

Contents

- 1 Introducing Patagonia: An Approach from Geo-History 1**
Fernando Coronato

Part I Environmental Microbial Biotechnology

- 2 Molecular Biological Tools for the Assessment of Hydrocarbon-Degrading Potential in Coastal Environments 15**
Mariana Lozada and Hebe M. Dionisi
- 3 Indigenous PAH-Degrading Bacteria in Oil-Polluted Marine Sediments from Patagonia: Diversity and Biotechnological Properties 31**
Paula Isaac, Natalia Bourguignon, Daniela Maizel, and Marcela A. Ferrero
- 4 Hydrocarbon Remediation by Patagonian Microbial Consortia 43**
Marina L. Nievas, Rosana Polifroni, Federico del Brio, and Marcela A. Sepúlveda
- 5 Assessment of Microbial Patagonian Communities for Using in Heavy Metal Bioremediation 71**
Ana Belén Segretin, María Alejandra Lima, Graciana Willis Poratti, María Sofía Urbietta, Cecilia Bernardelli, Alejandra Giaveno, and Edgardo Donati
- 6 Microbiological and Biochemical Indicators for Assessing Soil Quality in Drylands from Patagonia. 91**
Magalí S. Marcos and Nelda Lila Olivera

Part II Patagonian Microorganisms for Industrial and Sanitary Applications

- 7 Molecular Ecology of Class 1 Integrations in Patagonia as Model System for Understanding the Rise of Antibiotic Resistance Isolates Around the World 111**
Verónica Elizabeth Álvarez, María Paula Quiroga,
Gabriel Alejandro Castro, Marcelo Hernán Cassini,
and Daniela Centrón
- 8 Novel Sources of Antimicrobials from Pristine and Poorly Explored Environments. The Patagonia Microbiota Case 127**
Gonzalo V. Arnau, Mariana E. Danilovich, Leandro A. Sánchez,
Federico Acosta, and Osvaldo Delgado
- 9 Bioprospecting for Bioactive Actinomycetes from Patagonia 147**
María Soledad Vela Gurovic
- 10 Microorganisms from Patagonia and Antarctica and Their Cold-Active Skills for Using Polymeric Materials 155**
Fiorella F. Gomez, Jaime D. Babot, Gustavo A. Lovrich,
Faustino Siñeriz, and Osvaldo Delgado
- 11 Alkaline Proteases from Patagonian Bacteria 169**
Nelda Lila Olivera, Martín S. Iglesias, and Cynthia Sequeiros
- 12 Extremophilic Patagonian Microorganisms Working in Biomining 185**
Patricia Chiacchiarini, Laura Lavalle, María Sofía Urbieto,
Ricardo Ulloa, Edgardo Donati, and Alejandra Giaveno
- 13 Microorganisms from Patagonian Aquatic Environments for Use in Aquaculture 205**
Cynthia Sequeiros, Marisa E. Garcés, Melania Fernández,
Sergio F. Martínez Díaz, Diego Libkind, and Nelda Lila Olivera
- 14 Indigenous Lactic Acid Bacteria Communities Associated with Spontaneous Malolactic Fermentations in Patagonian Wines: Basic and Applied Aspects. 225**
Danay Valdés La Hens, Bárbara M. Bravo-Ferrada, Natalia S. Brizuela,
Elizabeth E. Tymczynsyn, Axel Hollmann, Lucrecia Delfederico,
and Liliana Semorile

Part III Yeast Biotechnology

- 15 *Saccharomyces* in Traditional and Industrial Fermentations from Patagonia 251**
María Eugenia Rodríguez, Andrea Cecilia Origone,
Melisa González Flores, and Christian Ariel Lopes

16	Wild Yeasts Selection for High-Quality Patagonian Wines.	277
	Silvana María del Mónaco, Yolanda Leticia Curilén, Sebastián Mario Ezequiel Bravo, Adriana Beatriz Simes, Viviana Andrea Carreño, Ramona del Carmen Maturano, and Adriana Catalina Caballero	
17	Patagonian Antagonist Yeasts for Food Biopreservation	301
	María L. Villalba, María C. Lutz, Soffa Lopez, María B. Pildain, and Marcela P. Sangorrín	
18	Biotechnologically Relevant Yeasts from Patagonian Natural Environments	325
	Diego Libkind, Martin Moliné, Andrea Trochine, Nicolas Bellora, and Virginia de Garcia	
	Index.	353

Biology and Biotechnology of Patagonian
Microorganisms

Olivera, N.L.; Libkind, D.; Donati, E. (Eds.)

2016, XVII, 360 p. 73 illus., 37 illus. in color., Hardcover

ISBN: 978-3-319-42799-7
