## Full Papers

A Scheme for Molecular Computation of Maximum Likelihood Estimators for Log-Linear Models. . . . .	3
<i>Manoj Gopalkrishnan</i>	
Nondeterministic Seedless Oritatami Systems and Hardness of Testing Their Equivalence . . . . .	19
<i>Yo-Sub Han, Hwee Kim, Makoto Ota, and Shinnosuke Seki</i>	
Programming Discrete Distributions with Chemical Reaction Networks . . . . .	35
<i>Luca Cardelli, Marta Kwiatkowska, and Luca Laurenti</i>	
Robustness of Expressivity in Chemical Reaction Networks . . . . .	52
<i>Robert Brijder, David Doty, and David Soloveichik</i>	
Chemical Reaction Network Designs for Asynchronous Logic Circuits . . . . .	67
<i>Luca Cardelli, Marta Kwiatkowska, and Max Whitby</i>	
Hierarchical Self-Assembly of Fractals with Signal-Passing Tiles (Extended Abstract). . . . .	82
<i>Jacob Hendricks, Meagan Olsen, Matthew J. Patitz, Trent A. Rogers, and Hadley Thomas</i>	
Resiliency to Multiple Nucleation in Temperature-1 Self-Assembly . . . . .	98
<i>Matthew J. Patitz, Trent A. Rogers, Robert T. Schweller, Scott M. Summers, and Andrew Winslow</i>	
Verifying Chemical Reaction Network Implementations: A Bisimulation Approach. . . . .	114
<i>Robert F. Johnson, Qing Dong, and Erik Winfree</i>	
A Coarse-Grained Model of DNA Nanotube Population Growth. . . . .	135
<i>Vahid Mardanlou, Leopold N. Green, Hari K.K. Subramanian, Rizal F. Hariadi, Jongmin Kim, and Elisa Franco</i>	
On the Runtime of Universal Coating for Programmable Matter . . . . .	148
<i>Zahra Derakhshandeh, Robert Gmyr, Alexandra Porter, Andréa W. Richa, Christian Scheideler, and Thim Strothmann</i>	
Time Complexity of Computation and Construction in the Chemical Reaction Network-Controlled Tile Assembly Model . . . . .	165
<i>Nicholas Schiefer and Erik Winfree</i>	
<b>Author Index . . . . .</b>	<b>183</b>

DNA Computing and Molecular Programming  
22nd International Conference, DNA 22, Munich,  
Germany, September 4-8, 2016. Proceedings  
Rondelez, Y.; Woods, D. (Eds.)  
2016, XXV, 183 p. 59 illus., Softcover  
ISBN: 978-3-319-43993-8
