

# Contents

<b>1</b>	<b>The Skin Lipidome Under Environmental Stress—Technological Platforms, Molecular Pathways and Translational Opportunities . . . . .</b>	<b>1</b>
	Florian Gruber	
<b>2</b>	<b>Squalene and Skin Barrier Function: From Molecular Target to Biomarker of Environmental Exposure . . . . .</b>	<b>29</b>
	Boudiaf Boussouira and Dang Man Pham	
<b>3</b>	<b>Sunlight-Induced DNA Damage: Molecular Mechanisms and Photoprotection Strategies . . . . .</b>	<b>49</b>
	Thierry Douki	
<b>4</b>	<b>Urocanic Acid and Skin Photodamage: New Light on an Old Chromophore . . . . .</b>	<b>79</b>
	Leopold Eckhart	
<b>5</b>	<b>The Skin Extracellular Matrix as a Target of Environmental Exposure: Molecular Mechanisms, Prevention and Repair . . . . .</b>	<b>101</b>
	Kieran T. Mellody, Mike Bell and Michael J. Sherratt	
<b>6</b>	<b>Nitric Oxide Derivatives and Skin Environmental Exposure to Light: From Molecular Pathways to Therapeutic Opportunities . . . .</b>	<b>127</b>
	Christoph V. Suschek	
<b>7</b>	<b>Melanocortin 1 Receptor (MC1R) as a Global Regulator of Cutaneous UV Responses: Molecular Interactions and Opportunities for Melanoma Prevention . . . . .</b>	<b>155</b>
	Erin M. Wolf Horrell and John A. D’Orazio	
<b>8</b>	<b>The Cutaneous Melanocyte as a Target of Environmental Stressors: Molecular Mechanisms and Opportunities . . . . .</b>	<b>175</b>
	Laurent Marrot	

<b>9</b>	<b>The Role of Epidermal p38 Signaling in Solar UV Radiation-Induced Inflammation: Molecular Pathways and Preventive Opportunities . . . . .</b>	<b>197</b>
	Jin Mo Park and Yasuyo Sano	
<b>10</b>	<b>UV-Induced Chemokines as Emerging Targets for Skin Cancer Photochemoprevention . . . . .</b>	<b>211</b>
	Scott N. Byrne and Gary M. Halliday	
<b>11</b>	<b>TLR3 and Inflammatory Skin Diseases: From Environmental Factors to Molecular Opportunities . . . . .</b>	<b>235</b>
	Risa Tamagawa-Mineoka, Mayumi Ueta and Norito Katoh	
<b>12</b>	<b>Sirtuins and Stress Response in Skin Cancer, Aging, and Barrier Function . . . . .</b>	<b>251</b>
	Yu-Ying He	
<b>13</b>	<b>Cutaneous Opioid Receptors and Stress Responses: Molecular Interactions and Opportunities for Therapeutic Intervention . . . . .</b>	<b>265</b>
	Hanane Chajra	
<b>14</b>	<b>Regulation of Cutaneous Stress Response Pathways by the Circadian Clock: From Molecular Pathways to Therapeutic Opportunities . . . . .</b>	<b>281</b>
	Elyse van Spyk, Milton Greenberg, Faraj Mourad and Bogi Andersen	
<b>15</b>	<b>Endocannabinoids and Skin Barrier Function: Molecular Pathways and Therapeutic Opportunities . . . . .</b>	<b>301</b>
	Sergio Oddi and Mauro Maccarrone	
<b>16</b>	<b>The Aryl Hydrocarbon Receptor (AhR) as an Environmental Stress Sensor and Regulator of Skin Barrier Function: Molecular Mechanisms and Therapeutic Opportunities . . . . .</b>	<b>325</b>
	Rebecca Justiniano and Georg T. Wondrak	
<b>17</b>	<b>Biological Cell Protection by Natural Compounds, a Second Line of Defense Against Solar Radiation . . . . .</b>	<b>361</b>
	Ludger Kolbe	
<b>18</b>	<b>The Cutaneous Microbiota as a Determinant of Skin Barrier Function: Molecular Interactions and Therapeutic Opportunities . . . . .</b>	<b>379</b>
	Julia J. van Rensburg, Lana Dbeibo and Stanley M. Spinola	
<b>19</b>	<b>Sensing Environmental Factors: The Emerging Role of Receptors in Epidermal Homeostasis and Whole-Body Health . . . . .</b>	<b>403</b>
	Mitsuhiro Denda	

**20 The Cutaneous Circadian Clock as a Determinant of Environmental Vulnerability: Molecular Pathways and Chrono-pharmacological Opportunities . . . . . 415**  
Kyongshin Cho, Rajendra P. Gajula, Kenneth I. Porter  
and Shobhan Gaddameedhi

**21 Psychological Stress as a Determinant of Skin Barrier Function: Immunological Pathways and Therapeutic Opportunities . . . . . 433**  
Mark E. Mummert

**Index . . . . . 449**

Skin Stress Response Pathways

Environmental Factors and Molecular Opportunities

Wondrak, G.T. (Ed.)

2016, IX, 457 p. 68 illus., 39 illus. in color., Hardcover

ISBN: 978-3-319-43155-0
