

Contents

Part I Biology

1	Fiber Plants: An Overview	3
	K.G. Ramawat and M.R. Ahuja	
2	The Global Importance of Transgenic Cotton	17
	David M. Anderson and Kanniah Rajasekaran	
3	Natural Cellulose Fiber from Mendong Grass (<i>Fimbristylis globulosa</i>)	35
	Heru Suryanto, Solichin Solichin and Uun Yanuhar	
4	<i>Sansevieria zeylanica</i> (L.) Willd and Its Potential as a New Natural Source Fiber: A Case Study from the Yucatan Peninsula, Mexico	53
	Rodrigo Duno de Stefano, William Cetzal-Ix and Saikat Kumar Basu	
5	Linen and Its Wet Processing	65
	Arun K. Patra	

Part II Biotechnology

6	Cotton Regeneration In Vitro	87
	Hamidou F. Sakhanokho and Kanniah Rajasekaran	
7	Plant Cell, Tissue, and Organ Culture Approaches to Explore the Functional Cell Differentiation in <i>Phyllostachys</i> and <i>Bambusa</i> Bamboo Plants	111
	Shinjiro Ogita, Takao Kishimoto, Taiji Nomura and Yasuo Kato	
8	Cotton Fiber Biotechnology: Potential Controls and Transgenic Improvement of Elongation and Cell Wall Thickening	127
	Michael R. Stiff, J. Rich Tuttle, Benjamin P. Graham and Candace H. Haigler	

9	Jute Genomics: Emerging Resources and Tools for Molecular Breeding	155
	Debabrata Sarkar, Pratik Satya, Nur Alam Mandal, Debajeet Das, Pran Gobinda Karmakar and Nagendra Kumar Singh	
10	Transgenic Cotton for Agronomical Useful Traits	201
	Chandrakanth Emani	
 Part III Applications		
11	Modification of Cellulose Acetate Films	219
	Francisco Rodríguez, María J. Galotto, Abel Guarda and Julio Bruna	
12	Physicochemical, Morphological, and Anatomical Properties of Plant Fibers Used for Pulp and Papermaking	235
	Kumar Anupam, Arvind Kumar Sharma, Priti Shihhare Lal and Vimlesh Bist	
	Epilogue	249
	Index	253

Fiber Plants

Biology, Biotechnology and Applications

Ramawat, K.G.; Ahuja, M.R. (Eds.)

2016, XI, 258 p. 61 illus., 39 illus. in color., Hardcover

ISBN: 978-3-319-44569-4
