

Contents

Part I Overview of Accelerated Pavement Testing

| | |
|--|---|
| A Brief History of Full-Scale Accelerated Pavement Testing Facilities to 1962 | 3 |
| John B. Metcalf | |

| | |
|---|----|
| Four Decades of the Circular Test Track at the Institute of Engineering UNAM Contributing to Pavement Research in Mexico | 17 |
| Noé Hernández, Alexandra Ossa and Francisco A. Rangel | |

Part II Establishment of New Accelerated Pavement Testing Facilities

| | |
|---|----|
| Design and Engineering Challenges in the Development of the FAA's Full Scale Accelerated Pavement Test Facility NAPMRC | 37 |
| Murphy Flynn, Navneet Garg, Wilfredo Villafane and David Traverzo | |

| | |
|--|----|
| Heavy Vehicle Simulator and Accelerated Pavement Testing Facility at Rowan University | 53 |
| Ayman W. Ali and Yusuf Mehta | |

Part III General Accelerated Pavement Testing

| | |
|---|----|
| A Link of Full-Scale Accelerated Pavement Testing to Long-Term Pavement Performance Study in the Western Cape Province of South Africa | 67 |
| J.K. Anochie-Boateng, W. JvdM Steyn, C. Fisher and L. Truter | |
| Accelerated Pavement Testing in Slovakia: APT Tester 105-03-01 | 81 |
| Lubos Remek, Jan Mikolaj, Matej Kyselica and Milan Škarupa | |

| | |
|--|------------|
| APT with the Mobile Load Simulator MLS10 Towards Non-destructive Pavement Structural Analysis | 95 |
| Bastian Wacker, Frédéric Otto, Pengfei Liu, Dawei Wang, Markus Oeser, Micha Buch and Ulf Zander | |
| Evaluating Nonlinearity on Granular Materials and Soils Through the Use of Deflection Techniques | 111 |
| Fabricio Leiva-Villacorta, Luis Loría-Salazar and Edgar Camacho-Garita | |
| Full Scale Accelerated Pavement Tests to Evaluate the Performance of Permeable and Skeletal Soil Block Pavement Systems. | 131 |
| Abubeker Ahmed, Fredrik Hellman and Sigurdur Erlingsson | |
| In-Situ Validation of Three-Dimensional Pavement Finite Element Models. | 145 |
| Osman Erman Gungor, Imad L. Al-Qadi, Angeli Gamez and Jaime A. Hernandez | |
| Investigation of 3D-Move Responses Under Traffic Speed Deflection Devices (TSDDs) | 161 |
| Mahdi Nasimifar, Raj S. Siddharthan, Elie Y. Hajj and Ramin Motamed | |
| Long-Term Pavement Performance Monitoring and the Revision of Performance Criteria for High Modulus Asphalt in South Africa | 177 |
| Julius Komba, Joseph Anochie-Boateng, Johan O'Connell and Benoit Verhaeghe | |
| Optimum Properties of Geocell Reinforcement for Sustainable Low-Volume Paved Roads | 195 |
| B. Bortz and M. Hossain | |
| Perspectives on Trends in International APT Research. | 211 |
| W. JvdM Steyn and F. Hugo | |
| Potential Benefits of APTF for Evaluation of Flexible Pavement for Its Permanent Deformation Behaviour | 227 |
| M.N. Nagabhushana, Shahbaz Khan, Abhishek Mittal and Devesh Tiwari | |
| Study of the Bearing Capacity of Swiss Standard Pavements Under MLS10 Loading. | 241 |
| Martin Arraigada, Andreas Treuholz and Manfred N. Partl | |
| The Development of APT Methodology in the Application and Derivation of Geosynthetic Benefits in Roadway Design. | 257 |
| Jonathan Cook, Michael Dobie and David Blackman | |
| Tire Type Effect on Pavement Responses; Accelerated Pavement Testing Results | 277 |
| Mojtaba Ziyadi and Imad L. Al-Qadi | |

Part IV Accelerated Pavement Testing Focused on Mechanistic— Empirical Pavement Design Procedures and Models

| | |
|--|------------|
| Analysis of Dynamic Response of Asphalt Pavement in Heavy Vehicle Simulator Tests | 291 |
| Aimin Sha, Jie Wang, Liquan Hu and Xiaolong Zou | |

| | |
|---|------------|
| Automating Mechanistic-Empirical Pavement Design Calibration Studies | 309 |
| Xiaolong Guo and David H. Timm | |

| | |
|---|------------|
| Calibration of ME Design Using a Combination of APT and PMS Data | 321 |
| Jeremy D. Lea, Rongzong Wu and John T. Harvey | |

| | |
|--|------------|
| Key Concepts in Dynamic Signal Processing from Instrumented Pavement Sections | 335 |
| David H. Timm | |

| | |
|--|------------|
| Protocols for Accelerated Pavement Testing of Fully Permeable Pavements | 351 |
| D. Jones, R. Wu and H. Li | |

Part V Accelerated Pavement Testing on Asphalt Concrete Pavements

| | |
|--|------------|
| Behavior Evolution on Performance of UV-Irradiation Aged Asphalt Mixtures Under Reduced-Scale Accelerated Trafficking | 373 |
| Jinting Wu, Fen Ye, Frederick Hugo, Yinting Wu, Feng Wang and Xinhui Ding | |

| | |
|---|------------|
| Effects of Binder and Mix Properties on the Mechanistic Responses of Fatigue Cracking APT Sections | 393 |
| Daba S. Gedafa, Mustaque Hossain, Stefan A. Romanoschi and Mbakisya A. Onyango | |

| | |
|---|------------|
| Evaluating Resistance of Hot Mix Asphalt Overlays to Reflective Cracking Using Geocomposites and Accelerated Loading | 407 |
| Mansour Solaimanian, Ghassan Chehab and Marcelo Medeiros | |

| | |
|--|------------|
| Optimum Tack Rate for Hot-Mix Asphalt Bonding | 419 |
| A. Sufian, M. Hossain and G. Schieber | |

| | |
|--|------------|
| Rutting Resistance of Asphalt Mixes Containing Highly Modified Asphalt (HiMA) Binders at the Accelerated Pavement Load Facility in Ohio | 429 |
| Issam Khoury, Shad Sargand, Roger Green, Benjamin Jordan and Paul Cichocki | |

| | |
|---|------------|
| Structural Study of Perpetual Pavement Performance in Ohio | 441 |
| Issam Khoury, Shad Sargand, Benjamin Jordan, Paul Cichocki and Matthew Sheer | |
| Study of In-Service Asphalt Pavement High-Temperature Deformation Based on Accelerated Pavement Test. | 461 |
| Liping Liu, Yu Yuan and Lijun Sun | |
| Thickness and Binder Type Evaluation of a 4.75-mm Asphalt Mixture Using Accelerated Pavement Testing | 475 |
| James Howard Greene and Bouzid Choubane | |
| Towards Understanding Tyre-Pavement Contact in APT Research on Flexible Pavements | 491 |
| Morris De Beer and Colin Fisher | |
| Use of APT for Validating the Efficiency of Reinforcement Grids in Asphalt Pavements | 509 |
| Martin Arraigada, Federico Perrotta, Christiane Raab, Gabriele Tebaldi and Manfred N. Partl | |
| Part VI Accelerated Pavement Testing on Airports | |
| Estimation of In-Situ Shear Strength Parameters for Subgrade Layer Using Non-destructive Testing. | 525 |
| Hadi Nabizadeh, Elie Y. Hajj, Raj V. Siddharthan, Sherif Elfass and Peter E. Sebaaly | |
| Understanding Airfield Pavement Responses Under High Tire Pressure: Full-Scale Testing and Numerical Modeling. | 539 |
| Hao Wang, Navneet Garg and Maoyun Li | |
| Use of Ground Penetrating Radar at the FAA's National Airport Pavement Test Facility (NAPTF). | 555 |
| Injun Song and Albert Larkin | |
| Part VII Relating Laboratory Tests to Performance Using Accelerated Pavement Testing | |
| Development and Calibration of Permanent Deformation Models | 573 |
| Fabricio Leiva-Villacorta, Adriana Vargas-Nordbeck, José Pablo Aguiar-Moya and Luis Loría-Salazar | |
| Laboratory Tack Coat Investigation of Factors Contributing to Debonding Observed at the NCAT Test Track | 589 |
| Michael C. Vrtis and David H. Timm | |

| | |
|---|------------|
| Research Partnership Between the National Center for Asphalt Technology (NCAT) and the Minnesota Department of Transportation MnROAD Facility for a Nationwide Pavement Performance Experiment | 601 |
| R. Buzz Powell and Ben Worel | |

Part VIII Instrumentation for Accelerated Pavement Testing

| | |
|---|------------|
| Development and Validation of a Nondestructive Methodology to Measure Subgrade Moisture Contents at the NCAT Pavement Test Track | 621 |
| R. Buzz Powell | |

| | |
|---|------------|
| Development of a New Pavement Strain Coil Measuring System at CAPTIF | 633 |
| F.R. Greenslade | |

| | |
|--|------------|
| Effects of Surface Condition on Non-uniform Contact Stresses of APT Tests | 645 |
| W. JvdM Steyn and J. Maina | |

| | |
|---|------------|
| Electronic Upgrade of a Standard Benkelman Beam to Enable Capture of Full Bowl Deflections | 659 |
| F.R. Greenslade | |

| | |
|--|------------|
| Evaluation of Weight in Motion Sensors on the IFSTTAR Accelerated Testing Facility | 671 |
| Pierre Hornyh, Jean-Michel Simonin, Jean-Michel Piau, Louis-Marie Cottineau, Ivan Gueguen and B. Jacob | |

| | |
|---|------------|
| Influence of Tire Footprint Area and Pressure Distribution on Pavement Responses | 685 |
| Fabricio Leiva-Villacorta, Adriana Vargas-Nordcbeck, José P. Aguiar-Moya and Luis Loría-Salazar | |

| | |
|--|------------|
| Instrumentation of an Innovative Pavement Section on Motorway A10 | 701 |
| Ngoc Son Duong, Juliette Blanc and Pierre Hornyh | |

Part IX Accelerated Pavement Testing on Portland Cement Concrete Pavements

| | |
|--|------------|
| Design, Instrumentation and Construction of Bonded Concrete Overlays for Accelerated Pavement Testing | 717 |
| Julio Paniagua, Fabian Paniagua, Angel Mateos, John Harvey and Rongzong Wu | |

| | |
|--|------------|
| Performance of Thin RCC Pavements Under Accelerated Loading | 735 |
| Zhong Wu, Moinul Mahdi and Tyson Rupnow | |
| The Design, Construction and First-Phase Heavy Vehicle Simulator Testing Results on Full Scale Ultra-Thin Reinforced Concrete Test Sections at Rayton, South Africa | 751 |
| L. du Plessis, G.J. Jordaan, P.J. Strauss and A. Kilian | |
| The Design, Construction and Heavy Vehicle Simulator Testing Results on Roller Compacted Concrete Test Sections at the CSIR Innovation Site and on a Full-Scale Test Road at Rayton | 769 |
| L. du Plessis, G. Rugodho, W. Govu, K. Mngaza and S. Musundi | |
| Part X Accelerated Pavement Testing to Evaluate Functional Performance | |
| Assessment of Flexible Pavement Response During Freezing and Thawing from Indoor Heavy Vehicle Simulator Testing | 787 |
| Ahmed El-yousoufy, Guy Dore, Jean-Pascal Bilodeau and Fritz Prophète | |
| Development of IRI Models Based on APT Data | 799 |
| José P. Aguiar-Moya, Pablo A. Torres-Linares, Edgar Camacho-Garita, Fabricio Leiva-Villacorta and Luis G. Loría-Salazar | |
| Permanent Deformation of an Unbound Granular Pavement Subjected to Accelerated Multiple-Axle Group Loads | 815 |
| Michael A. Moffatt | |
| Three Years' Monitoring of IRRF Instrumented Test Road | 829 |
| Leila Hashemian and Alireza Bayat | |
| Part XI Accelerated Pavement Testing to Evaluate Sustainable Materials | |
| Comparative Evaluation of Performance of Warm Mix RAP Asphalt Under Accelerated Unidirectional Wheelload Trafficking | 847 |
| Yucheng Huang, Fred Hugo, W. JvdM Steyn, Haocheng Xiong and Linbing Wang | |
| Evaluation of the Optimum Percentage of RAP and RAS in Asphalt Mixes in Texas Using Accelerate Pavement Testing | 863 |
| Stefan A. Romanoschi, Tom Scullion, Fajie Zhou and Reza Saeedzadeh | |

**Field Performance Evaluations of Large Sized Unconventional
and Recycled Aggregates for Subgrade Improvement 877**
Hasan Kazmee, Erol Tutumluer and Debakanta Mishra

**Structural Assessment of the Effect of a Cement-Stabilized Base
Combined with a Cold Central-Plant Recycled Layer at the NCAT
Test Track 891**
M.A. Díaz-Sánchez, D.H. Timm and B.K. Diefenderfer

The Roles of Accelerated Pavement Testing in
Pavement Sustainability

Engineering, Environment, and Economics

Aguiar-Moya, J.P.; Vargas-Nordcbeck, A.;

Leiva-Villacorta, F.; Loría-Salazar, L.G. (Eds.)
