

# Contents

Circumnutation: From Plants to Robots . . . . .	1
<i>Michael B. Wooten and Ian D. Walker</i>	
Using Marker-Based Motion Capture to Develop a Head Bobbing Robotic Lizard . . . . .	12
<i>Anna Frohnwieser, Alexander P. Willmott, John C. Murray, Thomas W. Pike, and Anna Wilkinson</i>	
An Architecture for Pattern Recognition and Decision-Making . . . . .	22
<i>Amy de Buitleir, Ronan Flynn, Michael Russell, and Mark Daly</i>	
Follow Flee: A Contingent Mobility Strategy for the Spatial Prisoner's Dilemma . . . . .	34
<i>Maud D. Gibbons, Colm O'Riordan, and Josephine Griffith</i>	
Local Interaction of Agents for Division of Labor in Multi-agent Systems . . .	46
<i>Wonki Lee and DaeEun Kim</i>	
Rational Imitation for Robots . . . . .	55
<i>Dieter Vanderelst and Alan F.T. Winfield</i>	
Modular Neural Control for Object Transportation of a Bio-inspired Hexapod Robot. . . . .	67
<i>Chris Tryk Lund Sørensen and Poramate Manoonpong</i>	
An Adaptive Neural Mechanism with a Lizard Ear Model for Binaural Acoustic Tracking . . . . .	79
<i>Danish Shaikh and Poramate Manoonpong</i>	
Artificial Neural Network Based Compliant Control for Robot Arms. . . . .	91
<i>Vince Jankovics, Stefan Mátefi-Tempfli, and Poramate Manoonpong</i>	
UESMANN: A Feed-Forward Network Capable of Learning Multiple Functions . . . . .	101
<i>James C. Finnis and Mark Neal</i>	
Adaptation of Virtual Creatures to Different Environments Through Morphological Plasticity . . . . .	113
<i>Peter Krcah</i>	
A Moment Measure Model of Landmarks for Local Homing Navigation . . . .	126
<i>Changmin Lee and DaeEun Kim</i>	

A Landmark Vector Approach Using Gray-Colored Information . . . . .	138
<i>Changmin Lee and DaeEun Kim</i>	
Simulation of an Optional Strategy in the Prisoner's Dilemma in Spatial and Non-spatial Environments . . . . .	145
<i>Marcos Cardinot, Maud Gibbons, Colm O'Riordan, and Josephine Griffith</i>	
A Comparison of Multiobjective Algorithms in Evolving Quadrupedal Gaits. . . . .	157
<i>Jared M. Moore and Philip K. McKinley</i>	
Learning to Switch Between Sensorimotor Primitives Using Multimodal Haptic Signals . . . . .	170
<i>Zhe Su, Oliver Kroemer, Gerald E. Loeb, Gaurav S. Sukhatme, and Stefan Schaal</i>	
A More Basic Version of Agency? As If! . . . . .	183
<i>Simon McGregor</i>	
A Biologically Inspired Soft Robotic Hand Using Chopsticks for Grasping Tasks . . . . .	195
<i>Mariya Chepishcheva, Utku Culha, and Fumiya Iida</i>	
Linguistic Primitives: A New Model for Language Development in Robotics. . . . .	207
<i>Alessio Mauro Franchi, Lorenzo Sernicola, and Giuseppina Gini</i>	
Learning to Synchronously Imitate Gestures Using Entrainment Effect. . . . .	219
<i>Eva Ansermin, Ghiles Mostafaoui, Nils Beaussé, and Philippe Gaussier</i>	
Time-Informed, Adaptive Multi-robot Synchronization. . . . .	232
<i>Michail Maniadakis and Panos Trahanias</i>	
Co-exploring Actuator Antagonism and Bio-inspired Control in a Printable Robot Arm. . . . .	244
<i>Martin F. Stoelen, Fabio Bonsignorio, and Angelo Cangelosi</i>	
Modelling the Effect of Dorsal Raphe Serotonin Neurons on Patience for Future Rewards . . . . .	256
<i>Marc Sutherland and Bernd Porr</i>	
A Model of Artificial Genotype and Norm of Reaction in a Robotic System. . .	267
<i>Angel J. Duran and Angel P. del Pobil</i>	
Abstraction as a Mechanism to Cross the Reality Gap in Evolutionary Robotics . . . . .	280
<i>Kirk Y.W. Scheper and Guido C.H.E. de Croon</i>	

Analysis of Social Learning Strategies When Discovering and Maintaining Behaviours Inaccessible to Incremental Genetic Evolution . . . . .	293
<i>Ben P. Jolley, James M. Borg, and Alastair Channon</i>	
Simulating Chemical Reactions Using a Swarm of Miniature Robots. . . . .	305
<i>Audrey Randall, John Klingner, and Nikolaus Correll</i>	
Adaptive Combinatorial Neural Control for Robust Locomotion of a Biped Robot . . . . .	317
<i>Giuliano Di Canio, Stoyan Stoyanov, Ignacio Torroba Balmori, Jørgen Christian Larsen, and Poramate Manoonpong</i>	
Generalising Predictable Object Movements Through Experience Using Schemas . . . . .	329
<i>Suresh Kumar, Patricia Shaw, Daniel Lewkowicz, Alexandros Giagkos, Mark Lee, and Qiang Shen</i>	
Evolving Controllers for Robots with Multimodal Locomotion . . . . .	340
<i>Rita Ramos, Miguel Duarte, Sancho Moura Oliveira, and Anders Lyhne Christensen</i>	
Conditions of Depleting Offender Behavior in Volunteering Dilemma: An Agent-Based Simulation Study . . . . .	352
<i>Kashif Zia, Momina Shaheen, Umar Farooq, and Shahid Nazir</i>	
<b>Author Index</b> . . . . .	365

From Animals to Animats 14

14th International Conference on Simulation of  
Adaptive Behavior, SAB 2016, Aberystwyth, UK, August  
23-26, 2016, Proceedings

Tuci, E.; Giagkos, A.; Wilson, M.; Hallam, J. (Eds.)

2016, XI, 366 p. 175 illus., Softcover

ISBN: 978-3-319-43487-2
