

Contents

Cellular Automata Theory and Implementation

Pseudorandom Pattern Generation Using 3-State Cellular Automata.	3
<i>Kamalika Bhattacharjee, Dipanjyoti Paul, and Sukanta Das</i>	
On a Universal Brownian Cellular Automata with 3 States and 2 Rules	14
<i>Teijiro Isokawa, Ferdinand Peper, Koji Ono, and Nobuyuki Matsui</i>	
FResCA: A Fault-Resistant Cellular Automata Based Stream Cipher	24
<i>Jimmy Jose and Dipanwita Roy Chowdhury</i>	
Resilient Vectorial Functions and Cyclic Codes Arising from Cellular Automata	34
<i>Luca Mariot and Alberto Leporati</i>	
Universality of 8-State Reversible and Conservative Triangular Partitioned Cellular Automata	45
<i>Kenichi Morita</i>	
Scalability of Non-uniform Cellular Automata Having only Point State Attractors	55
<i>Nazma Naskar and Sukanta Das</i>	
The Garden of Eden Theorem for Cellular Automata on Group Sets	66
<i>Simon Wacker</i>	
The Density Classification Problem in the Context of Continuous Cellular Automata	79
<i>Barbara Wolnik, Marcin Dembowski, Witold Bołt, Jan M. Baetens, and Bernard De Baets</i>	

Cellular Automata Dynamics and Synchronization

A Spatial Sensitivity Analysis of a Spatially Explicit Model for Myxomatosis in Belgium	91
<i>Jan M. Baetens and Bernard De Baets</i>	
Regional Control of Boolean Cellular Automata	101
<i>Franco Bagnoli, Samira El Yacoubi, and Raul Rechman</i>	
The Role of Randomness in Self-aggregative AntTree Approach.	113
<i>Urszula Boryczka and Mariusz Boryczka</i>	

Cutting the Firing Squad Synchronization	123
<i>Antonios Dimitriadis, Martin Kutrib, and Georgios Ch. Sirakoulis</i>	
A Field Based Solution of Mazoyer's FSSP Schema	134
<i>Luidnel Maignan and Jean-Baptiste Yunès</i>	
A Class of Minimum-Time Minimum-State-Change Generalized FSSP Algorithms	144
<i>Hiroshi Umeo and Keisuke Imai</i>	

Asynchronous Cellular Automata and Asynchronous Discrete Models-ACA

Collective Infotaxis with Reactive Amoebae: A Note on a Simple Bio-inspired Mechanism	157
<i>Nazim Fatès</i>	
A Fast Parallel Algorithm for the Robust Prediction of the Two-Dimensional Strict Majority Automaton.	166
<i>Eric Goles and Pedro Montealegre</i>	
Asynchrony Immune Cellular Automata.	176
<i>Luca Mariot</i>	
Asynchronous Simulation of Boolean Networks by Monotone Boolean Networks.	182
<i>Tarek Melliti, Damien Regnault, Adrien Richard, and Sylvain Sené</i>	
Maxmin- ω : A Simple Deterministic Asynchronous Cellular Automaton Scheme	192
<i>Ebrahim L. Patel</i>	

Cellular Automata Modelling and Simulation

Chance-Constrained Water Supply Operation of Reservoirs Using Cellular Automata	201
<i>Mohammad Hadi Afshar and Mohammad Azizipour</i>	
Cognitive Map Routing	210
<i>Mohcine Chraïbi and David Haensel</i>	
Characteristics of Pedestrian and Vehicle Flows at a Roundabout System.	219
<i>Hicham Echab, Hamid Ez-Zahraouy, Nourddine Lakouari, and Rachid Marzoug</i>	
An Enhanced Cellular Automata Sub-mesh Model to Study High-Density Pedestrian Crowds.	227
<i>Claudio Feliciani and Katsuhiro Nishinari</i>	

A Cellular Automata-Like Scheduler and Load Balancer	238
<i>Jakub Gasior and Franciszek Seredynski</i>	
The Evacuation Process Study with the Cellular Automaton Floor Field on Fine Grid.	248
<i>Tomasz M. Gwizdalla</i>	
A Comparison of a Proposed Dynamical Direct Verification of Lattice's Configuration and a Forecast Behavior Parameter on a Cellular Automata Model to Task Scheduling	258
<i>Tiago Ismaier Carvalho, Murillo Guimarães Carneiro, and Gina Maira Barbosa Oliveira</i>	
Modeling of Wind Flow and Its Impact on Forest Fire Spread: Cellular Automata Approach	269
<i>Omar Jellouli, Abdessamed Bernoussi, Mina Amharref, and Mustapha Ouardouz</i>	
Modelling of Climate Change Impact on Water Resources: Cellular Automata Approach	280
<i>Hamidou Kassogu��, Abdessamed Bernoussi, Mina Amharref, and Mustapha Ouardouz</i>	
Simulations of Debris/Mud Flows Invading Urban Areas: A Cellular Automata Approach with SCIDDICA	291
<i>Valeria Lupiano, Guillermo E. Machado, Gino M. Crisci, and Salvatore Di Gregorio</i>	
Car Accidents at the Intersection with Speed Limit Zone and Open Boundary Conditions.	303
<i>Rachid Marzoug, Hicham Echab, Noureddine Lakouari, and Hamid Ez-Zahraouy</i>	
A Cellular Automata Model with Repulsive Pheromone for Swarm Robotics in Surveillance.	312
<i>Danielli A. Lima, Claudiney R. Tinoco, and Gina M.B. Oliveira</i>	
Neuro-Radiosurgery Treatments: MRI Brain Tumor Seeded Image Segmentation Based on a Cellular Automata Model	323
<i>Leonardo Rundo, Carmelo Militello, Giorgio Russo, Pietro Pisciotta, Lucia Maria Valastro, Maria Gabriella Sabini, Salvatore Vitabile, Maria Carla Gilardi, and Giancarlo Mauri</i>	
Decentralized Estimation of Forest Fire Spread Using Mobile Sensors	334
<i>Guillaume Schlotterbeck, Clement Ra��evsky, and Laurent Lef��vre</i>	

Evacuation Dynamics in Room with Multiple Exits by Real-Coded Cellular Automata (RCA).	344
<i>Kazuhiro Yamamoto and Riku Nonomura</i>	

Crowds, Traffic and Cellular Automata - CT&CA

A CA-Based Model of Dyads in Pedestrian Crowds: The Case of Counter Flow	355
<i>Luca Crociani, Andrea Gorrini, Katsuhiro Nishinari, and Stefania Bandini</i>	

Cellular Automata Model of Dyads Dynamics in a Pedestrian Flow by Rigid Body Approximation	365
<i>Kenichiro Shimura, Stefania Bandini, and Katsuhiro Nishinari</i>	

Enhanced Multi-parameterized Cellular Automaton Model for Crowd Evacuation: The Case of a University Building.	376
<i>Dimitrios Tsorvas, Ioakeim G. Georgoudas, Franciszek Seredynski, and Georgios Ch. Sirakoulis</i>	

Heterogeneous Dynamics Through Coupling Cellular Automata Models	387
<i>Stefania Bandini and Giuseppe Vizzari</i>	

Advanced CA Crowd Models of Multiple Consecutive Bottlenecks.	396
<i>Pavel Hrabák, Jakub Porzycki, Marek Bukáček, Robert Lubaś, and Jarosław Wąs</i>	

Totally Asymmetric Simple Exclusion Process on an Open Lattice with Langmuir Kinetics Depending on the Occupancy of the Forward Neighboring Site.	405
<i>Daichi Yanagisawa and Shingo Ichiki</i>	

Agent-Based Simulation and Cellular Automata-ABS&CA

Multiscale Pedestrian Modeling with CA and Agent-Based Approaches: Ubiquity or Consistency?	415
<i>Luca Crociani, Gregor Lämmel, and Giuseppe Vizzari</i>	

Line Patterns Formed by Cellular Automata Agents.	424
<i>Rolf Hoffmann and Dominique Désérable</i>	

On Formal Presentation of Update Rules, Density Estimate and Using Floor Fields in CA FF Pedestrian Dynamics Model SIGMA.CA	435
<i>Ekaterina Kirik and Tat'yana Vitova</i>	

Effects of Agents' Fear, Desire and Knowledge on Their Success When Crossing a CA Based Highway	446
<i>Anna T. Lawniczak, Leslie Ly, Shengkun Xie, and Fei Yu</i>	
Probabilistic Binary Classification with Use of 2D Cellular Automata	456
<i>Miroslaw Szaban</i>	
Author Index	467

Cellular Automata

12th International Conference on Cellular Automata for

Research and Industry, ACRI 2016, Fez, Morocco,

September 5-8, 2016. Proceedings

El Yacoubi, S.; Wąs, J.; Bandini, S. (Eds.)

2016, XXIII, 468 p. 208 illus., Softcover

ISBN: 978-3-319-44364-5
