

Contents

1	Modeling Abductive Reasoning	1
1.1	Introduction	1
1.2	Framing the Problem	2
1.3	Defining Abduction	5
1.3.1	Early Characterizations	6
1.3.2	Recent Studies	10
1.4	Abduction and Context-Bound Reasoning	13
1.5	The Problem of Formalization	15
1.6	The Generic Shape of Abductive Reasoning	18
1.7	Mathematical Abduction in Science	21
1.8	Conclusion	23
	References	25
2	Iconicity in Peirce's Semiotics	27
2.1	Introduction	27
2.2	Peirce's Theory of Signs	28
2.2.1	Peirce's General SOI Schema	28
2.2.2	Three Trichotomies and Ten Classes of Signs	30
2.3	Analyzing Iconicity	33
2.3.1	Iconicity as Quality	34
2.3.2	Iconicity as Structure	35
2.3.3	Iconicity as Abductive Support	37
2.4	Iconicity in Peirce's Theory of Dicisigns	38
2.5	Representation and Hypostatic Abstraction	41
2.5.1	Hypostatic Abstraction	43
2.5.2	Iconicity and Axiomatics	46
2.6	Iconicity and Diagrammatic Abduction	48
2.6.1	Introducing the Sheet of Indication	49
2.6.2	Formal Definition of the Sheet of Indication	52
2.7	Conclusion	55
	References	56

3	Categorical Iconicity in Peirce's Existential Graphs	57
3.1	Introduction	57
3.2	Motivating Iconic Logic	58
3.3	An Iconic Model of Propositional Logic	60
3.3.1	The Sheet of Assertion	61
3.3.2	The Graphical Syntax of EG_α	61
3.4	EG_α Graphs as Sheets of Indication	67
3.5	Logical Consequence in Peirce's Transformation Rules	72
3.6	The Categorical Structure of EG_α	76
3.6.1	Truth Values as Initial and Terminal Objects	79
3.6.2	Logical Conjunction as Categorical Product	81
3.6.3	Logical Disjunction as Categorical Coproduct	82
3.6.4	Logical Implication as Categorical Exponentiation	84
3.7	Abductive Reasoning in EG_α Via Categorical Adjunctions	86
3.8	Conclusion	91
	References	92
4	Ontology and Abduction in Badiou's <i>Being and Event</i>	93
4.1	Introduction	93
4.2	Abductive Reasoning in Badiou	95
4.3	The Continuum Hypothesis	96
4.4	The Generic Extension of Standard Models of ZF	97
4.4.1	The Generic Set	97
4.4.2	From M to $M[G]$	101
4.4.3	Diagrammatic Recapitulation	102
4.5	Modeling the Forcing Relation in EG	103
4.5.1	The Quasi-Implicational Structure of Forcing and Peirce's Existential Graphs	103
4.5.2	Diagramming Forcing as the Abductive Emergence of EG_γ from EG_β	105
4.5.3	Truth and the Mathematical Subject	106
4.6	Mathematical Ontology, Realism and Naturalism	107
4.7	Conclusion	110
	References	110
5	Phenomenology and Iconicity in Badiou's <i>Logics of Worlds</i>	111
5.1	Introduction	111
5.2	Badiou's Transcendental	113
5.2.1	T as a Heyting Algebra	114
5.3	EG_α as a Concrete Model of the Transcendental	116
5.4	Degrees of Identity and Appearing	119
5.4.1	The Function Id	119

5.5	Atoms	120
5.5.1	The Postulate of Materialism and the Object.	122
5.5.2	Localization.	122
5.5.3	Compatibiilty	123
5.6	Worlds as Sheaves	124
5.6.1	Presheaves Over a Topological Space.	125
5.6.2	From Presheaves to Sheaves.	125
5.6.3	Badiou's Synthetic Ontology.	126
5.7	Points	127
5.8	Transcendental Abduction.	128
5.9	Conclusion	130
	References.	132
6	Abductive Realism in Topos Theory	133
6.1	Introduction	133
6.2	Topos Quantum Theory: Flori	135
6.2.1	Naturalizing Abstraction: Cayley's Theorem.	136
6.2.2	Yoneda's Lemma and Embedding.	137
6.2.3	Sieves	138
6.2.4	The Presheaf in the Topos of Quantum Mechanics.	139
6.2.5	Truth Values in a Topos.	139
6.3	Topos Quantum Theory: Epperson and Zafiris	140
6.3.1	Ontological Duality.	141
6.3.2	Points, Fibers, Germs	143
6.4	Quantum Theory and Partition Logic: Ellerman	144
6.4.1	Partition Logic	146
6.4.2	Operations.	147
6.4.3	Partition Logic and Quantum Mechanics.	148
6.5	Conclusion	150
	References.	151
	Conclusion	153
	Appendix A: Category Theory: A Primer	155
	Appendix B: Topos Theory: A Primer	171
