## Part I Symmetric Spaces. The Spaces $L_p$ , $L_1 \cap L_\infty$ , $L_1 + L_\infty$

<b>1</b>	<b>Definition of Symmetric Spaces</b> .....	5
1.1	Distribution Functions, Equimeasurable Functions.....	5
1.2	Generalized Inverse Functions.....	9
1.3	Decreasing Rearrangements .....	11
1.4	Integrals of Equimeasurable Functions.....	12
1.5	Definition of Symmetric Spaces .....	13
1.6	Example. $L_p$ , $1 \leq p \leq \infty$ .....	14
<b>2</b>	<b>Spaces <math>L_p</math>, <math>1 \leq p \leq \infty</math></b> .....	17
2.1	Hölder's and Minkowski's Inequalities .....	17
2.2	Completeness of $L_p$ .....	21
2.3	Separability of $L_p$ , $1 \leq p < \infty$ .....	23
2.4	Duality .....	24
<b>3</b>	<b>The Space <math>L_1 \cap L_\infty</math></b> .....	29
3.1	The Intersection of the Spaces $L_1$ and $L_\infty$ .....	29
3.2	The Space $L_\infty^0$ .....	30
3.3	Approximation by Step Functions .....	33
3.4	Measure-Preserving Transformations .....	35
3.5	Approximation by Simple Integrable Functions .....	38
<b>4</b>	<b>The Space <math>L_1 + L_\infty</math></b> .....	41
4.1	The Maximal Property of Decreasing Rearrangements .....	41
4.2	The Sum of $L_1$ and $L_\infty$ .....	45
4.3	Embeddings $L_1 \subseteq L_1 + L_\infty$ and $L_\infty \subseteq L_1 + L_\infty$ . The Space $R_0$ .....	49
	Exercises .....	51
	Notes.....	55

**Part II Symmetric Spaces. The Embedding Theorem.****Properties (A), (B), (C)**

<b>5</b>	<b>Embeddings <math>L_1 \cap L_\infty \subseteq X \subseteq L_1 + L_\infty \subseteq L_0</math></b>	59
5.1	Fundamental Functions	59
5.2	The Embedding Theorem $L_1 \cap L_\infty \subseteq X \subseteq L_1 + L_\infty$	61
5.3	The Space $L_0$ and the Embedding $L_1 + L_\infty \subset L_0$	66
<b>6</b>	<b>Embeddings. Minimality and Separability. Property (A)</b>	71
6.1	Embedded Symmetric Spaces	71
6.2	The Intersection and the Sum of Two Symmetric Spaces	73
6.3	Minimal Symmetric Spaces	75
6.4	Minimality and Separability	76
6.5	Separability and Property (A)	79
<b>7</b>	<b>Associate Spaces</b>	83
7.1	Dual and Associate Spaces	83
7.2	The Maximal Property of Products $f^*g^*$	85
7.3	Examples of Associate Spaces	90
7.4	Comparison of $X^1$ and $X^*$	92
<b>8</b>	<b>Maximality. Properties (B) and (C)</b>	95
8.1	The Second Associate Space	95
8.2	Maximality and Property (B)	97
8.3	Embedding $X \subseteq X^{11}$ and Property (C)	98
8.4	Property (AB). Reflexivity	103
	Exercises	106
	Notes	109

**Part III Lorentz and Marcinkiewicz Spaces**

<b>9</b>	<b>Lorentz Spaces</b>	115
9.1	Definition of Lorentz Spaces	115
9.2	Maximality. Fundamental Functions of Lorentz Spaces	119
9.3	Minimal and Separable Lorentz Spaces	120
9.4	Four Types of Lorentz Spaces	124
<b>10</b>	<b>Quasiconcave Functions</b>	127
10.1	Fundamental Functions and Quasiconcave Functions	127
10.2	Examples of Quasiconcave Functions	128
10.3	The Least Concave Majorant	130
10.4	Quasiconcavity of Fundamental Functions	135
10.5	Quasiconvex Functions	136
<b>11</b>	<b>Marcinkiewicz Spaces</b>	139
11.1	The Maximal Function $f^{**}$	139
11.2	Definition of Marcinkiewicz Spaces	143
11.3	Duality of Lorentz and Marcinkiewicz Spaces	144
11.4	Examples of Marcinkiewicz Spaces	147

<b>12</b>	<b>Embedding <math>A_{\psi}^0 \subseteq X \subseteq M_{\psi^*}</math></b>	151
12.1	The Embedding Theorem	151
12.2	The Renorming Theorem	156
12.3	Examples of Lorentz and Marcinkiewicz Spaces	157
12.4	Comparison of Lorentz and Marcinkiewicz Spaces	162
	Exercises	163
	Notes	166

## Part IV Orlicz Spaces

<b>13</b>	<b>Definition and Examples of Orlicz Spaces</b>	171
13.1	Orlicz Functions	171
13.2	Orlicz Spaces	173
13.3	Fundamental Functions of Orlicz Spaces	177
13.4	Examples of Orlicz Spaces	178
<b>14</b>	<b>Separable Orlicz Spaces</b>	183
14.1	Young Classes $Y_{\phi}$ and Subspaces $H_{\phi}$	183
14.2	Separability Conditions for Orlicz Spaces	185
14.3	The $(\Delta_2)$ Condition	190
14.4	Examples of Orlicz Spaces with and Without the $(\Delta_2)$ Condition	192
<b>15</b>	<b>Duality for Orlicz Spaces</b>	195
15.1	The Legendre Transform	195
15.2	The Geometric Interpretation	197
15.3	Duality for Orlicz Spaces	200
15.4	Duality and the $(\Delta_2)$ Condition. Reflexivity	205
<b>16</b>	<b>Comparison of Orlicz Spaces</b>	207
16.1	Comparison of Orlicz Spaces	207
16.2	The Embedding Theorem for Orlicz Spaces	209
16.3	The Coincidence Theorem for Orlicz Spaces	212
16.4	Zygmund Classes	213
<b>17</b>	<b>Intersections and Sums of Orlicz Spaces</b>	217
17.1	The Intersection and the Sum of Orlicz Spaces	217
17.2	The Spaces $L_{\phi} + L_{\infty}$ and $L_{\psi} \cap L_1$	220
17.3	The Spaces $L_{\phi} + L_1$ and $L_{\psi} \cap L_{\infty}$	223
17.4	The Spaces $L_p \cap L_q$ and $L_p + L_q$ , $1 \leq p \leq q \leq \infty$	224
	Exercises	229
	Notes	234
	<b>Complements</b>	237
1	Symmetric Spaces on General Measure Spaces	237
2	Symmetric Spaces on $[0, 1]$	239
3	Symmetric Sequence Spaces	241

4	The Spaces $L_p$ , $0 < p < 1$ .....	243
5	Weak Sequential Completeness. Property $(AB)$ .....	245
6	The Least Concave Majorant .....	246
7	The Minimal Part $M_V^0$ of the Marcinkiewicz Space $M_V$ .....	247
8	Lorentz Spaces $L_{p,q}$ and Orlicz–Lorentz Spaces.....	248
<b>References</b> .....		251
<b>Index</b> .....		255

Foundations of Symmetric Spaces of Measurable  
Functions

Lorentz, Marcinkiewicz and Orlicz Spaces

Rubshtein, B.-Z.A.; Grabarnik, G.Y.; Muratov, M.A.;  
Pashkova, Y.S.

2016, XVII, 259 p. 90 illus., Hardcover
