1	Theory Review	1
1.1	Standard Notation	1
1.2	Projective Spaces and Subspaces, Projective Transformations	2
1.2.1	Projective Spaces and Subspaces	2
1.2.2	Projective Transformations	3
1.2.3	Operations on Subspaces	3
1.2.4	The Projective Linear Group	4
1.2.5	Fixed Points	4
1.2.6	Degenerate Projective Transformations	4
1.2.7	Projection Centred at a Subspace	5
1.2.8	Perspectivities	5
1.3	Projective Frames and Homogeneous Coordinates	5
1.3.1	General Position and Projective Frames	5
1.3.2	Systems of Homogeneous Coordinates	6
1.3.3	Analytic Representation of a Projective Transformation	7
1.3.4	Change of Projective Frames	7
1.3.5	Cartesian Representation of Subspaces	7
1.3.6	Parametric Representation of Subspaces	8
1.3.7	Extension of Projective Frames	9
1.3.8	Affine Charts	9
1.3.9	Projective Closure of an Affine Subspace	11
1.3.10	Projective Transformations and Change of Coordinates	11
1.4	Dual Projective Space and Duality	12
1.4.1	Dual Projective Space	12
1.4.2	Duality Correspondence	13
1.4.3	Linear Systems of Hyperplanes	13
1.4.4	Duality Principle	14
1.4.5	Dual Projectivity	15

1.5	Projective Spaces of Dimension 1	15
1.5.1	Cross-Ratio	15
1.5.2	Symmetries of the Cross-Ratio	16
1.5.3	Classification of the Projectivities of $\mathbb{P}^1(\mathbb{C})$ and of $\mathbb{P}^1(\mathbb{R})$	17
1.5.4	Characteristic of a Projectivity	18
1.6	Conjugation and Complexification	19
1.7	Affine and Projective Hypersurfaces	19
1.7.1	Homogeneous Polynomials	20
1.7.2	Affine and Projective Hypersurfaces	21
1.7.3	Intersection of a Hypersurface with a Hyperplane	23
1.7.4	Projective Closure of an Affine Hypersurface	24
1.7.5	Affine and Projective Equivalence of Hypersurfaces	25
1.7.6	Intersection of a Hypersurface and a Line	26
1.7.7	Tangent Space to a Hypersurface, Singular Points	27
1.7.8	Multiplicity of a Point of a Hypersurface	28
1.7.9	Real Hypersurfaces	29
1.8	Quadrics	31
1.8.1	First Notions and Projective Classification	31
1.8.2	Polarity with Respect to a Quadric	33
1.8.3	Intersection of a Quadric with a Line	35
1.8.4	Projective Quadrics in $\mathbb{P}^2(\mathbb{K})$ and in $\mathbb{P}^3(\mathbb{K})$	35
1.8.5	Quadrics in \mathbb{R}^n	39
1.8.6	Diametral Hyperplanes, Axes, Vertices	43
1.8.7	Conics of \mathbb{R}^2	45
1.8.8	Quadrics of \mathbb{R}^3	48
1.9	Plane Algebraic Curves	51
1.9.1	Local Study of a Plane Algebraic Curve	51
1.9.2	The Resultant of Two Polynomials	53
1.9.3	Intersection of Two Curves	54
1.9.4	Inflection Points	56
1.9.5	Linear Systems, Pencils	56
1.9.6	Linear Conditions	57
1.9.7	Pencils of Conics	58
2	Exercises on Projective Spaces	61
3	Exercises on Curves and Hypersurfaces	107
4	Exercises on Conics and Quadrics	173
	Index	263

Projective Geometry

Solved Problems and Theory Review

Fortuna, E.; Frigerio, R.; Pardini, R.

2016, XII, 266 p. 31 illus., Softcover

ISBN: 978-3-319-42823-9
