prediction via Hierarchical Temporal Memory Implemented on the iCub Robot . . . . .	119
<i>Murat Kirtay, Egidio Falotico, Alessandro Ambrosano, Ugo Albanese, Lorenzo Vannucci, and Cecilia Laschi</i>	
Computer-Aided Biomimetics . . . . .	131
<i>Ruben Kruiper, Jessica Chen-Burger, and Marc P.Y. Desmulliez</i>	
A Neural Network with Central Pattern Generators Entrained by Sensory Feedback Controls Walking of a Bipedal Model . . . . .	144
<i>Wei Li, Nicholas S. Szczecinski, Alexander J. Hunt, and Roger D. Quinn</i>	
Towards Unsupervised Canine Posture Classification via Depth Shadow Detection and Infrared Reconstruction for Improved Image Segmentation Accuracy . . . . .	155
<i>Sean Mealin, Steven Howell, and David L. Roberts</i>	
A Bio-Inspired Model for Visual Collision Avoidance on a Hexapod Walking Robot . . . . .	167
<i>Hanno Gerd Meyer, Olivier J.N. Bertrand, Jan Paskarkeit, Jens Peter Lindemann, Axel Schneider, and Martin Egelhaaf</i>	
MIRO: A Robot “Mammal” with a Biomimetic Brain-Based Control System . . . . .	179
<i>Ben Mitchinson and Tony J. Prescott</i>	
A Hydraulic Hybrid Neuroprosthesis for Gait Restoration in People with Spinal Cord Injuries . . . . .	192
<i>Mark J. Nandor, Sarah R. Chang, Rudi Kobetic, Ronald J. Triolo, and Roger Quinn</i>	
Principal Component Analysis of Two-Dimensional Flow Vector Fields on Human Facial Skin for Efficient Robot Face Design . . . . .	203
<i>Nobuyuki Ota, Hisashi Ishihara, and Minoru Asada</i>	
Learning to Balance While Reaching: A Cerebellar-Based Control Architecture for a Self-balancing Robot . . . . .	214
<i>Maximilian Ruck, Ivan Herreros, Giovanni Maffei, Martí Sánchez-Fibla, and Paul Verschure</i>	
Optimizing Morphology and Locomotion on a Corpus of Parametric Legged Robots . . . . .	227
<i>Grégoire Passault, Quentin Rouxel, Remi Fabre, Steve N’Guyen, and Olivier Ly</i>	

Stick(y) Insects — Evaluation of Static Stability for Bio-inspired Leg Coordination in Robotics . . . . .	239
<i>Jan Paskarheit, Marc Otto, Malte Schilling, and Axel Schneider</i>	
Navigate the Unknown: Implications of Grid-Cells “Mental Travel” in Vicarious Trial and Error . . . . .	251
<i>Diogo Santos-Pata, Riccardo Zucca, and Paul F.M.J. Verschure</i>	
Insect-Inspired Visual Navigation for Flying Robots . . . . .	263
<i>Andrew Philippides, Nathan Steadman, Alex Dewar, Christopher Walker, and Paul Graham</i>	
Perceptive Invariance and Associative Memory Between Perception and Semantic Representation USER a Universal SEMantic Representation Implemented in a System on Chip (SoC) . . . . .	275
<i>Patrick Pirim</i>	
Thrust-Assisted Perching and Climbing for a Bioinspired UAV . . . . .	288
<i>Morgan T. Pope and Mark R. Cutkosky</i>	
The EASEL Project: Towards Educational Human-Robot Symbiotic Interaction . . . . .	297
<i>Dennis Reidsma, Vicky Charisi, Daniel Davison, Frances Wijnen, Jan van der Meij, Vanessa Evers, David Cameron, Samuel Fernando, Roger Moore, Tony Prescott, Daniele Mazzei, Michael Pieroni, Lorenzo Cominelli, Roberto Garofalo, Danilo De Rossi, Vasiliki Vouloutsis, Riccardo Zucca, Klaudia Grechuta, Maria Blancas, and Paul Verschure</i>	
Wasp-Inspired Needle Insertion with Low Net Push Force . . . . .	307
<i>Tim Sprang, Paul Breedveld, and Dimitra Dodou</i>	
Use of Bifocal Objective Lens and Scanning Motion in Robotic Imaging Systems for Simultaneous Peripheral and High Resolution Observation of Objects . . . . .	319
<i>Gašper Škulj and Drago Bračun</i>	
MantisBot Uses Minimal Descending Commands to Pursue Prey as Observed in <i>Tenodera Sinensis</i> . . . . .	329
<i>Nicholas S. Szczecinski, Andrew P. Getsy, Jacob W. Bosse, Joshua P. Martin, Roy E. Ritzmann, and Roger D. Quinn</i>	
Eye-Head Stabilization Mechanism for a Humanoid Robot Tested on Human Inertial Data . . . . .	341
<i>Lorenzo Vannucci, Egidio Falotico, Silvia Tolu, Paolo Dario, Henrik Hautop Lund, and Cecilia Laschi</i>	

Towards a Synthetic Tutor Assistant: The EASEL Project and its Architecture . . . . .	353
<i>Vasiliki Vouloutsis, Maria Blancas, Riccardo Zucca, Pedro Omedas, Dennis Reidsma, Daniel Davison, Vicky Charisi, Frances Wijnen, Jan van der Meij, Vanessa Evers, David Cameron, Samuel Fernando, Roger Moore, Tony Prescott, Daniele Mazzei, Michael Pieroni, Lorenzo Cominelli, Roberto Garofalo, Danilo De Rossi, and Paul F.M.J. Verschure</i>	
<i>Aplysia Californica</i> as a Novel Source of Material for Biohybrid Robots and Organic Machines . . . . .	365
<i>Victoria A. Webster, Katherine J. Chapin, Emma L. Hawley, Jill M. Patel, Ozan Akkus, Hillel J. Chiel, and Roger D. Quinn</i>	
A Soft Pneumatic Maggot Robot . . . . .	375
<i>Tianqi Wei, Adam Stokes, and Barbara Webb</i>	
<b>Short Papers</b>	
On Three Categories of Conscious Machines . . . . .	389
<i>Xerxes D. Arsiwalla, Ivan Herreros, and Paul Verschure</i>	
Gaussian Process Regression for a Biomimetic Tactile Sensor . . . . .	393
<i>Kirsty Aquilina, David A.W. Barton, and Nathan F. Lepora</i>	
Modulating Learning Through Expectation in a Simulated Robotic Setup. . . . .	400
<i>Maria Blancas, Riccardo Zucca, Vasiliki Vouloutsis, and Paul F.M.J. Verschure</i>	
Don't Worry, We'll Get There: Developing Robot Personalities to Maintain User Interaction After Robot Error . . . . .	409
<i>David Cameron, Emily Collins, Hugo Cheung, Adriel Chua, Jonathan M. Aitken, and James Law</i>	
Designing Robot Personalities for Human-Robot Symbiotic Interaction in an Educational Context . . . . .	413
<i>David Cameron, Samuel Fernando, Abigail Millings, Michael Szollosy, Emily Collins, Roger Moore, Amanda Sharkey, and Tony Prescott</i>	
A Biomimetic Fingerprint Improves Spatial Tactile Perception . . . . .	418
<i>Luke Cramphorn, Benjamin Ward-Cherrier, and Nathan F. Lepora</i>	
Anticipating Synchronisation for Robot Control . . . . .	424
<i>Henry Eberle, Slawomir Nasuto, and Yoshikatsu Hayashi</i>	
MantisBot: The Implementation of a Photonic Vision System. . . . .	429
<i>Andrew P. Getsy, Nicholas S. Szczecinski, and Roger D. Quinn</i>	

Force Sensing with a Biomimetic Fingertip . . . . .	436
<i>Maria Elena Giannaccini, Stuart Whyte, and Nathan F. Lepora</i>	
Understanding Interlimb Coordination Mechanism of Hexapod Locomotion via “TEGOTAE”-Based Control . . . . .	441
<i>Masashi Goda, Sakiko Miyazawa, Susumu Itayama, Dai Owaki, Takeshi Kano, and Akio Ishiguro</i>	
Decentralized Control Scheme for Myriapod Locomotion That Exploits Local Force Feedback . . . . .	449
<i>Takeshi Kano, Kotaro Yasui, Dai Owaki, and Akio Ishiguro</i>	
TEGOTAE-Based Control Scheme for Snake-Like Robots That Enables Scaffold-Based Locomotion . . . . .	454
<i>Takeshi Kano, Ryo Yoshizawa, and Akio Ishiguro</i>	
Modelling the Effect of Cognitive Load on Eye Saccades and Reportability: The Validation Gate . . . . .	459
<i>Sock C. Low, Joeri B.G. van Wijngaarden, and Paul F.M.J. Verschure</i>	
Mutual Entrainment of Cardiac-Oscillators Through Mechanical Interaction . . .	467
<i>Koki Maekawa, Naoki Inoue, Masahiro Shimizu, Yoshihiro Isobe, Taro Saku, and Koh Hosoda</i>	
“TEGOTAE”-Based Control of Bipedal Walking . . . . .	472
<i>Dai Owaki, Shun-ya Horikiri, Jun Nishii, and Akio Ishiguro</i>	
Tactile Vision – Merging of Senses. . . . .	480
<i>Nedyalka Panova, Alexander C. Thompson, Francisco Tenopala-Carmona, and Ifor D.W. Samuel</i>	
Tactile Exploration by Contour Following Using a Biomimetic Fingertip . . .	485
<i>Nicholas Pestell, Benjamin Ward-Cherrier, Luke Cramphorn, and Nathan F. Lepora</i>	
Towards Self-controlled Robots Through Distributed Adaptive Control . . . .	490
<i>Jordi-Ysard Puigbò, Clément Moulin-Frier, and Paul F.M.J. Verschure</i>	
Discrimination-Based Perception for Robot Touch. . . . .	498
<i>Emma Roscow, Christopher Kent, Ute Leonards, and Nathan F. Lepora</i>	
On Rock-and-Roll Effect of Quadruped Locomotion: From Mechanical and Control-Theoretical Viewpoints. . . . .	503
<i>Ryoichi Kuratani, Masato Ishikawa, and Yasuhiro Sugimoto</i>	
Hydromast: A Bioinspired Flow Sensor with Accelerometers . . . . .	510
<i>Asko Ristolainen, Jeffrey Andrew Tuhtan, Alar Kuusik, and Maarja Kruusmaa</i>	

Developing an Ecosystem for Interactive Electronic Implants . . . . . 518  
*Paul Strohmeier, Cedric Honnet, and Samppa von Cyborg*

Gait Analysis of 6-Legged Robot with Actuator-Equipped Trunk and Insect  
Inspired Body Structure . . . . . 526  
*Yasuhiro Sugimoto, Yuji Kito, Yuichiro Sueoka, and Koichi Osuka*

Quadruped Gait Transition from Walk to Pace to Rotary Gallop  
by Exploiting Head Movement . . . . . 532  
*Shura Suzuki, Dai Owaki, Akira Fukuhara, and Akio Ishiguro*

Exploiting Symmetry to Generalize Biomimetic Touch . . . . . 540  
*Benjamin Ward-Cherrier, Luke Cramphorn, and Nathan F. Lepora*

Decentralized Control Scheme for Centipede Locomotion Based on Local  
Reflexes. . . . . 545  
*Kotaro Yasui, Takeshi Kano, Dai Owaki, and Akio Ishiguro*

Realization of Snakes’ Concertina Locomotion  
by Using “TEGOTAE-Based Control”. . . . . 548  
*Ryo Yoshizawa, Takeshi Kano, and Akio Ishiguro*

**Author Index . . . . . 553**

Biomimetic and Biohybrid Systems

5th International Conference, Living Machines 2016,

Edinburgh, UK, July 19-22, 2016. Proceedings

Lepora, N.F.; Mura, A.; Mangan, M.; Verschure, P.F.M.J.;

Desmulliez, M.; Prescott, T.J. (Eds.)

2016, XVI, 555 p. 302 illus., Softcover

ISBN: 978-3-319-42416-3
